COÖPERATION IS KEYNOTE OF POWER PARLEY

Scheme to Link All Europe in Electric Network Outlined

WOMEN ENGINEERS PLAN TO COMBINE

International Standardization of Tests for Turbines Is Urged

This is the fifth of 10 articles appearing in consecutive issues reporting the World Power Conference.

By Radio to The Christian Science Monitor

BERLIN—Desire for international coöperation marked the fourth day of the World Power Conference here.

It was most vividly expressed in the fourth official address delivered under the auspices of the conference by Dr. Oscar Oliven, who developed a scheme for a European power net which has caused the utmost interest here.

Dr. Oliven's plan provides for three north and south lines. The one farthest east would commence at Warsaw, run via the German and Polish coalfields to Upper Silesia—where a branch might link it up with the Galician oilfields—then via Austrian water power sources to the water power sources of the Dalmation coast of Jugoslavia.

A central north and south line would connect Norwegian and Swedish water power sources with the central German brown coal fields and Swiss water power sources, ending in Italy.

The westerly line would run from Calais, where a steam power plant could be run by cheap British, French and Belgian coal, to Paris, Barcelona and Saragossa, having extensive water power sources ending at Lisbon.

These three vertical lines would be crossed by two horizontal lines. One would commence at Warsaw, where it would be connected with the eastern vertical line. It would cross the Scandinavia-Italy line in the central German brown coal district and end in Paris, where it would be linked up with the line to Lisbon. In Coblenz it would be connected with the Ruhr coal district.

The second horizontal line would start at Rostoff, south Russia, and proceed first to Odessa, where a power plant might be run with cheap Caucasian oil. From there it would proceed to the Rumanian oilfields. From here the Balkans might be supplied with power. It would run further to Austrian water power sources, crossing the vertical line and ending in Lyons, where it would be connected with the Calais-Lisbon line. Passing Switzerland, it would be linked up with the Scandinavian-Italy line.

The cost of building this power net is estimated by Dr. Oliven at 2,000,-

Chicago Planet 'Drama' Plays to Full Houses

Special from Monitor Bureau

CHICAGO—"Stand back, please, stand back," pleads the guard at the entrance of the new Adler Planetarium. "When those doors open 600 people will come out, and believe me, a crowd like that piles out like nobody's business."

Another 600 people, the capacity of the dome ceilinged hall, were waiting to get in, just to see the stars and planets perform on an artificial sky.

It is that way right along. The new planetarium, the first on this continent, has excited so much interest that it is "packing them in," to speak theatrically. One can hardly call the performance a "sell-out" because three days a week it is free.

But it is a striking fact that, although the museum is situated on an island reached by a narrow bridge, a location unfamiliar to Chicagoans and not too easy to find, 77,399 people managed to get there the first four weeks it was opened, said Prof. Philip Fox, director, in a recent statement.

When everyone is seated in a room that looks more like a tent than a museum Professor Fox begins to talk conversationally. He tells a few facts about the big machine. As he talks the audience becomes aware that twilight is deepening. The room gets dimmer and dimmer.

Darkness. Night. Everybody waits very quietly.

Then comes a glorious surprise. At a flash the very heavens, it seems, appear on the midnight dome. A sky full of stars shines before 600 pairs of astonished eyes. A murmur of wonder ripples through the audience.

The wonder grows as Professor Fox talks. He extinguishes the stars in order to show the motion of the planets. Then the professor, in order to explain some portion of the sky, just stops the movement of the "universe" for a moment.

Quickly, it seems, the lecture hour comes to a close.

"Today you have seen only your home sky," the director explains. "In a week or two we shall change the lecture. Then the planetarium will take us south to see constellations not visible from Chicago, such as the Southern Cross."

But the audience is not thinking yet about new astral explorations. The first lecture has in it more than one can assimilate at one visit. Many people are returning to hear it a second time.

East African 'United States' Formed Under British Charter

Kenya, Uganda and Tanganyika to Be Unified Under High Commissioner With Wide Powers—Elaborate Safeguards Made for Natives' Protection

By Radio from The Christian Science Monitor Bureau

LONDON—The Government has issued a new British charter for the East African native in the form of a "White Paper" upon the long discussed question of building up a "United States" of Kenya, Uganda and Tanganyika.

The White Paper defines the policy the Government has decided to adopt as the result of highly controversial discussions which have extended over six years during which two official commissions, one under William Ormsby-Gore and the other under Sir E. Hilton Young, have been sent to Africa to investigate.

The main questions in dispute have been the nature and extent of the control to be exercised by the central administration which it is proposed to set up for these three great territories and what has been done to safeguard the competing interests of the chief communities concerned, namely, East African natives, European settlers and immigrants from India. The Government's decisions are a compromise.

A post of High Commissioner, appointed by the British Government, is to be constituted with a nominated council to form a unifying link. He is to have wide powers of supervision over all the territories and to administer directly such central services as railways and other means of interterritorial communication, also customs, posts, telegraphs and defense.

Autonomy Plea Rejected

The demand made by white settlers in Kenya for autonomy is rejected, and the present constitution of this territory is to remain much as at present except there is to be an additional member in its council to represent African native interests.

Another main decision is that African native affairs, being in the nature of a trusteeship, are to be looked after by the British Government. Control in this respect is to be exercised through the High Commissioner and is not to be delegated to local legislative councils. On native questions, therefore, the White Paper states, "governors (the King's representative in each territory) must exercise overriding powers."

Elaborate safeguards are also included for the African natives' protection. These backward peoples are to be aided to develop socially, politically

JONES WINNER IN BRITISH OPEN GOLF CONTEST

Score Is 291—Diegel and Macdonald Smith Tie for Runners-Up

HOYLAKE, Eng. (AP)—Bobby Jones won the British open golf championship June 20 for the third time, with a score of 291. Leo H. Diegel, professional champion of the United States, made a great bid but finished two strokes behind Jones, taking 75 for the fourth round, the same score as Jones returned and giving him a total of 293.

MacDonald Smith, a later starter, played par golf to the turn and then clipped a stroke from perfect figures coming home, to go into a tie with his fellow professional, Diegel, for the runner-up position. This was the veteran Scot's second great round of the championship, for he played the first in 70 strokes.

Although he had not definitely won when he finished his round, Jones was furnished an escort of police who guarded him on his way to the clubhouse as though he had just been arrested for throwing a bomb or something.

The open champion of the United States increased his golf titles to three, as he won the amateur championship of Great Britain last month. He is the first man to hold the British amateur and open championships since John Ball accomplished the feat in 1890.

The Georgian won in spite of two shaky rounds. He took 74 strokes in the third round, when he carded a 6, and 75 in the fourth round when he had a 7 on his card. His first two

111,270 in Detroit Sign Mayor Recall

DETROIT (AP)—With a petition bearing 111,270 names officially on file demanding the recall of Mayor Charles Bowles, the ouster movement begun more than a month ago is expected to find its way into the courts. From sources close to the Administration, it was learned June 20 that an injunction probably would be sought, enjoining Richard W. Reading, city clerk, from issuing the call for an election on the recall of the Mayor, as he is required to do within five days if a sufficient number of bona fide signatures are found on the petition.

Meanwhile, the city clerk had a force of 75 clerks at work checking the signatures on the petition against the voters' registration list. He expects to complete the check within the five days required by law, and unless enjoined from so doing, to call the election for within 20 days, or about July 15.

Mayor Bowles characterized the filing of the petition as "a conspiracy on the part of certain selfish individuals to discredit me and to remove me from office so that their own selfish interests may be served."

World's Largest Carillon Shipped From England

By Radio from Monitor Bureau

LONDON—What is said to be the world's largest carillon—72 bells—for the Rockefeller Baptist Church in New York, was shipped on June 20 on the liner American Trader.

Cast by Gillett & Johnston of Croydon, the total weight is over 100 tons, the large Bourdon bell being nearly 20 tons. The C bell is the largest tuned bell ever manufactured in this country.

INDIA TO VOICE OPINION FREELY AT ROUND TABLE

Delegates to Be on Equal Basis With British at London Conference

By Radio from Monitor Bureau

LONDON—The Government of India has decided to send 50 delegates from those provinces which are under its direct rule and 12 from feudatory states administered by semi-independent princes to the "round table conference" upon Indian reforms, which will thus constitute a miniature parliament.

This conference as at present proposed is to assemble here Oct. 20. It is to make a final effort to reach agreement on a new constitution for India and the number of delegates is larger than first intended, but it is understood that it has been found impossible with a fewer number to represent all chief interests entitled to a voice in settling controversial items.

The official memorandum says: "Accurate estimate of the duration of the conference is impossible but the budget has been framed on a three months' basis, including the period spent on the voyage."

This means the conference itself is expected to sit for about six weeks. Delegates are to have their expenses paid officially.

Recommendations of the Royal Statutory Commission under Sir John Simon, which are about to appear here as the second volume to this body's report, are to be discussed, but debates are not to be limited in any way and no proposals will be ruled out. Delegates from India are to have complete equality with those representing the British Parliament, the idea being that something of the nature of the 1920 Irish treaty may conceivably emerge.

SIDKY IS FORMING EGYPTIAN CABINET

By Radio to The Christian Science Monitor

ALEXANDRIA, Egypt—On June 19 King Fuad accepted the Wafd Cabinet's resignation handed in the previous day by Nahas Pasha and asked Ismail Sidky Pasha to form a cabinet, which he agreed to do. Although the meeting was held at Sidky Pasha's house until a late hour in the evening, the members of the cabinet are not yet known.

It is likely to be formed mainly from the Ittehadist or King's party since the constitutional Liberals have decided to refrain from helping in the formation of a new cabinet. Strong police precautions have been taken throughout the country and Nahas Pasha has issued a manifesto asking all Wafdists to keep order, but at the same time a big Wafdist demonstration is staged for June 20, when a procession to Abdin Palace is foreshadowed.

REED RADIOES CHALLENGE TO PACT OPPONENTS

American Delegate to London Parley Replies to Johnsor's Criticism

Special from Monitor Bureau

WASHINGTON—Pursuing the plan of strategy determined upon by the Administration of vigorously and promptly challenging critics of the London Naval Treaty, David A. Reed (R.), Senator from Pennsylvania and a member of the American naval conference delegation, delivered a spirited defense of the pact in a nation-wide radiocast on the evening of June 19.

Mr. Reed's address was in reply to a similar radiocast the night previous by Hiram Johnson (R.), Senator from California, chief critic of the pact. Mr. Johnson severely assailed the treaty as a betrayal of American naval interests.

This type of sweeping and unqualified denunciation was ridiculed by Mr. Reed, who declared that Mr. Johnson had unquestionably thoroughly "denounced but did not describe the treaty."

The naval agreement, Mr. Reed asserted, not only confers substantial advantages upon the United States in naval matters, but is even more a major contribution to international friendship. The pact, he declared, assures the United States, as well as Great Britain and Japan, security against attack, economy in naval construction and fairly balanced fleets adequate for their national defense.

Mr. Reed stressed the significant fact that in each of the three signatory countries criticism of the treaty comes chiefly from the same source, big navy elements. He cited the fact that while Mr. Johnson and his group were denouncing the pact in the United States as a surrender of American interests by the American delegation, in London and Japan admirals and their friends were charging that their delegates had surrendered national interests to the United States.

As to the opposition of the Naval General Board to the terms of the treaty, Mr. Reed pointed out that this is not the first time their militaristic point of view had to be disagreed with and overruled.

"At the Washington Conference in 1922," Mr. Reed said, "they demanded a minimum of 1,000,000 tons of battleships for the American navy, but were finally compelled to be content with 525,000.

"After listening for weeks in this country to naval experts on both sides of the controversy and after continuing hearings in London with the advisers that accompanied us there, the delegation came unanimously to the conclusion that the provisions of the treaty were preferable to those suggested by the Naval General Board. If we were wrong, the difference in the result is trifling, but we still think that we were right."

Among the advantages to the United States under the treaty Mr. Reed listed the following:

The United States obtains "immediate parity" in battleships with Great

Bears' New Drive Cuts $2 to $10 Off Stock Prices

NEW YORK (AP)—Share prices again dropped heavily on the New York Stock Exchange June 20, as the market appeared exhausted from its sharp rally Thursday, and bears found the list vulnerable to short selling. By early afternoon, the more active issues showed losses of $2 to more than $10 a share.

The reduction of the Federal Reserve rediscount rate from 3 to 2½ per cent, the lowest in the history of the reserve system, with announcement of a reduction in brokers' loans of $211,000,000, caused a brief upsurge of prices during the early trading, which carried stocks up $1 to $7, but these advances were quickly lost.

With money already in abundant supply at the lowest rates in several years, and the banks well out of debt at the Federal Reserve, brokers were not inclined to look for any immediate benefit to stocks from the lower bank rate. The bond market, however, was immediately stimulated by the lower rate, gilt-edged issues attracting active buying.

Beck Hall, Which Has Housed Princes at Harvard, Goes Under the Hammer

June 20 in Cambridge an auctioneer hung out his scarlet flag and sold Beck Hall, a "Gold Coast" dormitory at Harvard since 1877, to the highest bidder.

The highest bidder gave $161,500, and his name was James T. Thurman; he lives in Brookline, Mass., and he is in the wool trade in Boston, and he has no sons in Harvard "now," but he might, one day, have grandsons there, of which he has nine now. He was not inclined to say what he bought the building for, but he probably knew very well, for a man does not go out and spend $161,500 without knowing the explicit reason.

It was a curious scene. Here was a building which has perhaps been the most famous to house Harvard undergraduates in the history of the college. Across Quincy Square, beyond the President's House, the Alumni Association, of which J. P. Morgan is president, was meeting in Sever Quadrangle.

Once J. P. Morgan lived in Beck Hall. As an undergraduate. There is a story, which the auctioneer told, that when J. P. Morgan Jr., was but four hours old his father telegraphed a reservation for him at Beck Hall, some 16 or 17 years hence.

J. P. Morgan Appears

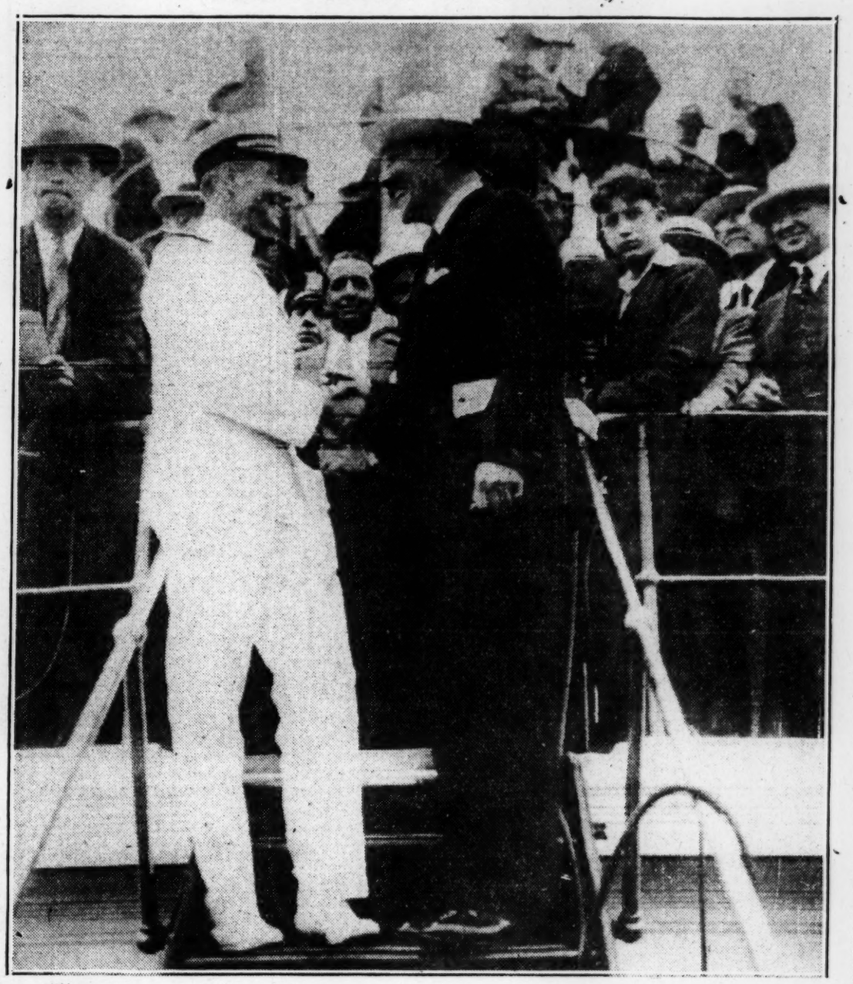

The auction was set for 4 o'clock. When the hour lacked five minutes who should come around the corner of Quincy Street into Harvard Street but the head of the house of Morgan; a tremendous man, wearing formal clothes and a silk hat, and walking very fast with a companion.

Along the railing by Harvard Union the two strode; at the doorway of Beck, and in its corridor, people were gathered for the auction; Morgan had lived as an undergraduate in Beck; could it be that he was going by for a last look, yet covering it up with a tremendous air of preoccupation and hurry?

Certainly he looked squarely across the street and along the dim line of the gloomy corridor. The two went as far as Prescott Street, turned around

Harvard Beats Yale in Both Morning Races

Crimson Freshmen and Junior Varsity Win From Eli Crews

NEW LONDON, Conn. (AP)—Harvard made a clean sweep of the morning part of its annual regatta with Yale, June 20, winning the junior varsity event by half a length, after taking the freshman race by 3½ lengths.

The junior varsity brush was a spectacular affair, with the Crimson managing to stave off a great Yale challenge in the last 100 yards. Harvard set the pace from the start, just as it had in the freshman race; but Yale's eight was always a formidable factor. Half a mile from the finish line the Crimson held a lead of more than a length, but Yale raised its beat to the high 30's, and made up half of this distance before the finish line was reached. Harvard, however, was about holding its own in the last few strides.

Both crews finished in fine condition. As the Crimson shell sped over the finish line in triumph, the Harvard coxswain stood up in the shell, waved his megaphone around recklessly, and shouted in jubilation.

Harvard had not won either morning race of its regatta with Yale since 1926, and some Crimson adherents were taking the double victory as a good omen for the varsity in the big classic in the evening. Harvard's victory in the freshman race had been expected; but there was considerable surprise and great Crimson jubilation over the result of the junior varsity, where Yale had been a pre-race favorite.

The junior varsity crews got away from the starting line at 10:36 daylight saving time. Harvard's time for the two-mile sprint was 11m. 7 1-5s.; Yale's, 11m. 10 3-5s.

The Crimson yearlings, unbeaten this year, climaxed their season with a smashing triumph over the Elis, winning without difficulty down the two-mile course. The Crimson raced into the lead at the start, maintained a smooth, powerful stroke all the way and won about as it pleased.

Harvard's time for the two miles was 11m. 2 4-5s. Yale's time, 11m. 17 2-5s.

Perfect weather conditions prevailed. A bright sun beat down, but a cool wind made conditions comfortable for spectators occupying pleasure craft along the course.

TURKS RESIST KURDS WITH 10,000 TROOPS

TEHERAN, Persia (AP)—Reports current in Tabriz, June 20, were that more than 10,000 Turkish troops were fighting Kurds, who have entrenched themselves on Mt. Ararat. The Turks were said to have met with some success. Persian troops are on guard on the frontier.

Kurdistan is a region of vague boundaries in eastern Asiatic Turkey and western Persia. The Kurds, although Aryan in extraction, are Muhammadan in creed. They have a quasi-independence under their chiefs, and are noted for their robberies.

Curtis to Give Land for Temple of Music

By the Associated Press

Philadelphia

PLANS for a great $4,000,000 temple of music and the fine arts to be erected here assumed definite form in an announcement June 19 by A. M. Greenfield, real estate operator, that the site for the building had been purchased by Cyrus H. K. Curtis, Philadelphia publisher, for $2,200,000.

It will be presented free of encumbrances, Mr. Greenfield said, to a corporation now being formed to build a temple of music.

WOMEN ELEVATE POLITICS, SAYS MRS. BARROWS

State Representative Declares Men Must Raise Standards

Special to The Christian Science Monitor

WELLESLEY, Mass.—"Women who run for political office in the United States are not only better trained than the men, but they also try harder to equip themselves for the job," declared Mary Livemore Barrows, state Representative from Melrose, Mass., before the third day's session of the Educational Conference of the Wellesley College Alumnæ Association at Tower Court, Wellesley College.

Mrs. Barrows said she resented the fact that men seemed to be considered the logical office holders. "If the women raise the quality of training for office" she said, "the men will have to raise their standards as well. This is what women are doing for politics."

More and more women will go into politics, Mrs. Barrows prophesied. She said that she believed the Eighteenth Amendment would never be repealed, because the dry western states would never permit of a three-fourths majority of wet states.

Mrs. Alice Ames Winter, associate director of public relations, Association of Motion Picture Producers Inc., speaking on the "Movies and the Millions," said that the thought was growing that "since the movies are an escape from dishwashing for the millions, it is vital that they have what they want, and the majority want good pictures. In censorship," she said, "it is necessary to depend on mass standards to a large extent, the people in the rural communities, in the home centers, are the real gauge of values rather than the vast transient city population." That women can influence this selection of films is evident. The very evidence of her own appointment Mrs. Winter cited to show the deference that the motion picture producers have for women's point of view.

In considering the foreign films, Mrs. Winter said that they might very probably amount to a matter for discussion at some later date by the League of Nations; already it has been agreed that no film that has anything to do with people of a foreign country can be released without first being submitted to that foreign embassy.

Essay Wins $250 in 1925; $10,000 5 Years Later

Electric Light and Power Forecast Gains Enthusiastic Tribute

Special from Monitor Bureau

SAN FRANCISCO—An essay written five years ago and awarded at that time a comparatively insignificant prize of $250, so keenly reviewed and forecast the development of the electric light and power industry that a prize of $10,000, awarded by the American Superpower Corporation, will go to the widow of the author, Mrs. Doris Sleight, of Ann Arbor, Mich., it was announced June 19 at the convention of the National Electric Light Association here.

Reuben B. Sleight, who wrote the winning paper, submitted his offering to the 1925 contest, conducted by Bonbright & Co., Inc. There were 438 contributions in all, each one dated as of Jan. 1, 1930, and predicting what the five-year period would bring forth in the industry.

Directors of the Superpower Corporation, selected to act as judges, voted to match the $10,000 distributed as prizes by the Bonbright Company, with another $10,000 for the paper, which, "reviewed again in 1930, shall appear to have most nearly approximated the facts as they eventuate." In the 1925 contest the name of Mr. Sleight appeared with 10 others in the fourth group of $250 prizes. After the contest all the papers were sealed and kept in a vault until again reviewed by the judges this year.

When his paper was written, Mr. Sleight was an engineer with the Minnesota Tax Commission. He later accepted an appointment on the engi-

Relief Demanded for Australia's Native Workers

By Radio from Monitor Bureau

LONDON—"Australia is breaking the League slavery convention on three counts," said Mrs. Montgomerie Bennett, speaking at the concluding session, June 19, of the conference held here by the British Commonwealth League on the question of women's power and policy in relation to the coming Imperial Conference. She continued:

"In federal territory forced native labor is used for private profit, wages are often refused to these natives and it is possible to remove them from tribe and family to work for white people in Darwin."

Mrs. John Jones, member of the Australian Federation of Women Voters, spoke earnestly in support of opinions formed at the federal conference on aboriginals called at Melbourne in 1929 and which had proposed that in the management of aboriginals qualified women receive a definite place on any council which might be formed by the Government, that women assistants be appointed to each of two chief protectors, and that women with police powers be appointed to act in the neighborhood of construction camps.

BYRD RIDES IN TRIUMPH TO CAPITAL

President at White House Extends the Greetings of the Nation

PARTY SHARES IN WASHINGTON HONOR

Informal Calls, Luncheon Fill Day—National Geographic Reception to Follow

Special from Monitor Bureau

WASHINGTON—With a handshake and a simple congratulation, President Hoover on June 20 extended a nation's greeting to Rear Admiral Byrd, back from the aerial conquest of the south pole.

The informal call at the White House, following a triumphal ride down Pennsylvania Avenue, served as a prelude to the formal ceremony of bestowing upon the returned explorer the final tribute of the nation's natural scientific fraternity. This is the specially designed gold medal of honor of the National Geographic Society.

Less tumultuous than New York's uproarious welcome, that of the capital was no less characteristic of the city which gave it. As the party of the Rear Admiral and his entire crew passed down the historic boulevard that has seen the fanfare of inaugurals and the parades for visiting princes and prime ministers, the massed crowds cheered the young leader not only as a gallant officer, but as an organizer who had ventured across the polar ice cap and brought back every member of his large party alive.

Like Lindbergh Day

The scene was reminiscent of the welcome accorded Lindbergh when he received the cheers of the city on a similar hot summer day and was greeted by the handshake of the President and a medal from the National Geographic Society.

From the ride through the city, the Byrd party went to its headquarters in a centrally located hotel, where breakfast was served. The Rear Admiral and his party proceeded to the White House shortly after noon, where they were received by the President in behalf of the nation.

Following the brief and informal ceremony the entire command were guests at luncheon of the trustees of the National Geographic Society. The corridors of the hotel where the luncheon took place were crowded with visitors who sought to catch sight of the returned explorer. With the party were the Admiral's wife and young son, his mother, Mrs. Eleanor Bolling Byrd; his brothers, former Gov. Harry F. Byrd of Virginia and Capt. Tom Byrd, Governor Byrd's wife and children, and other members of the three families.

The afternoon was filled with a brisk round of calls and ceremonies. As a retired officer of the navy, the Rear Admiral called on Acting Secretary of Navy Jahncke at 3:30 and went later to the Arlington National Cemetery where he laid wreaths on the tombs of Admiral Robert E. Peary, discoverer of the north pole; Admiral Charles Wilkes, reputed discoverer of the antarctic continent a century ago, and Floyd Bennett, who piloted the Byrd airplane over the north pole. During it all, the radio, the same medium that kept the party at the south pole in touch with civilization, kept the country in touch with the great ceremony on its return.

Hints at Going South Again

In an interview, Admiral Byrd summed up the accomplishments of his 20-month expedition, praised the heroism of his comrades and hinted that he might return to the antarctic.

"There's plenty left in the South to be explored," he said.

Discovery of carboniferous deposits under the glacial snow and ice proves conclusively, the explorer declared, that sunshine once flooded the polar cap and that the great southern continent once had a temperate or even a tropical climate. The Admiral brought forth a map of Antarctica and pointed out the huge slice of territory which his expedition has added to the map.

Asked to define exactly what land had been claimed for the United States, the Admiral explained that everything east of the -50th west meridian, which marks the limit of the Ross Dependency, had been included in the area that he had put on the map as Marie Byrd Land, in honor of his wife.

"Just how big is that?" asked a reporter.

"Oh—it might be very tremendous; we don't just know," said the Admiral in hesitation. "There are mountain ranges in it. We actually saw only a small part of it; fifty or so thousand square miles."

"Is it of any use?" asked a reporter bluntly.

"Now that's a hard question to answer. You know it was 100 years after this country was discovered that it was of any use."

Admiral Byrd went on to explain that it will be months before the result of the natural scientific discoveries of thep arty can be fully analyzed, but already geographers and meterologists realize that a new chapter has been opened to their knowledge. Four volumes will be written on the natural scientific aspect of the expedition, to which the Admiral will contribute articles on the geographic phase.

The progress of aviation, Admiral Byrd said, will probably open up the antarctic for natural scentific research shortly and in time the polar

sky may even see an aerial trade route.

Of the geologica work, Admiral Byrd said the expedition had cleared up many mysteries of the most important part of the world still left unexplored. Minerals had been found and particularly the carbon deposits told a story of a warm climate in the past since coal originates from vegetable matter. The explorer said he saw no immediate practical use for the mineral deposits, whose utilization posed a riddle for the future.

"One of the most important parts of our work was in radio and magnetic observations," Admiral. Byrd said. "You know short waves travel both ways round the earth. We frequently got the 'echo' of the second wave and collected material to study the Heaviside Layer. Our expedition made the first magnetic readings ever recorded from the pole when the sun spots were at their maximum. The data obtained will be correlated with studies of magnetic storms and of records of magnetic lines of force in the North. Observations were taken in the most extreme cold every half hour duing the entire trip. They may throw light on radio reception, static, magnetic storms and similar disturbances."

Byrd Thanks Business Men of New York for Their Help

SPECIAL FROM MONITOR BUREAU

NEW YORK—Commerce paid tribute to adventure at a dinner to Rear Admiral Richard E. Byrd and members of his antarctic expedition attended by 1200 of the city's business and professional leaders and sponsored by the Merchants' Association of New York at the Astor Hotel on June 19.

The seating list included an assemblage of distinguished names which marked the event as one of the most important gatherings that has ever honored an explorer. When Admiral Byrd entered with Willis H. Booth, president of the association, he was greeted with a burst of applause, and frequently during the evening when speakers referred to the exploits of the Admiral and his men the guests applauded vigorously. Mr. Booth presided, and Lincoln Cromwell, first vice-president, made the speech of welcome to the returning employers.

"There is not a man worth his salt," said Mr. Cromwell, "who has not gained courage and confidence in himself by the success of Admiral Byrd. He has exemplified the ideal of education which is to know ourselves and to know our environment so that we can climb on top of our environment and never let it ride us."

Admiral Byrd, in acknowledging the welcome, declared that he spoke for his companions on the south pole expedition, "because they deserve equally well with me."

"It is extraordinarily gratifying that this very old and very distinguished association has seen fit to recognize the [natural] scientific aspects of our expedition," he continued. "It was the merchants and business men of this city who did a very great deal indeed to make the expedition possible by their generous donations; in fact, without them and their help the expedition would have been absolutely impossible, and after making it possible you give us this wonderful reception and welcome and have said 'Well done' to us on our return, and we do appreciate it.

"It was a kind of a discovery in itself to find we could go down there to the bottom of the world, cut off for many months from civilization by an impenetrable field of ice that all the world could not have reached us if we had gotten into trouble; down there in a country that is in the clutches of an ice age such as existed up north here 25,000 years ago—I say, it was a kind of a discovery to find that we could endure it without undue hardships."

Mr. Booth presented each member of the expedition to the guests and a few of them made brief speeches. Bernt Balchen, the Norwegian aviator who piloted the airplane that carried Admiral Byrd over the south pole, received such an ovation from the audience that he was obliged to reply to it.

He arose, blushing, and said he wanted to take this opportunity "to thank the Admiral for the big honor he bestowed upon me when he gave me the chance to fly the airplane over the pole with him.

"I also want to take this opportunity to thank my shipmates for the good comradeship we had down there," he said. "I am sorry the expedition is over."

NEW YORK (AP)—The entire cost of the Byrd Antarctic Expedition was not more than $800,000, Capt. H. H. Railey, the rear admiral's personal representative, estimated. The $100,000 remaining to be paid it is expected will be supplied privately.

BOLIVIAN REBELS GIVE PEOPLE SEIZED GOODS

BUENOS AIRES (AP)—Dispatches to La Nacion said on June 19 that the Argentine vice-consul at Villazon, Bolivian border town, seized on Tuesday by the insurgent band of Roberto Hinojosa, had been forced to return to La Quiaca, but not injured.

The radical leader still holds Villazon. He has taken over shops and the customs house and distributed flour and all sorts of merchandise freely among the population.

TOLL BRIDGE FOR PORT HURON

WASHINGTON (AP)—The Senate bill to establish the Great Lakes Bridge Commission and to authorize it to construct a toll bridge across the St. Clair River at Port Huron, Mich., was passed June 19 by the House. The measure now goes to the President

Entered at second-class rates at the Post Office at Boston, Mass., U. S. A. Acceptance for mailing at a special rate of postage provided for in section 1103, Act of Oct. 3, 1917, authorized on July 11, 1918.

TARIFF CHANGES BLOCKED EXCEPT BY COMMISSION

G. O. P. to Allow Revision Only Through Use of Flexible Plan

SPECIAL FROM MONITOR BUREAU

WASHINGTON—Demands for further tariff revision, whether up or down, must follow the procedure provided for such calls in the new tariff act, Republican leaders of Congress who put through the Hawley-Smoot bill let it be known on June 19.

Efforts to reopen consideration by legislative action on the new tariff act will be vigorously resisted by them. Interests seeking revision will have to take their case to the Tariff Commission through the operation of the flexible tariff provision. If the Republican leaders can prevent it, there will be no reopening of the tariff controversy in Congress.

In keeping with this policy the House Ways and Means Committee, acting on the advice of Republican leaders, rejected a group of proposals for emergency rate boosts by congressional resolution, frankly announcing that it is the purpose of the Republican control not to permit a reopening of the recently completed legislation.

The rate revisions demanded were on anthracite, wiping rags, and sugar. The anthracite operators are insisting that their commodity be taken off the free list and a heavy rate assessed to put a halt to increasing low-priced importations of Russian anthracite.

The sugar revision demand arises out of what is being characterized as a "joker" in the new schedule on this commodity, under which it is asserted refined sugar will be importable at a lower rate than raw sugar.

Republican leaders are making no secret of the fact that they fear a reopening of the rate schedules and particularly that of sugar. The heavy vote for downward revision of this commodity that manifested itself in the House, when the question came up there on the hedged-in choice of the high rates of the House measure, or the slightly lower ones in the Senate bill, showed clearly what the House would do if the chance were given it to vote without restriction on the issue.

Because of the uncertainty of what would happen should the tariff be thrown back again into the legislative mills and also to keep the issue from being reopened, Republican leaders are determined to check proposals for renewed revision.

EAST AFRICAN 'UNITED STATES' CHARTER ISSUED

(Continued from Page 1)

and economically. Manifold provision is made to prevent the alienation of their land; to enable them to enjoy latitude in the choice of livelihood and to free them from such taxation as is calculated to compel them to work for employers away from their homes.

The Government lays down that the goal to be aimed at for each territory is responsible government by a ministry representing the electorate, in which every section of the population finds an effective voice. It also favors the eventual establishment of a common electoral roll for Europeans and Indians which is what the Indians all along have demanded and the settlers have opposed. It says, however, that responsible government "cannot be reached at an early date in a community where it so far has been practicable to enfranchise less than one per cent of the population and where the idea of any substantial extension of the franchise finds little general support."

Criticism by Settlers

The Government's schemes are to be considered by a joint committee of both Houses of Parliament. Meanwhile it is criticized sharply from the settlers' viewpoint. The London Times, for example, referring to the proposed joint electoral roll for Indians and Europeans in Kenya, says: "It is unfortunately far more certain that the talk of a common roll inflames race feeling in Kenya than that it does any good in India."

This newspaper also says "It is impossible not to feel there is a certain want of perspective in the emphasis laid upon the 'paramountcy' of native interests."

The Manchester Guardian, on the other hand, says the "Government is to be congratulated upon an honest attempt to settle a long controversy courageously and without overlooking those details of practical administration upon which effective fulfillment of our trusteeship ultimately depends."

Governor Winthrop Visits Enemy of Reformation at Winnesimmet

Mr. Bridgman assumes the character of a correspondent purporting to have been on board the Arbella and now assisting in the building of the Massachusetts Bay Colony. He describes life as it was in 1630; and names, dates, and quotations are from authentic documents and records.

NAUMKEAG [SALEM], June 19, 1630—"As we came home we came by Nataskott [Hull], and sent for Captain Squib ashore—(he had brought the west-country people, viz., Mr. Ludlow, Mr. Rossiter, Mr. Maverick [Rev. John Maverick], etc., to the bay, who were set down at Mattapan,)—and ended a difference between him and the passengers; whereupon he sent his boat to his ship, (the Mary and John) and at our parting gave us five pieces. At our return we found the Ambrose in the harbour at Salem."

So wrote Governor Winthrop of today's events; but of our stay last night at Winnesimmet [Chelsea] with Samuel Maverick, all he records is that "we lay at Mr. Maverick's." Young Maverick was "a man of very loving and courteous behaviour, very ready to entertain strangers, yet an enemy to the reformation in hand, being strong for the lordly prelatical power." The Governor was courteous, and very appreciative of Mr. Maverick's hospitality; but he cannot give space in his journal to an enemy of the Puritan reformation.

Mr. Maverick was born in 1602. He came to Wessagusset [Weymouth] in the fall of 1623 with Capt. Robert Gorges, the Rev. William Morrell, William Blaxton, Thomas Walford, John Burslem, William Jeffreys and others; and when that plantation was decimated by the return to England of many of its planters, he chose to remove to Winnesimmet. Here, in 1625, he built a house "fortified with a pillizado and flankers and gunnes both belowe and above in them which awed the Indians which at that time had a mind to cut off the English. They once faced it, but receiving a repulse never attempted it more, although (as now they confess) they repented it when about two years after they saw so many English come over."

Here a trading post was in operation, and the little settlement gave the appearance of being far less austere than Plymouth, yet much less gay than Merrymount, although Maverick confessed to being of a "convivial nature." He had been a successful man of business, and now was maintaining that reputation as a trader in furs. Two years ago he married the widow of David Thomson (first settler of Thompson's Island), and their hospitality extended to "giving entertainment to all comers gratis." As we sailed for Salem he bade us "turn in" whenever we had occasion to be in his vicinity.

COURT DISMISSES INJUNCTION REQUEST

WASHINGTON (AP)—A formal order dismissing a request for injunction against the Secretary of Agriculture and Commissioner McDonald of public roads, brought by the Carlo Bianchi Company of Boston, was entered June 18 in the Supreme Court of the District of Columbia.

Justice Jennings Bailey handed down the order, granting a government request for dismissal. The Bianchi concern sought to prevent the federal official from withdrawing federal aid from state highway construction for which the concern might obtain the contract. The federal action was taken because of dissatisfaction with the settlement of certain Bianchi Company construction contracts.

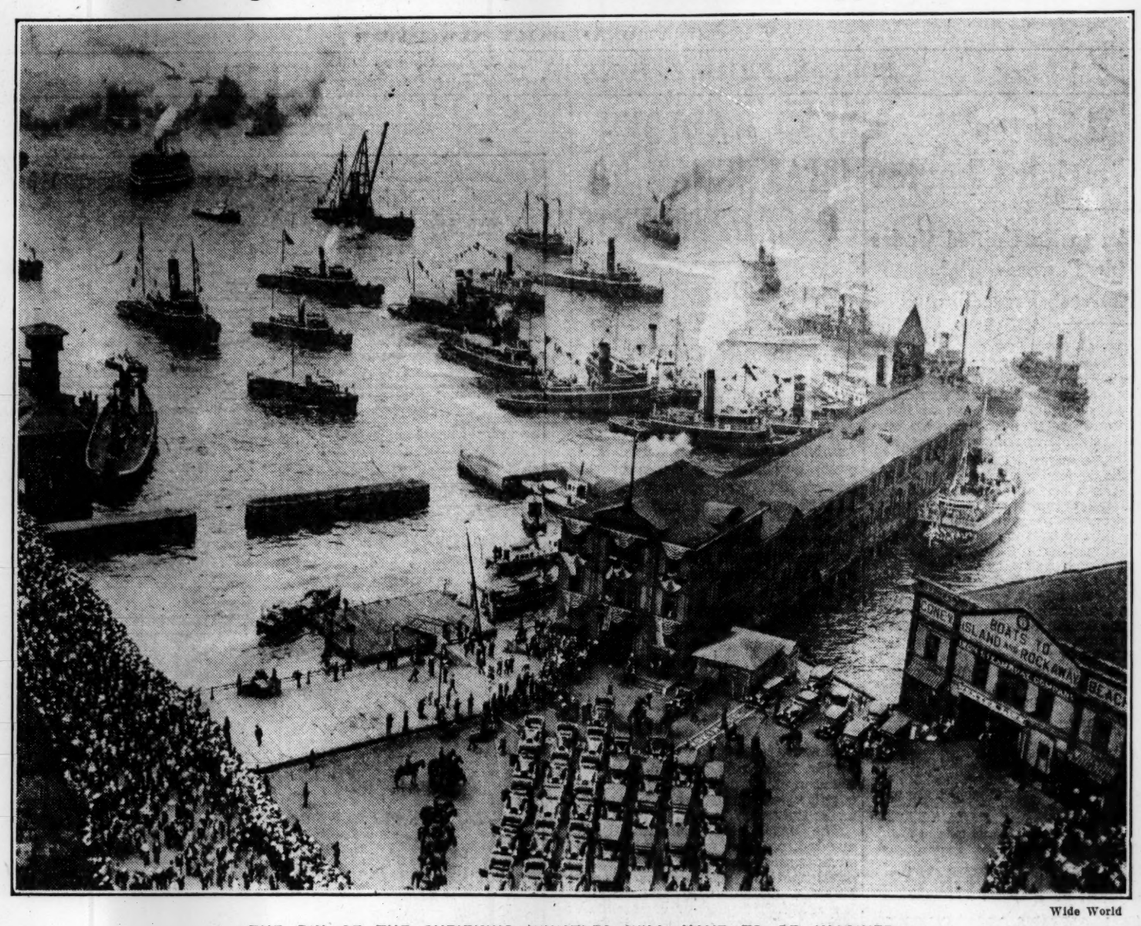

ST PAUL'S AWARDS DIPLOMAS

CONCORD, N. H. (AP)—P. W. Herrick Jr., of Chagrin Falls, O., grandson of the late Myron T. Herrick, and Malcolm L. Wyster of Wynnewood, Pa., cousin of Owen Wister, writer, were among the 64 members of the graduating class of St. Paul's School, awarded diplomas June 19. First honors for scholarship went to John B. Roberts, Manchester, N. H.; Francis L. Van Dusen, Philadelphia, and Edward R. Stowell, New York.

Moving Pictures of Byrd in Antarctic Record of Heroism, Mirth and Pathos

SPECIAL FROM MONITOR BUREAU

NEW YORK—Seven hours after Rear Admiral Richard E. Byrd landed in New York, Paramount-Public began showing at the Rialto Theater its film record of his antarctic expedition. This picture, called "With Byrd at the South Pole," will soon be available for 100 cities in the United States. It constitutes a thrilling adventure for the spectator, taking one through the incidents of the long voyage south, the winter of preparation for the polar flight, and along in the plane with Byrd and his three companions on the flight itself.

One sees the City of New York nosing its way through the pack ice that had to be traversed for 400 miles before the Ross Barrier was reached. There Byrd and his crew land on the edge of the Barrier, and dig in for the antarctic night of 125 days. The emotional stir for the spectator when the ship leaves Byrd's party on the Barrier as it starts for New Zealand for fresh stores is surpassed only by the sight of Byrd and his three men setting off in the plane for the flight to the pole.

All through the long stretch of darkness scouting parties had to be sent out regularly to inspect the condition of the ice upon which their home floated above 2000 feet of water. Incidents in one of these inspection trips, with the men carrying flares that silhouette them against the great hummocks of ice, furnish some of the best of the spectacular camera shots with which this film is filled.

Again one sees the dog sledges, with their leaders finding their way unguided down the only possible path along the tumultuous mounds of snow and ice, threading their way alongside treacherous crevasses with an instinct so trustworthy that the sledgemen let the steadily scampering huskies go their own trail.

One sees Byrd poring over his maps and consulting with his aides, planning out the minutiæ of the polar flight. And all the while his men are at work, parceling out rations, building and repairing gear and always reflecting the unfailing cheer of their leader. Byrd's smile runs through this whole story of a great adventure like a theme. It is a smile to melt the surliest mood, yet a smile without a touch of self-consciousness or superiority. Always is he a man among these men, thanks in no small degree to the taste with which the picture has been assembled by Emmanuel Cohen.

Mr. Cohen, with his long experience in preparing news reels, has managed to dramatize the unrolling story, but with no too obvious touches of theatrical appeal. The sub-titles, by Julian Johnson, happily avoid attempts to pump up emotion in the spectator. They tell a "plain, unvarnished tale," for his material speaks for itself thrillingly. The incident of the polar flight has a running accompaniment of description by Floyd Gibbons in his best high-tension manner, but does not exceed legitimate lengths in conveying excitement to the spectator through the spoken word. Music, arranged by Manny Baer, provides a descriptive tonal background for the rapidly changing variety of incidents.

There are many humorous touches in the telling of the story, bringing in the good-natured playfulness of the men among themselves, with penguins providing really comic touches. These walking birds are shown standing about staring curiously at the strange invaders of their stronghold. They can walk apparently as fast as a man, but when they wish to make time they lie flat and hump themselves.

One shot shows a lone penguin wearing around his white neck a black bow tie placed there by some wag. Again a row of them stands swaying in rhythm with the dancing antics of one of the crew. Whales thrust their inquisitive snouts out of the water to see what is going on, and sometimes one swoops almost out, like the familiar porpoises of north Atlantic waters. A seal is shown taking his contented ease on an ice cake.

Again and again one sees Igloo, the fox terrier who has been Byrd's companion for five years, frisking about his master, or blinking in the lamplight in which the explorer works over his notes.

The film is one long panorama of photographic beauty, thanks to the skill and ingenuities of the two photographers of the party, Willard Van der Veer and Joseph T. Rucker. It opens with a talking sequence in which Byrd thanks the public for its support of his enterprise, and in which he tells of his indebtedness to every member of the crew and his thankfulness that every man in the party came back without injury.

Unforgettable when all is over is that minute before the take-off for the pole, with Bernt Balchen grinning through the window of his pilot's booth, and Byrd waving farewell to the men that were to wait behind while he soared off over the 15,000-foot peaks of Queen Maude's range.

Two hundred pounds of emergency rations are dropped out to lighten the plane and up and over it goes on its 1600-mile flight, in less than 18 hours, looping the bottom of the world by a good margin by every test of Byrd's sextant and sun compass. E. C. S.

AMERICAN TRADE RELATIONS GET PARIS ATTENTION

Tariff and Motion-Picture Rift With Germany Under Discussion

BY CABLE FROM MONITOR BUREAU

PARIS—America's foreign trade policy is receiving its full share of attention in Paris this week. In addition to tariff discussions, a conference is being held here between American and German film interests which tends to make Paris the focal point for the time being in commercial relations between Europe and the United States.

American and German film interests have reached the point where a practical embargo on exchange of films and electrical equipment appears imminent in both countries. With the view to substituting an amicable working agreement for the threatened complete stoppage of trade, the conference between representatives of both national industries is being held in Paris under the chairmanship of Will Hays, president of the Motion Picture Producers and Distributors of America. The leader of the German group is Dr. Curt Sobernheim, general manager of the Commerz und Privat Bank, Berlin. Representatives of most of the important American and German electrical equipment manufacturers and film producers, and Douglas Miller and George R. Canty, representing the United States Department of Commerce, are in attendance.

In acknowledging his election to the chairmanship of the conference, Mr. Hays made remarks which, if realized in practice, would go far toward solving not only the disagreement between American and German film producers, but also the United States tariff question.

"The most important words and most important fact," said Mr. Hays, "in consideration of world affairs today is interdependence. Recognition of it is the key alike to peace and to trade."

Meantime the Customs Committee of the Chamber of Deputies has adopted a resolution urging the Government to enact retaliatory increases in duties on American goods, to intercede with President Hoover in an attempt to obtain reductions necessary for maintenance of the French export trade and if necessary to suppress the "most favored nation" clause in respect to the United States.

REED RADIOES CHALLENGE TO PACT OPPONENTS

(Continued from Page 1)

Britain and a five-to-three ratio with Japan, advancing by 11 years the date when the navies of the United States and England will be equal. This is accomplished by the scrapping of five British battleships, three American ships and one Japanese ship. The British ships to be scrapped. Senator Reed said, "have larger guns than ours and in all respects are better vessels than the three old ships which we are to scrap."

In cruiser construction the United States continues to build until it passes Japan and reaches equality with Great Britain, while the latter countries practically stand still to let us catch up.

In the end, the United States will have a well-balanced fighting force of battleships, large and small cruisers, destroyers and submarines equal in tonnage and armament to that of Great Britain, and superior to that of Japan.

Ford to Spend $30,000,000 on Branch Plants

DETROIT (AP)—New branch plants, additions and other improvements to present facilities and equipment planned by the Ford Motor Company this year will represent an expenditure of substantially more than $30,000,000, officials of the company said June 19.

Work involving $24,500,000 already is under way or in the hands of architects. The expansion program contemplates new branch plants in various parts of the country as well as improvements in the parent plants here. Improvements also are planned in the various foreign plants of the company but these were not included in this estimate of the total expenditure.

Branch plants on which work already is under way or for which plans have been drawn will involve an expenditure of $18,000,000. Included in this program is a branch plant at Edgewater, N. J., another at Richmond, Calif., another at Seattle, Wash., and three new plants whose location will be announced shortly.

Besides the expenditures for new branch plants the company is spending $3,000,000 this year on a water tunnel, intake house and pump house at Dearborn near here.

A million dollars is being spent in the improvement of Boa Vista, the Ford rubber plantation in Brazil. Another $5,000,000 is being spent on the Edison Institute of Technology and other activities of Henry Ford not directly associated with the automobile and airplane plant.

The company announced that its offices and plants in the Detroit area will be closed for two weeks beginning July 12. The announcement said the shutdown was to enable all employees to take vacations simultaneously, and that a complete plant equipment and machinery inventory also would be made.

Most of the other automobile plants in the Detroit district are planning similar shutdowns during July and early August.

WAGNER REJECTS CHANGE IN BILL ON EMPLOYMENT

Senator Says Main Aim of His Measure Has Been Eliminated

SPECIAL FROM MONITOR BUREAU

WASHINGTON—Robert F. Wagner (D.), Senator from New York, disclaimed his own bill for the relief of unemployment by long-term planning and accelerated construction of public works, after the House Judiciary Committee reported it out in a new and emasculated form. According to Mr. Wagner the provisions which have been deleted from the bill rob it of its major purpose and leave it hardly more than an empty gesture, instead of setting up a new system for dealing with the slumps and depressions of industry.

At the same time that Mr. Wagner was issuing a prepared statement June 19 on the matter, Emanuel Celler (D.), Representative from New York, entered the minority report of the House Judiciary Committee, denouncing the action of the majority, and charging that the elimination of important provisions of the bill was due to the hesitancy of the Administration. Both men pointed out that the policy of utilizing construction in times of depression as a balance wheel of prosperity has been constantly advocated by President Hoover.

While this controversy was going on in both houses of Congress, Arch W. Shaw, chairman of the Hoover committee on recent economic changes of the President's conference on unemployment, was reading proofs on the new report on "planning and control of public works," which deals with the same subject. Edward Eyre Hunt, who has served as secretary to a number of the previous Hoover commissions, as he did on this latest one, stated that the new report will be issued shortly.

The fate of the three Wagner bills, all of which have passed the Senate, has been as follows in the House: (1) the bill providing for collection of more comprehensive employment statistics is before the House; (2) a bill to set up a system of federal employment offices to coöperate with state agencies has been shelved; (3) the bill for a system of long-range planning has been reported favorably to the House, but by a close vote in the committee Sections 7 to 12 of the bill are eliminated. This leaves without change the sections establishing a federal employment stabilization board to recommend action to the President, but omits provisions which would make action on such recommendations of the proposed board mandatory.

The fight now centers in the House on the effort of sponsors of the Wagner bills to overrule the committee majority and to bring out the bill for federal employment agencies from its subcommittee, and to restore the deleted passages of the planning bill, with the hope that action may still be taken before adjournment.

WASHINGTON (AP)—At the White House June 18 William Green, President of the American Federation of Labor, after a conference with President Hoover, said there was evidence "that we are reaching a point of improvement in employment conditions." He requested of the President that the census bureau's report on unemployment be expedited and made public as soon as possible.

Referring to an estimate given before the House judiciary committee at his appearance in behalf of the Wagner bills, Mr. Green said his figure of 3,600,000 out of work included those laid off through seasonal shutdowns, and other causes.

Electric Light and Power Men Rise in Defense

SPECIAL FROM MONITOR BUREAU

SAN FRANCISCO, Calif.—America's private electrical industry must answer its critics in language everyone can understand if it is to avoid socialistic efforts to turn it over to public ownership, speakers before the National Electric Light Association convention declared here June 19.

The industry has a "glorious record" with which to confound those who attack it, representatives of many power companies declared. They cited the rapid spread of electric lines to virtually every hamlet in the nation; the consistent decrease in electric rates in the face of rising prices in other commodities; economies of distribution and management and the encouragement and promotion of invention and research as factors which outbalance any mistakes of judgment the industry may have made.

Harry Reid, president of the National Electric Power Company of New York, told delegates to the convention that efforts to socialize the power industry are well organized, and jeopardize not only that industry but all private business in the United States. J. F. Owens, vice-president and general manager of the Oklahoma Gas & Electric Company, said there is no denying that the electric concerns have lost within the past three or four years much of the esteem in which they were formerly held by those they serve.

Various policies of the power companies were explained and defended. Martin J. Insull, president of the Middle West Utilities Company, told of the part played by "holding companies" in the electric industry. These, he said, have been responsible for handling the most hazardous phase of the industry by financing its development and furnishing funds for its continuous operation. The name "holding company" is unfortunate, he said. "Electric light and power investment companies," he suggested as a more fitting title.

Thirteen prizes were awarded contestants in public speaking and essay competitions open to employees of electric light and power companies. These ranged from two gold medals to cash awards of $1000 to $100, the latter totaling $2750.

A new record for sending a message around the world was established at the convention June 19. The time was 5 minutes, 30 seconds, cutting down the former record of 8 minutes, made in 1927, by two minutes and a half.

Leaving the stage of the civic auditorium, the message went by cable across the Pacific to Hawaii, Guam and Shanghai, thence by relays across Russia and Siberia to Germany, across the North Sea to London, from London by cable to New York, where a transcontinental circuit was open to speed the dispatch across the United States to its starting point.

Although the message was started here on Thursday, some of the persons who relayed it dated it "Friday." The message was sent by Preston S. Arkwright, chairman of the public policy session of the convention, and was received by Matthew S. Sloan, president of the National Electric Light Association, seated a few feet away. It traveled approximately 25,000 miles.

The message read as follows:

"Over land, under seas, across the world electricity speeds this message of hearty congratulations on a most successful administration and convention."

ESSAY WINS $250 IN 1925; $10,000 5 YEARS LATER

(Continued from Page 1)

neering staff of the United States Department of Commerce as an assistant to Mr. Hoover. He was detailed to work out waterways problems. He passed on in 1927.

"Mr. Sleight's essay, in the judgment of the board," said the announcement, following the unanimous vote of the judges, "is worthy of an enthusiastic tribute. The judges consider that it treats, in an adequate fashion, practically all phases of the development of the industry, that no important errors of judgment are displayed, and that the author ventured a considerable number of statistical forecasts that now exhibit remarkably small deviations from the actual data. Other essays contained a greater number of specific forecasts, and some of these forecasts were more accurate than those of Mr. Sleight. Still others contained isolated strokes of brilliant prophecy. However, Mr. Sleight excelled in general treatment, and the judges have had no difficulty in reaching the unanimous conclusion that the prize be awarded for his essay."

Power Forecast Issued

Coincident with the award of the $10,000 prize, directors of the American Superpower Corporation made public a three-year forecast based on operating statistics. The companies supplying this information represent about 30 per cent of the entire industry in the United States.

These companies estimate that their aggregate electric sales in kilowatt hours in 1932 will total 27,780,860,832, compared with actual sales of 22,193,586,653 in 1929, a gain of 23.3 per cent; that their gross revenue in 1932 will total $606,364,170, against their actual revenue of $491,544,093 in 1929, an increase of 21.7 per cent; that their gross income (after operating expenses) in 1932 will aggregate $388,503,674, compared with actual income of $310,268,962 in 1929, an increase of 23.2 per cent; that their customers at the end of 1932 will total 6,185,234, against the actual number of 5,429,474 at the end of 1929, a growth of 13.3 per cent; that the maximum demand in kilowatt hours will reach 7,449,300 in 1932, or 23.6 per cent above the 1929 figure of 5,933,401, and that population served in 1932 will total 29,054,216 in contrast with 27,306,701 last year, a gain of 6.3 per cent.

Renovating the Original Mother Church

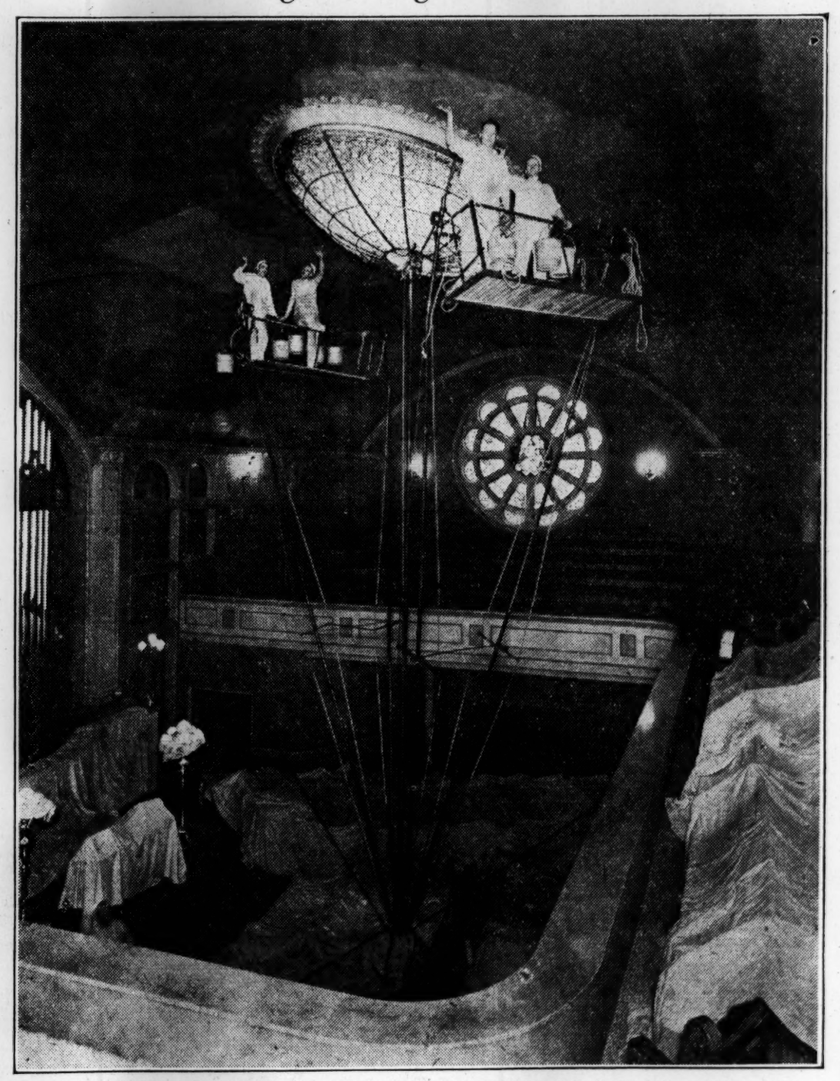

Photo Shows Workmen Engaged on Redecorating the Ceiling by Means of an Unusual Arrangement of Derrick and Booms.

Original Mother Church Cleaned by Inverted Derrick and Booms

Success of the inverted derrick with swinging booms which made possible the cleaning and redecorating of the dome of the extension of The Mother Church, The First Church of Christ, Scientist, in Boston, Massachusetts, two years ago, led to adoption of a similar device for renovating the ceiling of the original edifice, built in 1894.

In all respects except size, the new derrick resembles closely the one used for the larger auditorium. It is made up of a central shaft suspended through the center of the ceiling, and guyed with ropes at its lower end to prevent it from swaying. Two arms are fastened to a collar which swings around the lower end of the shaft. These arms reach up to any part of the ceiling, and have platforms on their upper ends which the workmen may regulate.

Like the original derrick, which is now stored in sections above the dome of the extension, ready for future use, the new one made unnecessary the erection of complicated scaffolding. The mechanism was installed in a few hours and the entire cleaning process completed in less than a week. Oliver H. Reeves of Boston, inventor of the device, supervised the construction and installation of the smaller derrick, just as he did when the first one was developed.

The total weight of the new derrick is 1600 pounds, compared with the approximate 10 tons of the original one. Instead of structural steel booms, the smaller derrick has arms made up of tubing and reinforced with light steel cables. Adjustment of the platforms, requiring the use of electric motors in the large derrick, is accomplished by hand in the smaller one.

A winch at the top of the central shaft is employed to raise and lower the collar which holds the arms in place. Raising the collar spreads the arms out to a wider radius, just as an umbrella may be opened or closed by sliding a collar along its central shaft. The arms may be extended to reach the space above the organ, or over the rear balcony.

Since the building is rectangular, and has balconies on the sides and rear, from which ladders may easily be used to reach parts of the ceiling, the derrick is used primarily for the center of the ceiling, which could not be reached by use of ladders.

The derrick is stored in sections in the loft of the building, and may be assembled quickly for future use.

More and Cheaper Crops Now Favored

SPECIAL TO THE CHRISTIAN SCIENCE MONITOR

MOLINE, Ill.—"Permanent prosperity for American agriculture cannot be built on a program of restricted production," declared Wheeler McMillen, associate editor of Country Home and author of "Too Many Farmers," recent volume on agricultural problems, before the American Society of Agricultural Engineers, at its annual meeting here.

The surplus of agricultural products is not the result of too great a supply, but of too high a price to make possible purchases equaling the supply, Mr. McMillen said.

All non-perishable crops are eventually consumed, he said, so the surplus does not result from too large a food supply but because there are not enough consumers who can purchase at the price demanded. The problem is not to produce less, but to produce more at a cheaper cost.

Ira Marshall, of Hardin County, Ohio, who holds the record of 176 bushels of corn grown per acre, told the agricultural engineers of his methods of using machinery, good seed, and fertilizer to produce corn at a cost of 20 cents per bushel, compared with the state average of 60 cents.

'Chicken Express' Traffic Dominates Lines From Bulgaria to Switzerland

Poultry Trade an Important One, and Three Trains Weekly Have Right of Way in Carrying Its Produce From Sofia to Heart of Europe

SPECIAL TO THE CHRISTIAN SCIENCE MONITOR

DRAGOMAN, Bulgaria—"Clear the track for the chicken train" is what a good many of the Balkan locomotives are whistling these days as they speed toward western Europe, for international arrangements have been made whereby three trains each week go directly from Sofia, the capital of Bulgaria, to Switzerland, in order to carry Bulgarian poultry and eggs to foreign consumers.

They might be called the "Chicken Express" and are given right of way over other freight trains. If you happened to be at one of the stations when the chickens passed they would impress you as thoroughly enjoying their first trip abroad. Although they don't travel in sleepers, their cars are equipped with 10 berths, one above the other, and with windows. And special windows at that. In all the other cars in southeast Europe the windows are supplied with whole clusters of signs saying in not less than six languages, "Don't stick your head out," but none such are to be found in the chicken cars, so from all of the 10 rows of windows protrude the heads of the lucky birds who were clever enough to scramble to the best places.

All the feathered travelers seem to be very talkative and keep up animated conversations. And even though one were not altogether familiar with their language, which would not be strange, since the Balkan languages are not easy to learn, still he could tell at once that the lady chickens are commenting on the things they see along the way and on the wonders that await them, while he would be no less sure that the roosters, from the awful din they are making, must be boasting of the wonderful feat they have achieved in persuading the authorities in half a dozen states to arrange for the installation of this international excursion train for the Bulgarian chickens.

There are more cars filled with eggs than live fowl. One of Bulgaria's chief exports is poultry and eggs. The Minister of Finance once said that it was the Bulgarian hen that stabilized the lev.

WOOLEN MEN ASK BORAH TO CALL FOR AN INQUIRY

Investigation of Foreign and Domestic Costs Sought by Trade

The Carded Woolen Manufacturers Association has written a letter to William E. Borah, Senator from Idaho, commending him on the position he has taken on the "flexible provision" which would equalize the tariff to suit both agriculture and industry and asking him to sponsor a resolution calling for an investigation of foreign and domestic costs of wool and wool products.

The letter, which is signed by Edward Moir, of Marcellus, N. Y., president of the association, and Joseph Randall, of Philadelphia, its secretary, reads in part as follows:

"Standing with you for even-handed justice for both agriculture and industry, we welcome the adoption of your Senate resolution putting the flexible provision of the Hawley-Smoot tariff to the acid test by directing the Tariff Commission to investigate under Section 336 and report at the earliest date practicable on the differences between the domestic and foreign costs of production of the following articles which agriculturists purchase: Shoes, both men's and women's; furniture, cement, hose, shovels, spades, scoops, forks, rakes, scythes, sickles, grass hooks, corn knives and drainage tools. We agree with you that 'if the flexible provision is going to do the wonderful things they say it will let's get it to working.'

"We want these wonderful things done not only on the above articles which the agriculturists purchase, but also on articles which the wool manufacturers and the people generally purchase, namely wool and wool goods. For this reason we ask that you introduce and press to its passage a resolution calling for a like investigation of foreign and domestic costs of wool, wool waste, wool shoddy, wool rags, wool yarn, wool cloth, wool clothing, wool carpets and wool rugs, including the wool now admitted free of duty if used to cover floors, but taxed under this tariff if used to clothe the people."

Dance Music at the Pops

A program of music of the dance lent exceptional interest to the Pop concert in Symphony Hall last night. The list carried the listeners from eighteenth century dances of Rameau (as arranged by Mottl) smack up to a military foxtrot from George Gershwin's musical extravaganza of last season, "Strike Up the Band." Or, if we are to accept Erik Satie as an authentic representative of ancient Greece, we may say that Mr. Fiedler's history lesson began with Sparta; for the "Gymnopédie" No. 1, in the Debussy arrangement, was also included if some old-fashioned persons derived greater pleasure from Rameau than from Gershwin, there were more auditors, to judge by the applause, who preferred the tang of jazz. But everybody, apparently, agreed about the suite of dances from Stravinsky's "Pétroushka," Ponchielli's "Dance of the Hours," and (of course) Ravel's insidious "Bolero." How the musical world got on at all before Ravel gave it this extract of sure-fire stimulant it is difficult to recall. There were also to be heard the Polonaise from "Eugen Onégin," Grainger's "Molly on the Shore," Strauss's "Tales from Vienna Woods" and Gade's Gypsy tango, "Jalousie." The men played with admirable verve, and the large audience applauded as heartily as though the Pops season were beginning, instead of nearing its close.

Subway Extension One Step Nearer

Work of extending the Boylston Street Subway and the elimination of much of the traffic congestion at Governor Square was brought one step nearer June 19 when after a hearing the members of the State Public Utilities Commission affixed their signatures to the plan of the project. The commission will at once issue an order approving the plan.

The Boston Elevated Railway Company was represented at the hearing by H. Ware Barnum, counsel for the trustees, while Col. Thomas F. Sullivan of the Boston Transit Department represented the city. Mr. Barnum told the commission that the trustees were satisfied and that the directors had accepted the act passed by the Legislature this year.

The commission was informed by Mr. Barnum that the directors would not authorize the trustees to enter into the contract until the plan was approved. Henry C. Attwill, chairman of the commission, asked William F. Keefe, chief engineer, if the plans satisfied him. Mr. Keefe said that they did. With this statement the commissioners signed the plans for approval.

Beacon Oil to Have Wage Adjustment

To match employee's loyalty with employer's appreciation, the Colonial Beacon Oil Company announces that it has worked out a system of wage adjustments, industrial representation and workers' benefits which will apply to its 3000 employees in New England and New York and become immediately available.

The plan, patterned after that operated by the Standard Oil Company of New Jersey, includes the decision to pay as a minimum the prevailing scale of wages for similar work in each community; to give the lowliest member of the organization equal opportunity with the highest in presenting any grievance before a committee of executives and fellow workers for solution, and to institute a system of benefits which should care for almost any contingency in the employee's experience.

Among the protective measures embraced in the benefit plan is the decision to grant a pension to those who have been with the company for 20 years and have reached 65 years of age, this pension to be based on 2 per cent of the salary for total years of service.

CHESNEY RESIGNS AS CHAIRMAN

PITTSFIELD, Mass. (AP) — Cummings C. Chesney, vice-president in charge of manufacturing for the General Electric Company and formerly manager of the Pittsfield works, has resigned as chairman of the manufacturing committee, it was announced June 19 by President Gerard Swope. He will be replaced on July 1 by W. R. Burrows of Schenectady, N. Y.

YALE ENRICHED BY COLLECTION OF EARLY AMERICANA

Endowment to Enable University to Give Traveling Exhibitions

SPECIAL TO THE CHRISTIAN SCIENCE MONITOR

NEW HAVEN, Conn.—An endowed institute to enable Yale University to give traveling exhibitions of its extensive collections of early Americana has just been established by Francis P. Garvan, New York attorney and former Assistant Attorney-General of the United States.

Mr. Garvan recently gave Yale University his extensive collection of early American art and craft masterpieces which are on exhibition in Annapolis, Andover, the Pennsylvania Museum of Art, the Johns Hopkins University and at Williamsburg, Fredericksburg, Charleston and Yale. The full text of his letter, offering the gift to the university as a memorial collection for his wife, Mabel Brady Garvan, discloses the plan to establish the American Institute of Arts and Crafts.

The fund with which the Institute is endowed was not made public, but it is to provide for curators of the collection and for lectures on early American arts and crafts.

Dr. Everett V. Meeks, dean of the Yale School of Fine Arts, characterized the gift as a "vital move forward in American education." Mr. Garvan specified that the collection, valued at several millions of dollars, should not be "selfishly hoarded" in the walls of one institution. He hopes that his plan will enable the collection to "become a moving part in a great panorama of American arts and crafts which, under the leadership of Yale University, shall be made to pass over the years before every man, woman and child in our country."

The collections include American silver, prints, furniture, pewter, china, crockery, coins, glass, iron and other metal work. Those which are on exhibition as loans from Mr. Garvan will continue to remain at the various museums and historic shrines although the ownership passes to Yale University. Mr. Garvan said that he expects his children to continue to make contributions to the collections.

SWEDISH ARCHITECT WINS HOWLAND PRIZE

NEW HAVEN, Conn. (AP)—Ragna Osteberg, Swedish architect, has been announced as the winner of the John Howland Memorial prize, awarded every two years by Yale University for outstanding work in art, science or literature.

Mr. Osteberg is a resident of Stockholm and a professor at the Royal Art Academy in that city. In 1926 he was named royal gold medalist at the Royal Institute of British Architects. Outstanding among his works is the Stockholm town hall, an adaptation of Gothic and Romanesque architecture. Mr. Osteberg is expected to visit New Haven some time in the next college year to receive the award.

ARBELLA TO BE OPEN TO BOSTON VISITORS

The Arbella sailed from Salem Willows June 20 at 6 a. m. for the Atlantic Works in Boston where the masts will be taken down to allow the vessel to go beneath the Cambridge Bridge in the Charles River, after which the masts will be replaced.

She will lie in the Charles River all summer and will be accessible to visitors. A scow will make trips to and from the vessel.

NEW ENGLAND STATES DISCUSS CO-OPERATION

SPECIAL TO THE CHRISTIAN SCIENCE MONITOR

KINGSTON, R. I.—Opportunity awaits farmers who avail themselves of the benefits offered by the coöperative organizations in the New England states fostered by the Federal Farm Board, acording to Charles S. Wilson of that group, who addressed the fourth annual New England Institute of Coöperation, meeting in the Rhode Island College here June 18-21.

The institute was called for the discussion of agricultural problems by officials of the Federal Government and specialists from all the New England states. Mr. Wilson's address was followed by a talk by W. I. Myers of Cornell University, who has been making an investigation of coöperative marketing in the northeastern states.

Lend-a-Lift Fares Legal, Says Attwill

If automobile owners desire to reduce the running expense incident to the operation of their cars by taking friends back and forth to work with them, at a small charge, there is nothing in the law to prevent such action, in the opinion of Henry C. Attwill, chairman of the Department of Public Utilities.

Chairman Attwill was discussing the complaint of A. E. Myers, manager of the Chelsea division of the Eastern Massachusetts Street Railway Company, that the business of his company is injured by the practice of workmen carrying their fellows back and forth daily.

Mr. Attwill explained that the State has jurdisdiction only over common carriers and in his opinion the auto owners in question cannot so be classified. A common carrier is one, he said, who holds himself out to the general public as being in the transportation business and conducting a line which has fixed termini.

MUSEUM CURATOR RESIGNS

SPRINGFIELD, Mass. (AP) — Miss Eleanor A. Wade, curator of the Springfield Art Museum since it was opened to the public 35 years ago, is to leave her position at the end of the summer. Miss Cordelia C. Sargent, long assistant curator, is likely to succeed her. Desire for travel and recreation actuates her resignation.

WARNING VOICED TO AGRICULTURE OF NEW ENGLAND

Must Keep Step in March of Co-operative Marketing, Institute Is Told

SPECIAL TO THE CHRISTIAN SCIENCE MONITOR

KINGSTON, R. I.—New England farmers can expect radical national changes in marketing farm products and must be prepared to "play the game" with the rest of the country in whatever program is found advisable.

This was the viewpoint expressed by J. C. Kendall, director of the extension service and experiment station of the University of New Hampshire, in a statement to the fourth annual New England Institute of Coöperation here.

"It seems to me New England agriculture has no right to expect special favors from the Federal Farm Board," he pointed out in his discussion. "If the law should be changed slightly, as laws have been in the past, assistance might well be given to our large purchasing coöperatives. Whether or not this is done, however, it is reasonable to expect that buying coöperatives should deal in close relationship with selling coöperatives. Already the Farm Board has shown a most sympathetic consideration of this situation and we can no doubt expect this to continue.

"Further than that, we are, of course, directly interested in the proposals to form national selling coöperatives of milk and apples. The large regional coöperatives already formed to handle dairy products in the West are a big step in this direction. New England has keenly felt the competition of the middle West on butter, and has had very largely to succumb to it. If a national milk pool is formed, I cannot see how New England can afford to remain outside.

"Similarly with apples. We know that a great deal more could be done for apples through national advertising than has been done. This means a big national association. The Farm Board has already recognized New England's interest in this matter by holding meetings in Maine this very week. To a lesser extent we are, of course, interested in the national wool pool already under way.

"The farmers of the nation have their chance through the Farm Board to achieve control of their products. They should not hesitate to take advantage of the opportunity offered."

Museum Shows Colonial Portraits as Contribution to Tercentenary

As its contribution to the observance of the Massachusetts Bay Tercentenary, the Boston Museum of Fine Arts has placed on view a remarkable collection of 100 colonialy portraits. They were loaned for the occasion by semi-public and private New England collectors and have been assembled with the greatest care and discrimination as being representative of the period they recall.

Among them are some of the first portraits painted in New England of the great figures who made its colonial history. In the days when some of the best were done, their authors were known, not as portraitists but as "limners" and they came from England and Ireland and Scotland, and set up their easels in the homes of whoever they could get to sit for them and painted some of the most beautiful portraits to be found in the whole history of this branch of the fine arts.

The Robert Feke portrait of the Royall family is probably the first painting made of a family group in America. It is loaned by the Harvard Law School and is of five figures including that of a young baby, in itself an interesting and unusual example of the work of the period, since it seems to have been a time when babies were emphatically absent when the limner was in the house.

The painting of the Winslow family by Joseph Blackburn, loaned by Mrs. George S. Winslow, is another family portrait and a very interesting one. Blackburn also painted Theodore Atkinson Jr., in a "walking pose" of much animation and interest. Peter Pelham, who was the stepfather of the famous Copley, painted Samuel Shute with great success, and those who have studied Copley's work will appreciate that he learned a great deal from Pelham about painting.

Smibert, the Scottish painter, did Mary and Samuel Pemberton, and in the portrait of the lady his work shows up with unusual excellence.

The list is long, and the excellence of the portraits is so conspicuous, withal so varied, that space does not permit a cataloguing of it. Among the portraits which should not be overlooked are those of John Hancock, Moses Gill, Richard Dana, Paul Dudley, and Mrs. Jeremiah Dummer. The exhibit was especially arranged by Frank Bailey of the Copley Galleries upon the suggestion of the Boston Tercentenary Art Committee.

Twenty-Eight Scenes of Medford's Early Life to Be Given in Pageant

Three hundred years of history in Medford are to be pictorially summed up on the Brooks estate in Grove Street, Medford, June 23, 24, 25, 30, and July 1 and 2 under the supervision of Frank D. Neill, city chairman; Charles T. Daly, secretary, and Bernard Cassidy, assistant secretary.

The outstanding aspect of Medford's tercentenary observance will be, "The Pageant of the Mystic," with 20 scenes depicting factors with which the first settlers of the town had to contend, the colonial period activities, and the commercial period, which saw the introduction in the eighteenth and nineteenth centuries of three transportation methods.

A scene has also been arranged as a tribute to the memories of Daniel W. and Samuel C. Lawrence, participants from Medford in the Civil War.

The Brooks estate, upon which the pageant will be staged, has been in the continuous ownership of the Brooks family since 1660. The first owner was Thomas Brooks who came from England in 1630 in company with Saltonstall and Winthrop. Thomas Brooks never lived in Medford himself, but the first of the Brooks homes was occupied in 1679 by his son Caleb.

Amplification of voices for 2800 people taking part in the pageant will be arranged so that the thread of the pageant story shall not be lost.

The pageant opens with choral music and the stirring of activity in the Indian village. The scene is interrupted by the appearance of Myles Standish and his men from the river. Then follows a scene laid in England where Matthew Cradock is seen receiving a charter from King Charles. Thence the story proceeds through various interesting sequences in Medford's history; not the least interesting of which is the one dealing with the canal transportation innovations, the first railroad thereabouts and the subsequent closing of the canal.

FIRE CHIEFS TO MEET

SPECIAL TO THE CHRISTIAN SCIENCE MONITOR

RUTLAND, Vt.—The eighth annual convention of the New England Association of Fire Chiefs will be held here June 24 to 27. Gov. John E. Weeks will be one of the speakers at the first day's session. Demonstrations and exhibits will make up the program for the second day. The third day will be devoted to speeches and the closing day to business and election of officers.

EVENTS TONIGHT

Hotel Statler; dinner, White House Confectioners, 6:30.

Here we will answer the question, "Why are fuses used and what should one do if a fuse 'blows out?'" The next advertisement will appear in two weeks.

• WHY •
FUSES
ARE NECESSARY

Fuses are protective devices used to interrupt the flow of electricity when trouble occurs on an electrical system.

When a fuse blows out, it means that a circuit has been overloaded . . . Any one of the following agencies may be the cause: Defective Appliances, Frayed Extension Cords, Faulty Switches, Short Circuit in Wiring System, Defective Lighting Fixtures. It is very important that the source of trouble be discovered—and corrected—before a new fuse is inserted. Using a larger size fuse will not correct the trouble.

In some cases, the cause can be found and remedied, and a new fuse can be inserted by the householder. Spare fuses should be kept on hand for this purpose . . . (The Boston Edison Company—through any of its offices—will supply its customers with new plug-type fuses of standard sizes in exchange for ones which have burned out.)

If the cause of a blown fuse is not readily found, there is an Edison Troubleman, always on duty in your locality, who will respond to your telephone call and locate the trouble . . . Call him, when necessary, either at his local headquarters or at GARrison 2600. His services are free to customers of this Company

MONROE POLICY TERMED STANCH ALLY OF CANADA

McGill Law School Dean Lauds Border Peace at Chicago Institute

SPECIAL FROM MONITOR BUREAU

CHICAGO—Canada and the United States have "acquired a settled habit of peace" which is fundamentally based on justice, Percy Elwood Corbett, dean of the Law School of McGill University at Montreal, pointed out at the Institute of International Relations at the University of Chicago.

The Monroe Doctrine of the United States has served to give Canada a greater sense of security, Dean Corbett said. While there are differing views in Canada of the Monroe Doctrine, he declared he could not escape the conviction that the traditional policy of the United States in regard to non-American intervention in this hemisphere was more than ever important to Canada.

"One hears less nowadays in Canada about the Monroe Doctrine than in 1909," he reminded. "The reason, I believe, is that Canadians think a great deal less than they did then in terms of conflict. That is true, we trust, of most civilized countries; but it is particularly true of Canada. There is no people, I believe, with a firmer confidence in peace. We are throwing more weight into the work of organizing peace than at any time since the war.

"Confidence in the growing efficacy of international organization, an unthreatened geographical position, these go a long way to explain our sense of security. But, somewhat unwillingly, I have come at last to the conclusion that the great strength of the United States and the likelihood of their preventing encroachments from outside have something to do with our state of mind and with our refusal to arm.

"For it does seem to me highly probable that the United States would be bound to view with profound misgivings any displacement of the control of the enormous territory to the north of them, and that those misgivings would prompt action tending strongly to maintain the status quo.

"Logically, perhaps, if we count upon the power of the United States as in some measure a final guarantee of the opportunity for peaceful development, we should view with disfavor any agreement limiting or reducing American armaments. In actual fact, the contrary is the case. We have welcomed every sign of willingness on the part of the United States to reduce her navy and should welcome further signs.

"The main reason for that is that while we prize security, we also prize our connection with Great Britain, and we see in any possibility of a naval race between the two countries the nearest approach to a risk of war between them."

Dean Corbett said that the prospect of the United States entering the World Court gave Canada great satisfaction. It entailed progress, as viewed in Canada, toward fairly complete machinery of arbitration between Canada and the United States.

BECK HALL, SOLD UNDER RED FLAG, BRINGS $161,500

(Continued from Page 1)

and hurried back, away out of sight in Quincy Street.

The auctioneer Augustus Litchfield of Waltham first invited the auction audience into a sitting room walled in teak; a Japanese prince, he said, had lived there. The auctioneer had a Gladstonian air, and he invited people to come into the room as if it were his own drawing room, and he read them a brief history of Beck Hall.

A little thread of sentiment was in his voice; could it be that the hard business of auctioneering was to be silvered with the emotions people are able to conjure up over places that have housed men who became great?

The Bidding Begins

But the crowd, which couldn't have numbered 100—a curious commentary on the things passing time does to modify glamour—was a little too large for the teak-lined room, and so the auctioneer led it out into the narrow, gloomy corridor. A gentleman named Davis, representing the present holders of the property, the Beck Hall Trust, described such things as mortgages, amortizations, division of parcels and so on. A firm voice from the rear of the crowd raised pernickity questions. The auctioneer, with his Gladstonian cast of feature and his Gladstonian collar and his polished poise, suddenly at 4:25 p. m. changed his voice to the typical auctioneer's roar and opened the bidding. At 4:27 p. m. a small, neat man almost whispered $150,000.

The auctioneer misunderstanding him, expressed anguished amazement at what he took to be a bid of $100.

The little man corrected him in a soft voice. "$150,000," he said, simply, smiling a very little indeed.

The auctioneer fell to business. Here was property with mortgages for $140,000 on it. Here was a man willing to give $150,000 for the building alone, with all its tradition (the adjoining land to be sold separately and, at the last and according to the curious way of such things, then building and land together. Bidding was slow, and lay between two men of even size, and even softness of voice. The first bidder raised his bids successively by the simple device of standing directly in the auctioneer's line of vision and nodding his head when the "do I hear" of the auctioneer raised the bids $1000 at a time.

Woman Bids $160,000

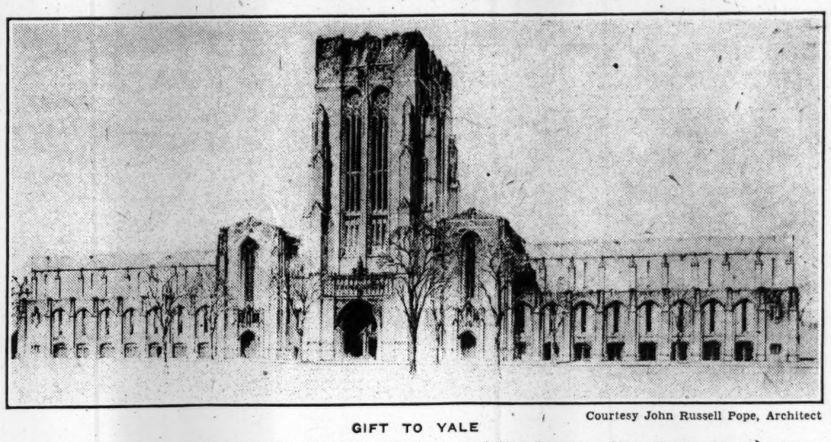

A woman in white suddenly projected herself briskly into the bidding, trailing along to $160,000. A woman with sharp, clear eyes, leaning in her white dress against the dark wall. The few women there gazed with wonder at her. She stopped at $160,000 and the auctioneer couldn't move her. The second bidder said $161,000. The first bidder said $161,500, and it went very quickly to him at that figure.

No, he really wasn't prepared to say what was to be done with the property. Building torn down? Apartment? Garage? Remain standing? Well, the first of the week he would say something. His quiet voice was occupied with the monosyllables he considered necessary to state his position. A quiet man, come from the wool district, with brilliantly polished tan shoes, and a dark suit, and never a flicker of an eyelash as he prepared to spend more than $150,000 which many men go through life without ever understanding as a sum of money.

The little crowd melted away. A sudden thunderstorm clapped and flashed about the building. Photographers dashed at the little man who attended to their wants unruffled and disappeared with perhaps no one to say which way he went.

And so Beck Hall, in which Morgans and Astors and Iselins and Roosevelts and Japanese princes and members of the peerages of European and Asiatic countries have lived, was knocked down for $161,500 and the auctioneer had his picture taken under his flag that was wet with rain now, and the crowd disappeared, leaving Beck Hall to await the disposition of James T. Thurman.

Three-Towered Gymnasium

Courtesy John Russell Pope, Architect

GIFT TO YALE

Presented by Mrs. Payne Whitney, Her Son, John Hay Whitney, and Her Daughter, Mrs. Charles Shipman Payson.

Payne Whitney Gymnasium at Yale to Consist of Three Distinct Units

SPECIAL TO THE CHRISTIAN SCIENCE MONITOR

NEW HAVEN, Conn. — Complete plans for the Payne Whitney gymnasium at Yale University, the gift of Mrs. Payne Whitney, her daughter, Mrs. Charles Shipman Payson, and her son, John Hay Whitney '26, were announced June 20. Work on the gymnasium, to be located on the west side of York Square, will begin in a few weeks.

The building will consist of three units, each having a distinct function. The central or tower unit to house regular working activities of the various departments will contain the trophy room, main entrances, ticket offices for the exhibition pool, and amphitheater units.

The west unit will contain the exhibition swimming pool, 75 by 42 feet. Also seven 6-foot racing lanes. Around the pool will be a gallery for 2440 spectators.

The east unit will contain the amphitheater with floor space 95 by 125 feet. There will be space for a full size tennis court or a full size basketball court. Two practice basketball courts can be installed crossways.

A student entering the gymnasium may go directly to the first mezzanine floor to enter the dressing room or one of the four locker rooms located on this and the floor above. From his locker room he goes to the working pool, the rowing rooms, the squash and handball courts, and any other part of the gymnasium without passing through public corridors.

The body building and corrective gymnasia will be grouped on the third floor. Also, the gymnasium director's office and the examination and photography department. Two standard size basketball courts will be provided.

A total of 29 standard squash racquet courts will be constructed, complying with the latest regulations of the United States Squash Racquet Association. Four of the courts will have spectators' galleries.

A wrestling room of 62 by 65 feet floor area for mats will occupy the fourth floor. A fencing room 62 feet by 65 feet will be located on the fifth floor, with space for 24 fencing mats. The boxing room, 62 feet by 65 feet with spectators' gallery, will be located on the sixth floor, and here three standard-sized rings are to be erected. The remainder of the room will be used for punching bags, dummies and rope skipping.

The rowing rooms, located at the basement level with a gallery at the first floor level, will contain rowing machines and a tank in which a full size shell will be suspended. A mechanical apparatus for propelling the water past the boats at any speed up to eight miles and hour will be installed.

The building was designed by John Russell Pope of New York City.

Drys Preparing for Stern Fight

The Woman's National Committee for Law Enforcement, which has headquarters at 919 Metropolitan Building, Boston, announces the issue of two booklets on prohibition for summer reading. Regarding them, it says:

"'Brewers and Billionaires' conspire against the working classes. Circulate this widely to show why certain rich men have allied themselves with the brewers through the Association Against Prohibition to defeat the Eighteenth Amendment. Price 15 cents a copy, 10 copies for $1.

"The second book is 'What's It All About?" by Rose Weston Bull. Eighty pages, written in a clever journalistic style, giving the reasons for prohibition and the reasons for the attacks against it. Price 25 cents per copy, five copies for $1.

"Get these and distribute them widely this summer, looking toward the most terrible fight that we have had to face in November in many of our states against the old conspiracy of outlawed liquor interests reinforced by rich men who have their special reasons for defeating this great and good law."

New Haven Hearing Goes to Providence

The introduction of confidential correspondence between New York, New Haven and Hartford Railroad officials and the Seaboard Air Line was the means taken by the Colonial Navigation Company to support its contention that the operation of Long Island Sound steamship lines by the New Haven was being practiced to the restraint of competition, at the hearing before John Howell, Interstate Commerce Commission Examiner, at the Chamber of Commerce, Boston, June 19.

Three letters presented at the hearing concerned the chartering of the steamer State of Virginia to run between Providence and New York under the Colonial Company banner. Other letters from the Seaboard Air Line were introduced to indicate that had the Seaboard Line known the Colonial was a competing line, it would not have chartered the vessel.

J. Howell Gardner, president of the New England Steamship Company, a subsidiary of the New Haven, testified that he had recommended in a report that the Bay State Line be discontinued as it duplicated the service of the Providence Line.

The hearing will be continued in Providence June 21, where about 60 shippers will testify.

BIG FOREIGN COPPER SALES

Foreign sales of copper totaled 10,000,000 pounds Thursday at 12.30 cents, c. i. f. Hamburg, Havre and London, and constituted the largest day's sales since the middle of May.

Silver Spoon for Swarm of Bees in June Too Low Pay, London Volunteer Finds

BY RADIO FROM MONITOR BUREAU

LONDON—"A swarm of bees in June is worth a silver spoon," an old "saw" says, but Ernest Melrose, who took a swarm from an electric light standard on one of London's busiest thoroughfares, Oxford Street, June 18, thinks it ought to be worth much more after all trouble he had getting it.

Mr. Melrose was on the omnibus when he saw a swarm which so many people were watching that traffic was held up. Being an expert beekeeper, he asked a policeman's permission to take the swarm, but the policeman warned him that he might be summoned for obstructing traffic, while if he climbed the lamp post he might also be summoned for damaging it.

So Mr. Melrose went to the inspector at the police station who telephoned the electric company which sent a special platform on which Mr. Melrose mounted. He then swept bees into a cardboard box.

The Daily Herald, which reports the story, says that when Mr. Melrose came down again he found hundreds of bees inside his coat and trousers and up his sleeves. Swarming bees, however, seldom sting, and only one of them stung him. The captured swarm has now been sent to a bee farm in the country after being offered to the Zoological Garden which, however, declined the gift on the ground of lack of suitable accommodations.

Mrs. Rogers Sets New Style for Congress

WASHINGTON (AP) — Washington's well-known warm weather June 19 caused inauguration of a new feminine fashion on the floor of the House.

Edith Nourse Rogers (R.), Representative from Massachusetts, wore a smock for a frock. It was black with white collars, cuffs and pocket-facing, trim and neat, although informal.

Mrs. Rogers, proud of the smock, explained it was made by four sixth-grade school girls of Lowell, Mass., her district.

DR. MOTT SPEAKS TO COUNCIL

NORTHFIELD, Mass. (AP)—Dr. John R. Mott of New York, chairman of the World's Missionary Council, in an address June 19 before the Evangelism Commission of the Federated Council of Churches of America, said that there has never been a time in the history of the church when there was such a rising tide of spiritual awakening throughout the eastern world.

BARRILE For 25 Years Specialists in the Manufacture of Custom-Made Upholstered FURNITURE

Gratify Your Taste for Beautiful Furniture

You will find that the furniture in our show rooms is within the reach of your budget. Think of the joy of owning these luxurious chairs and sofas.

Have Your Own Choice of Style and Fabric

Each piece is made to your individual order and is an example of the finest craftsmanship, made honestly, unhurriedly, without compromise, even to the smallest detail.

REPAIRING

The facilities of our large, well equipped factory are available for all types of furniture repair work. No job is too small or too large.

Excellent time to do it now while you are at your summer home.

Dainty English Quality Biscuits—
Now Americans no longer import them

THE traditional English "biscuits" are tender little cakes, made of selected milk and eggs, clear, amber honey, a variety of carefully blended flours, and enriched with nature's most delicate flavors.

Now they are baked in America by Weston, in English ovens, according to the traditional recipes. *You buy them at your store for but a trifle more than you have been paying for ordinary "little cakes" or crackers, and for much less than you pay for imported biscuits.*

Weston's English Quality Biscuits are offered in an attractive red-and-blue package called A Selected Assortment . . . also in a smaller package containing only the particular kind you favor most. If you prefer, you may buy them in bulk. Weston Biscuit Corporation, Toronto, New York, Boston.

SELIGSON WINS FROM M. J. BAYON

Eastern Intercollegiate Tennis Singles Reach the Semifinal Round

SPECIAL FROM MONITOR BUREAU

NEW YORK—Four universities, two in the East, one in the South, and one on the Pacific coast, will fight out the Eastern Intercollegiate championships over the week-end, on the grass courts of the Crescent Athletic Club, as the result of play June 19. Lehigh University, represented by Julius Seligson, is only in the singles, while Columbia University, with David N. Jones and Raymond Stone, in the doubles, and the former in the singles; Tulane University, New Orleans, with Clifford S. Sutter and Maurice J. Bayon in the doubles and Sutter in the singles, and the University of California at Los Angeles, with Leonard M. Dworkin in the singles, and Clifford Robbins and Elbert R. Lewis in the doubles, are still in the ranks. Sutter and Bayou are now in the finals of the doubles, while the singles and the other teams in the doubles are to play their semifinal matches June 20.

Seligson, the newly crowned metropolitan champion, made the most impressive appearance of any of the winners in the fourth round matches June 19. Encountering Maurice Bayon, the stocky New Yorker had the upper hand all the way. Only at the start, with the advantage of service, did the Tulane player lead in games. Seligson also showed good work in net play in this match, not remaining altogether at the back line, as in his recent matches. The score was 6—3, 6—2.

David N. Jones, the Columbia oarsman and tennis player, was also impressive against Elbert Lewis, and used his height and reach with fine effect at the net, to win by the same score. The proceedings were reversed in the other match between the east and west, as Raymond Stone, of Columbia, was not able to make much of a stand against Leonard Dworkin, and only the occasional streak of wildness of the Californian made the match close, the score being 6—4, 6—3.

The hardest fight brought Clifford Sutter, the Tulane star, against Clifford Robbins, and here the result was in doubt to the very end, as each in turn gained some slight advantage. But finally Sutter managed to break through the service of the Californian once in the first set, to win it at 6—4, and twice in the second, after trailing at 2—4, to take the match at 7—5. Robbins' chops did not seem to bother Sutter, and the latter was more effective when it came to placing his shots.

Jones and Stone, following their singles play, went on to play the Stanford University pair, Harry L. Plymire and Theodore Easton, and with Stone playing far better in doubles than in singles, won in straight sets, 6—3, 8—6. They will meet Robbins and Lewis for entrance into the finals.

In the other semifinal, Stanley J Harte and Walter Swaybill, of New York University, made a fine stand against the Tulane pair, but an occasional weakness at the net, especially in the first and last sets, allowed Sutter and Bayon to take the match at 6—3, 6—4, 1—6, 6—1. In the second set, the local pair ran their score up to 4—2, only to lose four games in a row for the set. The summary:

EASTERN INTERCOLLEGIATE TENNIS CHAMPIONSHIPS

SINGLES—Fourth Round

Julius Seligson, Lehigh, defeated Maurice J. Bayon, Tulane, 6—3, 6—2.

David N. Jones, Columbia, defeated Elbert R. Lewis, U. C. L. A., 6—3, 6—2.

Leonard M. Dworkin, U. C. L. A., defeated Rayond Stone, Columbia, 6—4, 6—3.

Clifford S. Sutter, Tulane, defeated Clifford Robbins, U. C. L. A., 6—4, 7—5.

DOUBLES—Second Round

Harry L. Plymire and Theodore Easton, Stanford, defeated Sidney Seligson and Sidney Berger, New York University, 6—4, 6—1.

Third Round

Stanley J. Harte and Walter Swaybill, New York University, defeated Joseph De Fina and Julius Tavalin, St. Johns, Brooklyn, 6—3, 6—2.

David N. Jones and Raymond Stone, Columbia, defeated Plymire and Easton, 6—3, 8—6.

Semifinal Round

Clifford S. Sutter and Maurice J. Bayon, Tulane, defeated Harte and Swaybill, 6—3, 6—4, 1—6, 6—1.

KANSAS STATE GIVES 35 VARSITY LETTERS

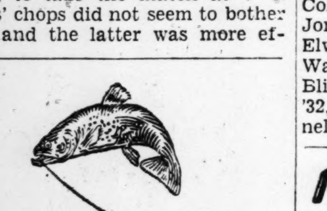

SPECIAL TO THE CHRISTIAN SCIENCE MONITOR

MANHATTAN, Kan.—Major varsity K letters and sweaters in track and baseball were announced by M. F. Ahearn, director of athletics at the Kansas State Agricultural College, following approval of the awards by the athletic board.

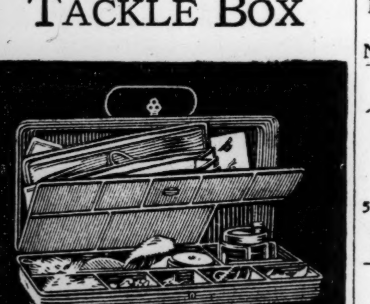

Fourteen members of the baseball squad, which tied with University of Oklahoma for the championship of the Missouri Valley Intercollegiate Athletic Association, won awards. Seven of these are graduating. Twenty-one track men, a majority of them sophomores, won awards.

Baseball letter winners are: Capt. L. M. Nash '30, E. L. Auker '32, T. E. Doyle '30, T. M. Evans '30, L. C. Fiser '31, Wallace Forsberg '31, A. H. Freeman '30, R. H. McCollum '30, Alex Nigro '31, F. L. Prentup '32, W. R. Peterson '32, Captain-elect William Meissinger '31, H. J. Barre '30, R. A. Bell '30.

Track letter men are: Capt. H. S. Miller '30, Captain-elect Milton Ehrlich '32, O. L. Toadvine '32, E. P. Dutton '32, H. W. Hinckley '32, Marian Morgan '32, E. L. Andrick '31, E. L. Coleman '31, E. J. Skenn '30, J. W. Jordan '32, C. M. Kopfs '31, H. A. Elwell '32, H. O. Cronkite '32, O. H. Walker '31, H. R. Williams '32, Major Bliss '32, E. C. Black '32, J. R. Carter '32, Wallace Forsberg '31, A. D. Fornelli '32.

Izaak Walton would have used This ARMSTRONG TACKLE BOX

ONE glance shows you that it was designed by a fisherman—slips right into your side coat pocket. Plenty of room for all your tackle—no space wasted—as sporty to look at as a Rainbow trout—built to stand the banging around it is bound to get.

As the picture shows, the Armstrong Tackle Box is separated into two main compartments by a hinged partition. One side is divided into 7 convenient compartments, including space for an 80-yard reel. The other gives you ample space for your flies, hooks on cards and larger articles. It is compact and handy, with a pleasing absence of impractical gadgets.

The Tackle Box is stoutly made and galvanized to make it rust resisting, then finished inside and out in Olive Green Duco. Size 11" x 5¼" x 2¼". Price $1.25 at Abercrombie & Fitch, A. G. Spalding and other Sporting Goods and Hardware Stores. If you fail to find it, mailed in U. S. A., prepaid upon receipt of price.

* * *

Another example of ingenuity is The Armstrong Bond Box shown below. A strong vermin-proof and damp-proof container for valuable papers. Price 75c at your hardware store. Or mailed in U. S. A. prepaid upon receipt of price.

Cubs and Reds Win in National League

NATIONAL LEAGUE

	Won	Lost	P. C.
Brooklyn	34	20	.630
Chicago	33	24	.579
New York	29	25	.537
Boston	25	27	.481
St. Louis	26	28	.481
Pittsburgh	24	29	.453
Philadelphia	22	28	.440
Cincinnati	22	34	.393

RESULTS THURSDAY

Chicago 10, Boston 4.
Cincinnati 5, Brooklyn 0.
New York at Pittsburgh (rain).
Philadelphia at St. Louis (wet grounds).

Chicago moved up on the league-leading Brooklyn Robins on June 19, by defeating the Boston Braves in Chicago, 10 to 4, while Cincinnati was taking the Robins, 5 to 0. The St. Louis Cardinals, although they did not play, are now tied with the Braves for fourth place in the National League standing. The Reds remain in the cellar position. Contests scheduled between New York and Pitttsburgh and Philadelphia and St. Louis, were postponed because of rain and wet grounds.

Guy Bush kept the six hits he gave the Braves scattered and the Cubs won the opening game of their series with the Boston club. Of the hits, only two were for extra bases, one a double by Richbourg and the other a home run by Chatham. Harry Seibold was Boston's starting pitcher, but he could do nothing against the Cubs' heavy hitters. The winners scored all of their runs in the first three innings, three being sent across the plate on homers by English, Wilson and Cuyler. Willie Sherdel relieved Seibold in the box and did fairly well for the remainder of the game. Cuyler did the most consistent batting for the Cubs, getting three hits in five times up. Richbourg and Maguire each made two hits for the Braves.

Ray Kolp held the Robins to seven well-scattered hits and enabled the Reds to win the first game of their home stand against Eastern clubs. Kolp was very effective with men on base and would not allow a run to be scored. Adolfo Luque, at one time a member of the Reds, worked in the box for the Robins and did well until he was relieved by Morrison. Curt Walker had a perfect day at bat for the winners, getting four of his team's 11 hits in four trips to the plate. Babe Herman made two hits for the Robins, as did Luque. The scores:

AT CHICAGO

Innings—	1	2	3	4	5	6	7	8	9	R	H	E
Chicago	3	5	2	0	0	0	0	0	x	10	13	1

NEW $6000 GOLF TROPHY

MERIDEN, Conn. (AP)—A $6000 golf trophy of gold and silver studded with diamonds, made in this city, was shipped Wednesday to Indianapolis, where it will serve as a prize in the annual competition between the Indianapolis Athletic Club and the Columbia Club of that city. The trophy, 5½ feet high, is surmounted by the figure of a golfer. Sixty ounces of 14-carat gold and 550 ounces of sterling silver were used in the trophy.

Combination Race Is Won by Harvard

SPECIAL TO THE CHRISTIAN SCIENCE MONITOR

NEW LONDON, Conn—Harvard opened the seventy-eighth regatta with Yale by scoring a victory in the combination crew race, June 19, by a margin of a length and three-quarters in 11m. 40s. The race was rowed downstream over the upper two-mile ourse, instead of the middle two miles upstream as planned.

The race was a particularly strenuous one for the oarsmen, for the tide had changed and they were rowing against it besides a strong upstream breeze. Capt. A. H. Parker Jr. '32, freshman stroke last year, led the beat for the Harvard combination eight and rowed himself out just before the finish. He carried on with motions for the sake of rhythm, but his oar was of no assistance. The Crimson lost some distance through this, but its lead, built up earlier in the race, held Yale off.

In the first 15 strokes from the start at Bartlett's Cove, the Crimson shell shot out to a quarter-length lead and it increased to open water at the mile. At the mile and three-quarters the winners were nearer two lengths ahead. Harvard rowed a beat of about 34 to the minute for the first mile and cut down to 31 for the remainder. The crews:

Harvard—Bow—A. L. Nickerson Jr. '33; No. 2—J. A. Luetkemeyer '33; No. 3—Amor Hollingsworth Jr. '31; No. 4—R. I. McKesson '31; No. 5—A. D. Robertson '33; No. 6—Lawrence Grinnell Jr. '31; No. 7—E. L. Millard Jr. '32; Stroke—Capt. A. H. Parker Jr. '32; Coxswain—T. H. Dickerson '33. Time—11m. 40s.

Yale—Bow—G. C. Church '33; No. 2—F. J. King '33; No. 3—George Munson '32; No. 4—M. W. A. Hunt '32; No. 5—W. W. Walcott '33; No. 6—E. J. Esselystyn Jr. '32; No. 7—A. P. Williams '32S; Stroke—R. S. Auchincloss '32; Coxswain—C. R. Conger 3d, '32.

The waiter's frolic, rowed in the morning, finished in a dead heat as usual, with neither crew crossing the finish line by tradition. The oarsmen were freakishly adorned with colorful clothing and more than one received a ducking in the sedate old Thames River. Harvard's waiters introduced something of a novelty by borrowing a whaleboat from the submarine base and during the race returned the boat to the base and came back in a Crimson launch to follow and encourage the Yale tablemen.

INTERNATIONAL LEAGUE

	Won	Lost	P.C.

DR. LAFLAMME RESIGNS

MONTREAL, Que. (AP)—Dr. "Jerry" Laflamme has resigned as coach of the Montreal Maroons of the National Hockey League, he said June 19. The veteran's coaching skill and diplomacy were held responsible for the success achieved by the Maroons in last winter's hockey campaign. George Weaver, defense player and member of a famous hockey family, is mentioned as a possible successor.

WALKER SIGNS WITH YANKEES

COLUMBIA, S. C. (AP)—Fred Walker, young outfielder with the Greenville club of the South Atlantic League, has been sold to the New York Yankees, Manager Joe Schepner, Greenville, announced here June 19. According to information from Birmingham, the purchase price was $15,000. Walker is scheduled to join the New York team at the end of the Sally season.

HAKOAH LOSES IN BRAZIL

SAO PAULO, Brazil (AP)—The American professional soccer team, Hakoah, lost its first game played in Brazil to a picked Paulista team by the score of 3 to 1 June 19.

CLOSE VICTORY FOR EASTCOTT

Last-Minute Goal Scored by Ewing in Westbury Cup Polo

SPECIAL TO THE CHRISTIAN SCIENCE MONITOR

WESTBURY, N. Y.—The Eastcott team with E. W. Hopping, the father, as the leader, scored a last-minute victory over the highly regarded United States Army team, in the last of the first-round matches in the polo tourney for the third Westbury Challenge Cup, at Meadowbrook, June 19, by a score of 11 to 10. The winners led for the greater part of the game, but were overtaken and tied twice during the last two chukkers, largely through the efforts of Capt. C. A. Wilkinson, No. 1, for the losers. But a drive by Cyril R. Harrison, better known in indoor polo than outdoors, brought the ball close to the Army goal in the last minute of play and though his shot fell short Thomas Ewing Jr., No. 1 for the winners, trying to ride off Captain Wilkinson to permit the shot, was in position for an easy try which settled the struggle.

A second round match, also scheduled for June 19, went over to June 21. The summary:

EASTCOTT	UNITED STATES ARMY
No. 1—T. Ewing Jr.	Capt. C. A. Wilkinson
No. 2—Cyril R. Harrison	Capt. H. W. Kiefer
No. 3—Earle W. Hopping	Capt. D. M. Scott
Back—Dr. J. D. Richards	Lieut. M. McDowell Jones

Score—Eastcott 11, Army 10. Goals—Richards 4, Harrison 3, Hopping 2, Ewing 2, for Eastcott; Wilkinson 5, Jones 3, Kiefer, Scott, for Army. Referee—William H. Gaylord, four chukkers; Capt. Wesley J. White, four chukkers. Time eight 7½m. chukkers.

SHAMROCK V WINS OVER 30-MILE COURSE

BANGOR, County Down, Ire. (AP)—Sir Thomas Lipton's Shamrock V, racing on a triangular 30-mile course under conditions almost identical to those she will face in September at Newport in her challenge for the America's Cup, finished first June 20 in a contest with three of Great Britain's fastest yachts.

The Shamrock was given victory by 12 seconds over the Cambria, which had received an allowance of 8½ seconds per mile at the start.

The other yachts which raced were the Lulworth and the White Heather.

Sir Thomas, who was at home in Belfast, was unable to see the Shamrock V's fine showing.

FIRST THREE LEADERS WIN

Athletics, Yankees and Senators Hold Advantages—Standing Unchanged

AMERICAN LEAGUE

	Won	Lost	P. C.
Philadelphia	36	22	.621
New York	32	21	.604
Washington	33	22	.600
Cleveland	32	24	.571
St. Louis	24	32	.429
Detroit	24	33	.421
Chicago	20	32	.385
Boston	20	35	.364

RESULTS THURSDAY

Boston 4, St. Louis 1.
Philadelphia 4, Cleveland 2.
Washington 3, Chicago 1.
New York 5, Detroit 4.

The three leading teams in the American League won their games on June 19 and the standing remained unchanged. Philadelphia defeated Cleveland by 4 to 2, New York won from Detroit 5 to 4, while Washington took Chicago 3 to 1. In the other game, Boston Red Sox won their fourth straight contest, that from St. Louis, 4 to 1.

At Philadelphia, the Athletics made their hits count to defeat the Indians for the second time and give them their fifth straight loss. The winners were outhit, 11 to 8, but produced the hits when they meant runs. Bob Grove went the entire route for the Athletics, winning his ninth game of the season. He kept Cleveland's 11 hits well scattered and would allow only two runs to score. Hudlin and Jablonowski pitched for the losers, the former being charged with the defeat. Haas and Miller each made two hits for the winners, with Hudlin having a perfect day for the Indians when he also made two hits in as many times up.

The contest between the Yankees and Tigers was featured by Babe Ruth's twenty-second home run of the season, which he made in the seventh inning. This proved to be the winning run, as the Tigers later scored and would have tied the score. Ruth struck out in his first three trips to the plate, but more than made up for it the fourth time. Wells and Gomez worked in the box for the Yankees, the first named being the winner, his fifth victory in six starts. George Uhle pitched the entire game for the Tigers and drove in two of his team's runs with a long triple in the second inning. He later scored another run himself.

With their three new players taking a prominent part, the Washington Senators defeated the White Sox. Alvin Crowder, late of the Browns, held the losers to four scattered hits and one run, to win his first game for his new team. Heinie Manush, who also came from the Browns, helped Crowder by making two hits in three times up. Another newcomer, namely Art Shires, formerly of the White Sox, aided muchly in defeating his former team mates by coming through with three safe hits in four trips to the plate. Joe Cronin hit a triple for the Senators, while Carl Reynolds scored the losers' only run in the fourth inning when he hit a homer. Henry and McKain did the pitching for the losers.

Danny MacFayden gave a brilliant exhibition of pitching and enabled the Red Sox to extend their winning streak to four games. The young veteran held the Browns to three hits and would have shut them out had not Goose Goslin hit a long home run in the ninth inning. One of the other safe hits was also made by Goslin, a single. Chad Kimsey gave the Browns their third hit when he batted for the pitcher and singled. Earl Webb had a perfect day at bat for the Red Sox when he made two hits and drew two bases on balls in four times up. Johnny Heving contributed three hits out of four for the winners. Boston's longest hit was a timely triple by Miller that drove in two runs. Collins, Stiles, and Holshauser pitched for the Browns, the first named being the loser. The scores:

AT PHILADELPHIA

Innings—	1	2	3	4	5	6	7	8	9	R	H	E

DELAWARE SINGLES IN SEMIFINALS

SPECIAL TO THE CHRISTIAN SCIENCE MONITOR

WILMINGTON, Del.—One Pacific Coast player and three representing the East remain to battle for the Delaware state singles tennis championship at the Wilmington Country Club as the result of play here June 19.

Francis X. Shields of New York earned the right to meet J. Gilbert Hall, South Orange, N. J., by defeating Bruce P. Barnes, University of Texas, 6—4, 3—6, 6—3. Hall defeated Eddie Jacobs, University of Pittsburgh, 6—4, 6—4. The Shields-Barnes match was the most interesting of the competition so far, the New Yorker's service proving his biggest asset.

Fritz Mercur of South Bethlehem, Pa., faces Dolf E. Muehleisen, University of California, as the result of his victory over Scott Rexinger, University of Chicago, 6—2, 6—1. Muehleisen defeated Robert W. Ryan of Austin, Tex., and captain of the Yale University team, 6—1, 6—3.

Mercur and Hall gained the final round in men's doubles and will meet the University of California pair, Muehleisen and Robert G. Muench. Mercur and Hall defeated the University of Oregon pair, Stanley J. Almquist and Sherman D. Lockwood, 6—3, 6—3. The Californians defeated Shields and Edward McKnight of Lafayette, 6—0, 7—5.

Marjorie A. Morrill, Dedham, Mass., and Dorothy Andrus, Stamford, Conn., reached the final in women's singles. Miss Morrill had a hard time defeating Mrs. Ary J. Lamme Jr. of Rye, N. Y., at 6—2, 4—6, 6—4. Miss Andrus, however, dropped only one game against Anne B. Townsend of Merion Cricket Club, 6—0, 6—1.

BY RADIO FROM MONITOR BUREAU

LONDON—Although the great drama of the test match at Nottingham overshadowed everything else in first class cricket this week, significant happenings occurred in the English intercounty championship notably the safe arrival of Yorkshire, many times title holder, in the first half dozen places after an early sojourn in the unaccustomed lower regions

The Yorkshiremen did not win their match against Middlesex at Lords, but took chief honors and it's a fair assumption that they would have won but for the curtailment of play by rain. The Yorkshire skipper, A. T. Barber, made a sporting declaration in the second innings that left the home team to score 233 runs in one hour 65 minutes to win. At the abandonment with 90 minutes still to go Middlesex had lost five batsmen for a paltry 43. Yorkshire batted first for 266 and Middlesex's opening total fell 24 short of this. Yorkshire's second innings had produced 208 for six wickets when Barber declared it closed in the hope of dismissing the Middlesex batsmen rapidly and so forcing a last-minute victory.

High scoring had been general this week and it was the outstanding characteristic of Lancashire's game with Surrey at Manchester. The financial proceeds were devoted to the benefit of Richard Tyldesley, famous Lancashire slow bowler, himself absent doing heroic work for England at Nottingham. With J. S. Iddon hitting 136, S. P. T. Eckersley, captain, scoring 74, Lancashire collected 332 in the first knock but even this big total did not earn it a first innings lead for Surrey responded with 381. R. J. Gregory, in splendid form for the visitors, followed up good bowling by scoring 101. The Lancastrians' second innings produced 249 for the loss of four batsmen.

Nottinghamshire, reigning champion, drew nearer the leader of the standing, Lancashire, by defeating Glamorganshire by seven wickets at Cardiff. G. V. Gunn made 114 of 346 with which Nottinghamshire replied to Glamorganshire's 194. At the second attempt the Welshmen made 217, which meant the champion had to score 66 to win—the feat accomplished for the loss of three batsmen.

The only teams besides Nottinghamshire that succeeded in gaining victories were Essex, Kent and Hampshire. The first named beat Northamptonshire 114 runs, Kent routed Derbyshire by nine wickets and Hampshire withstood a determined rally late in the game to beat Gloucestershire by 28 runs.

Hampshire opened the proceedings at Southampton scoring 339, which proved to be 23 more than the visitors could manage. Gloucestershire's captain, B. H. Lyon, had a splendid knock of 132, his fourth century this season. The dismissal of Hampshire by 193 left Gloucestershire men to score 217 in two and three-quarter hours, and they came within 29 of this number, before the last wicket fell. Gloucestershire's second innings score was 188.

"Googly" Bowler A. P. Freeman had a great match against Derbyshire at Tonbridge, and capturing eight wickets for 70 runs in the visitors' first innings of 144, became the first bowler to take 100 wickets this season. Kent scored 171 and then skittled out the opposition for 90 runs and sailed serenely on to victory with 64 for one wicket.

In Essex's match at Leyton the team scores were Essex 189 and 234, Northamptonshire 96 and 213.

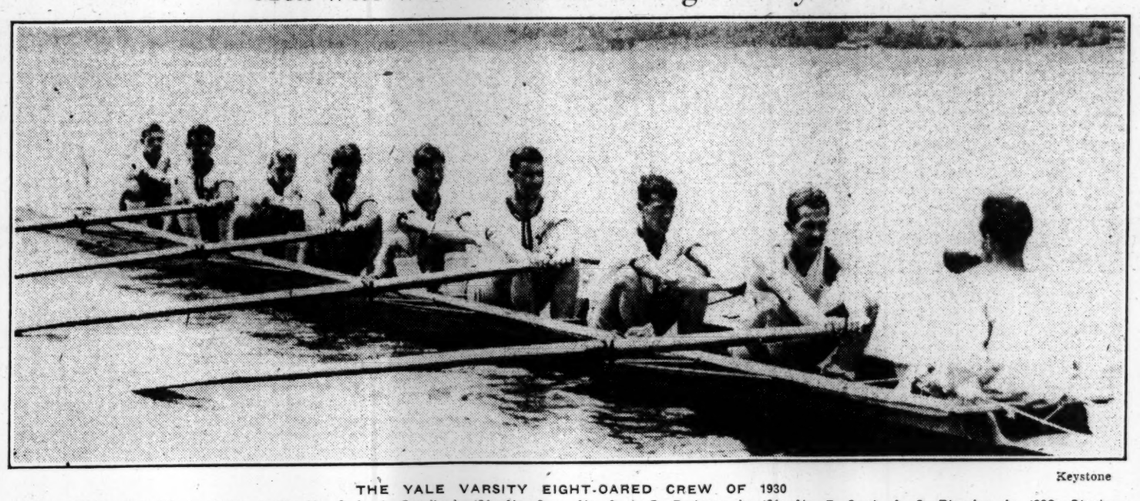

Parsons Scores 81

Warwickshire looked at one time like losing to Worcestershire after being 61 behind the first innings. The Rev. J. H. Parsons who played professional before he became a clergyman made top score of 81 in Warwickshire's first innings of 285 and bagged 114 not out in the second. R. E. S. Wyatt secured 42 and a second innings partnership between him and Parsons yielded 93 in two hours. Warwickshire declared its second innings closed at 244 for six wickets and when stumps were drawn Worcestershire, requiring 184 to win had put together 23 without a loss.

Sussex, renowned for "snappy" cricket, made a dashing effort to beat the clock and Leicestershire as well at Athorsham. Leicestershire began by scoring 254, but Sussex improved this by 108. Leicestershire's second knock ended 155, which left the Sussex men with 49 to get in 25 minutes to win. The gallant effort to secure them lost four batsmen for 14 by the time stumps were drawn.

The only first-class match outside of the county championship was Cambridge University's drawn game with Free Forresters at Cambridge. The visitors took the first knock and made only 135, F. R. Brown, bowling in great style for the light Blues, taking five wickets for nine runs. This player followed his success with the ball by scoring 82 of Cambridge's first innings score of 364. Free Forresters, in the second venture, amassed 478 for five wickets, F. S. G. Calthorpe contributing 122. Set to score 250 in two hours to win, Cambridge obtained 106 for three wickets.

JONES WINNER IN BRITISH OPEN GOLF CONTEST

(Continued from Page 1)

rounds of 70 and 72 pulled him through.

Diegel and Archie Compston threatened until Compston ruined his chances with 43 strokes for the first nine in the afternoon and Diegel remained in the race until the sixteenth hole when he took a 6.

Diegel smiled all the way through the last few holes and grinned cheerfully as he walked off the home green with a brawny policeman beside him thrusting the crowd aside. Cries of "Hard luck, Diegel," greeted the American professional on all sides, but he continued to smile. "There are too many bunkers on that course for me," he said. He finished third in the British open last year.

Compston Plays 68 and 82

Compston, giant British professional, went from the sublime to the ridiculous in his last day's play. He broke the course record in the third round with a 68 and then fell away to 82 in the fourth round for a 72-hole score of 297.

A rising wind out of the southwest, which emphasized Hoylake's difficulties for the first time during the week, affected the fourth-round scoring. Smith and Jones, with 7's at the eighth hole, gave evidence of the force of the wind. At only one hole—the fifteenth—did the wind help the players.

Jim Barnes finished with a score of 77 for a total of 297. He went out in 38 and came home in 39 for his last round.

Despite rain, the crowd grew steadily, and as Jones came out of the clubhouse for his fourth round, wearing an extra sweater, with friends carrying other rain clothes, the dog-legged first hole was lined almost solidly from tee to green. Before the play started stewards warned the spectators not to run and not to applaud until all putts were holed.

Jones started the round with a par 4 at the first hole. A gallery estimated at 8000 went out with him. The American was just short of the green with his second shot and holed a putt of four feet for his 4. He bagged a birdie 3 at the second hole. He sliced into a bunker over the fourteenth green in playing the hole, but made a brilliant recovery and holed a 30-foot putt for his 3.

Jones reached the third green with his second, 50 feet from the pin, but his approach putt was 10 feet short and he took two more for a 5. At the short fourth he again three-putted, his approach putt leaving him nine feet short. A clean-cut iron shot at the fifth landed him 15 feet from the pin and two putts gave him 4. At the sixth his mashie was just off the green, but he chipped up and holed a five-footer. At the seventh he was just short again, but chipped within inches of the pin and holed the putt.

Playing in the face of a strong wind, he was 30 yards short of the eighth green with a drive and a brassie. His third was held up by grass and failed to reach the green. After getting on in 4, he took three putts for a 7. He came back with two fine shots at the ninth to place his ball 18 feet from the pin and he was down in two putts.

The 7 registered by Jones at the eighth created great excitement among the galleries. It was the highest figure he had ever scored in his spectacular career on British links.

Jones sent his second 15 feet from the pin at the tenth and his first putt lipped the cup, getting down in 4. At the eleventh he reached the green with his mashie from the tee, but his approach putt ran 10 feet past the cup and he missed coming back, taking 4. The wind was troubling all the players. Jones's drive was in the rough at the twelfth and he took 4 for the hole, after lipping the cup with a putt. At the thirteenth he was bunkered to the right of the green, chipped out short and took two putts.

Gets Into Rough

At the fourteenth his second finished in rough to the left of the green. He chipped five feet from the cup and sank the putt for his 4 after being interrupted in addressing his ball by loud talking among the spectators. His second at the fifteenth was caught by rough and his third ran into rough also. He chipped dead to get his 5.

He played a spectacular shot at the sixteenth for a birdie 4. His second was bunkered to the left of the green and he blasted it out. The ball rolled straight for the cup and missed going in by bare inches. He tapped it in for the 4. His pitch to the seventeenth green left him a wee chip, but he sent the ball to within 12 feet of the cup and sent the putt spinning home. He sent his second soaring to the home green, the ball stopping 15 feet past the pin. He was two feet past with his first putt, but holed the second for the par four and the close of his last championship rounds at Hoylake in 75. His card:

Out ..... 4 5 6 3 4 4 3 4 4—37
In ..... 3 3 4 3 5 5 5 5 4—37—74—216

Diegel played the first four holes of his last round in par figures, but took a five at the fifth. He scored 4s at the sixth and seventh holes. He played the first nine in 38, the same number Jones required. He continued to play as though he expected to catch the amateur star. He was even par for the five homeward holes through the 14th, taking a 3 at the 13th and five at the 14th. He took a 4 at the 15th and needsd three more 4s to tie Jones. When he took a 6 at the 16th, he had to get 3s at the next two holes to tie Jones, but had two 4s. His card:

Out ..... 4 4 5 3 5 4 4 5 4—38
In ..... 4 4 3 3 5 4 6 4 4—37—75—293

Compston missed a putt the length of his putter at the first hole of the fourth round and took 5. At the second he pulled his drive into the rough and was still in the rough with his second. He was on in 3 and took two putts for another five. He got a par 5 at the third hole, but he took a 4 at the short fourth and followed with a 5 at the par 4 fifth. Another 5 was registered at the sixth. He failed to reach the 200-yard seventh from the tee and then took two putts to hole out in 4.

Compston Loses Chance

He played the first four holes coming home in 4s and then took a 5 and seemed out of it unless he could shoot some 2s and 3s. When he took a 4 at the fifteenth and 5 at the sixteenth he wiped out his chance of overhauling Jones. He took an 82 and had a final score of 297.

Horton Smith, first of the Americans to start fourth-round play, reached the turn in 39 strokes, taking a 7 at the par 5 eighth hole. He played fine golf to come home in 34, including birdies at the eleventh and sixteenth. He reached all the long holes in two shots and putted well throughout. His serious error on the first nine was at the eighth where he hooked his drive out of bounds and took a 7. His total for the four rounds was 296.

Fred Robson scored 75 for a total of 296 to equal Horton Smith's mark. Don K. Moe required 80 strokes for his final round and finished with a total of 303.

Jones on his third round tried to cut the corner at the dogleg first, cut too closely and saw his drive narrowly escape the heavy sand of a long trap. From the edge of the bunker he reached the green and he scored a par 4, one of the few times he has negotiated the first hole at Hoylake in perfect figures. At the second he was bunkered from his mashie niblick shot in front of the green and took 5 where par is 4. He pulled his tee shot out of bounds at the third, was short with his fourth, nearly holed a 10-yard putt but took 6.

His tee shot was 25 feet from the cup at the short fourth and he scored a par 3 easily. At the fifth he sent a mashie approach 20 feet from the pin and took two putts for par 4. He scored a par 4 at the sixth and par 3 at the seventh. He sent a fine brassie 30 feet from the pin at the 482-yard eighth and took two putts for a birdie 4. He drove in the rough at the ninth, but a mashie niblick pitch left him 15 feet from the cup and he holed out in two putts for another 4.

He holed a 15-foot putt for a birdie 3 at the tenth. He pushed his tee shot slightly at the eleventh, but chipped dead for another 3. He was on the twelfth green in 2 and took two putts for a par 4.

At the short thirteenth his tee shot left him 25 feet from the pin. His approach putt was to the lip of the cup and he tapped it in with the back of his putter. At the fourteenth he cut his second shot and found rough. His third was 10 feet past the cup and his putt for a birdie barely missed. He pulled his second into a bunker at the fifteenth and pitched on 25 feet from the cup. He took two putts for a 5. At the sixteenth he was just short of the green in 2, chipped 10 feet past the pin and saw his putt lip the cup. He took another 5.

He took his third 5 in a row at the seventeenth, where he was 50 feet short and his approach putt 10 feet short. He took two more putts for a 5. A par 4 at the home hole gave him 74, two over par. His card:

Out ..... 4 3 5 4 4 4 4 3 7 4—38
In ..... 4 4 4 4 5 5 4 4 4—37—75—291

Compston shot his record-breaking 68 in the third round. Mob scenes ensued as the Englishman pushed his gigantic form through the cheering crowds to the clubhouse. The crowds were cheering the fact that he had clipped two strokes from the course record and taken the lead in the third round, but from the excitement it appeared that he had won the championship.

After going out in 34, he was in a strategic position for a low score and he took full advantage of his opportunity. He holed an 18-foot putt for a birdie 3 at the tenth and a 10-footer for a par 3 at the eleventh. At the twelfth he had only to hole one of nine feet and at the short thirteenth he sent his tee shot 12 feet from the pin and sank the putt.

He made a bad beginning as he started the five hard finishing holes, taking a five at the 14th, where the long hitters expect to bag birdies. He sent his drive at this hole into another fairway. He got his par at the 15th, but ran into trouble at the long 16th. He was short with his run-up shot, missed the hole with a long putt and then saw a six-footer strike the back of the cup and jump out, leaving him with a 6. Two par 4s then enabled him to get his 68.

Diegel was off to a flying start in the third round, playing the first five holes in two under 4s. He followed a par 4 at the first with a birdie 3 at the second, birdie 4 at the third, and the fourth and fifth in par.

Diegel Plays Under Par

Playing great golf, he added a 4 at the sixth and 3 at the seventh, giving him a score 3 under 4s for seven holes. He was sending his seconds to the greens with machine-like accuracy. He took 5 at the long eighth, but negotiated a birdie 3 at the ninth, his third birdie in nine holes. After going out in 33 he required 38 to get home for a third-round score of 71 and total of 218.

Fred Robson slipped back to 78 and a three-round count of 221.

F. C. Stevens Jr., Los Angeles amateur, picked up at the seventeenth hole of the third round. He said he was tired. He would have had a score of about 80.

Macdonald Smith played his first nine holes of the third round in 37 strokes. A succession of 5s ruined his chances. He played a fine long game but was unlucky around the greens. At the sixteenth he played a weak chip and took two putts and he three-putted the last two holes. He missed a three-footer at the seventeenth and from 18 inches at the home hole, the ball popping out of the cup. He had a 75.

Barnes finished the third round just behind Jones with a third-round score of 72 and a total of 220. He was one over par after four holes. He was twice in the rough at the first hole but finally holed out in one putt for a 5. He played the next three holes in par. He was 39 after nine holes. He finished the twelfth green in 2 and took two putts for a par 4.

At the short thirteenth his tee shot left him 25 feet from the pin. His approach putt was to the lip of the cup and he tapped it in with the back of his putter. At the fourteenth he cut his second shot and found rough. His third was 10 feet past the cup and his putt for a birdie barely missed. He pulled his second into a bunker at the fifteenth and pitched on 25 feet from the cup. He took two putts for a 5. At the sixteenth he was just short of the green in 2, chipped 10 feet past the pin and saw his putt lip the cup. He took another 5.

He took his third 5 in a row at the seventeenth, where he was 50 feet short and his approach putt 10 feet short. He took two more putts for a 5. A par 4 at the home hole gave him 74, two over par. His card:

Out ..... 4 3 5 4 4 4 4 3 7 4—38
In ..... 4 4 4 4 5 5 4 4 4—37—75—291

Compston shot his record-breaking 68 in the third round. Mob scenes ensued as the Englishman pushed his gigantic form through the cheering crowds to the clubhouse. The crowds were cheering the fact that he had clipped two strokes from the course record and taken the lead in the third round, but from the excitement it appeared that he had won the championship.

After going out in 34, he was in a strategic position for a low score and he took full advantage of his opportunity. He holed an 18-foot putt for a birdie 3 at the tenth and a 10-footer for a par 3 at the eleventh. At the twelfth he had only to hole one of nine feet and at the short thirteenth

OREGON AWARDS 32 VARSITY LETTERS

SPECIAL TO THE CHRISTIAN SCIENCE MONITOR

EUGENE, Ore.—The University of Oregon Athletic Association has announced the awarding of 32 sets of sweaters and insignia to spring sports teams. Of this number 17 "O's" were awarded to track and field athletes, who had earned points in competition in Pacific Northwest meets or in the Intercollegiate A. A. A. A.

Only 11 "O's" were given out in baseball for those who played in games in the Pacific Northwest. A quartet of players received the award in tennis and a like number in golf.

The list of "O" awards follows:

Track—J. H. Allen '32, P. F. Bale '32, H. F. Dickson '30, A. C. Edwards '32, R. L. Everts '31, Clarence Hill '31, R. A. Hill '31, H. T. Lowry '31, W. C. McKennon '31, Don Maultby '30, E. B. Moeller '31, Tom Moran '30, R. S. Robinson '30, V. V. Scheiber '32, E. E. Siemund '31, Leonard Steele '31.

Baseball—R. J. Macdonald '30, K. S. Scales '32, Cecil Gabriel '31, C. H. Nelson '30, J. E. Londahl '32, Kenneth Roble '30, K. D. Stevens '32, K. L. Barnes '32, F. H. Andrews '31, B. A. Mimnaugh '32, Charles Hoag '32.

Tennis—S. D. Lockwood '31, S. J. Almquist '31, D. B. Ragen '32, J. K. Kalisky '31.

Golf—H. R. Kincaid '32, Francis Heitkemper '32, William Palmberg '32, G. E. Will '31.

DALLAS SIGNS ALEXANDER

DALLAS, Tex. (AP)—Grover Cleveland Alexander, star right-hander of the National League for two decades, has been signed by the Dallas club of the Texas League, it was announced June 19 by Bob Tarleton, vice-president of the local club.

Golf, but this has not interfered with their schedule of two outings daily on the river. The Rev. F. H. Sill, headmaster and coach, said on June 19 that he felt thoroughly satisfied with the crew's progress. Entry of the 150-pound Princeton crew was confirmed, and the crew is expected to arrive at Henley June 24.

BOWDOIN COLLEGE ELECTS

BRUNSWICK, Me.—The results of recent elections of captains and managers of spring sports was announced at Bowdoin College June 19. Sydney F. Foster '31 of Manchester, Mass., was chosen track captain and Robert C. Moyer '32 of Reading, Mass., manager. In baseball, Gerhard H. Whittier '31 of Lisbon Falls was elected captain and Raynal C. Bolling '32 of Greenwich, Conn., manager. Arthur O. Dillenbeck Jr. '31 of Manhasset, N. Y., will head the golf team next year.

FOOTBALL STARS SIGN

PROVIDENCE—B. P. Holm, Alabama College All-American fullback in 1929, and Charles H. Edwards, last season's captain of Brown University, have signed contracts to play with the Providence Steamrollers of the National Professional Football League next fall, it was announced on June 19 by Manager Charles B. Coppen. In addition the Rollers have signed Douds, Washington and Jefferson star.

YANKEE DEAL COMPLETED

NEW YORK (AP)—After several contradictory announcements, it finally has been settled that Meryl Hoag, star outfielder of the Sacramento Pacific Coast League club, will come to the New York Yankees. Definite word of the acquisition of Hoag was announced by the Yankees June 19. The Yankee management would not state the terms of the deal, except to say that cash and players would be given in exchange for Hoag.

KENT CREW MAKING PROGRESS

HENLEY-ON-THE-THAMES, Eng. (AP)—The Kent School crew is making excellent progress in its training for the Thames Cup regatta. The boys have been busy with their examinations, which were held in a town

THOMPSON'S FAME WINS YACHT RACE

NEW LONDON, Conn. (AP)—J. D. Thompson's schooner Fame, from Greenwich, Conn., was first to cross the finish line at 2:43 a. m. (eastern standard time) June 19, in the American Yacht Club's 80-mile race from Milton Point, Rye, N. Y.

The yachts, sailing in three divisions, made very fast time, aided by a fresh southerly breeze.

R. B. Metcalf's schooner Sachem, from Providence, finished second in 3h. 33m. 15s. Horace B. Merwin's schooner Dauntless, from Bridgeport, was 45 seconds astern and George V. Smith's new cutter Skal, and V. W. F. Downs' schooner Malabar VIII finished in that order.

In the third division, made up of racing sloops, Bob Fulton's Larchmont boat was first, crossing over at 5h. 22m. 35s., followed by H. R. Robertson's Varune at 5h. 24m. 30s., and Roy Manney's 10-meter sloop Synthetic at 7h. 25m. 30s.

NORWICH ELECTS

NORTHFIELD, Vt. (AP)—John C. Hurley of Boston was elected captain of next year's Norwich University track and field team at a meeting of lettermen June 19. Hurley, a sophomore, was Norwich's star hurdler last year. Elliott Marcoulier of Westfield, Mass., also a sophomore, was elected manager.

SHIP'S CAPTAIN DENIES SENDING RADIO MESSAGE

Fairfax's 'Just Standing By' Not Authorized by Him, Brooks Tells Inquiry

Declaring that he had nothing to do with the sending of certain radio messages alleged to have been received from the Fairfax by local stations and the steamship Gloucester, Capt. A. H Brooks of the Fairfax today took the stand as final witness in the federal investigation hearings in Boston relative to the Fairfax-Pinthis collision off Scituate two weeks ago.

Adjournment of hearings, which have continued for more than a week and during which more than 50 officers, members of the Fairfax crew and passengers have testified, came directly after Captain Brooks' statement, to which great significance is attached. Captain Brooks asserted that if a message was radioed "Just standing by, nothing to give out," by the Fairfax, it was transmitted without his authority.

Asked if he thought the two hours and a half he spent in searching for those who might have been lost overboard was a reasonable length of time for such procedure, the captain replied that he believed he had exercised his best judgment.

He said he had no knowledge of receiving a message alleged to have been sent to the Fairfax asking for general information about the collision. The first message sent by him was prior to the anchoring of the Fairfax at Buoy No. 4, he said, when he sought aid from the Gloucester. According to previous testimony of the Gloucester operator, communications from the Fairfax were received prior to that, but Captain Brooks said he did not authorize these.

Mate Searched Waters

Relative to searching of waters in the vicinity of the disaster, a duty that is recognized as part of a commander's responsibility on the high seas, Captain Brooks declared that he did not know anyone was overboard until after the fire was under control; that he then dispatched a lifeboat in command of the third mate, who, he believed, made a thorough search.

Immediately after the collision, the captain said, he gave orders to the assistant radio operator to send S O S signals. Federal investigators asked if he ordered the sending out of location signals and he replied in the negative. He was reminded that S O S means little unless the location is given, to which he acquiesced.

In view of the declaration by coast guard officials that they received no communications from the Fairfax, Captain Brooks exonerated them from all criticism. He did not think the coast guard could have been of any service under the conditions in saving persons anyway. He could in no way account for the alleged sending of messages from the Fairfax without his knowledge.

Antenna Down for Time

A message alleged to have been received by the Gloucester to the effect that the Fairfax had anchored near Buoy Number 4 and that all passengers were safe, he could not explain. Neither could he understand why the coast guard service, which had declared it impossible not to have received S O S signals if sent by the Fairfax, did not get those he authorized. "I have no means of knowing that the messages were not sent," he said, "other than that the antenna was down for 20 minutes or more."

In closing, Captain Brooks said: "I would like to have the press and those people who are present here, know that I appreciate everything that was done by the officers, crew and passengers of the Fairfax relative to the collision."

The local inspection board's report on testimony heard in Boston will probably be ready for the perusal of the Federal Board of Steamboat Inspectors in about four or five days, Capt. Charles M. Lyons, local supervisor, declared. No announcement as to the action of the Federal Board, which he said meets in New York today to discuss the collision, will be made for at least two weeks he thought.

CO-OPERATION IS KEYNOTE OF POWER PARLEY

(Continued from Page 1)

000,000 marks. It would supply a kilowatt hour at one and one-tenth pfennigs.

The frictionless operation of international train, telephone and telegraph services, he said, justifies the optimistic view that the political difficulties confronting such a scheme would be overcome, especially in view of the growth of the idea of peaceful coöperation among the nations. Such a scheme would also enable the utilization of hitherto undeveloped power sources such as on the Dalmatian coast and Austria.

The reaction of conference delegates to this scheme differed. Several German engineers, as became evident from the discussion in one committee meeting, warned against drawing up such a plan as it might be out of late in a few years' time owing to the rapid progress in technics. Electro ecnomics must be developed from below, that is from local needs, and not from above, that is, by outlining a vast high tension net, was one opinion voiced. Another speaker stated that every plan of this kind deals primarily with a high tension net, but high tension transmission was still in the midst of development and progress was not the same in all countries.

The opposite view was expressed by Emil Erny, delegate of the board of directors of the North Eastern Swiss Power Works. Already it is quite apparent, he said, that European power economics can only be organized in a manner meeting the needs of everyone by linking up various European power sources.

State Interference

Power undertakings, however, must avoid everything which might induce state interference, he continued. Several states were already protecting their power interests because they apprehend that too great utilization of their power sources by other nations might damage the interests of their own power consumers.

Electro economics can only establish international exchange of power without too much interference by governments by restricting this exchange to the most rationalized and careful exploitation of the various existing power resources.

Mr. Erny believes in exchanging power, as this stimulates coöperation of nations. He also holds that each nation should keep its own power resources. No nation should try to buy up the power sources of another nation. International power exchange on a big scale was bound to come within the next ten years, just as there is international train service today, he said to the representative of The Christian Science Monitor. For this purpose it was certainly advantageous, he believes, to draw up a general scheme stating how high tension lines should run, but it certainly was not necessary to develop such a network immediately in its every detail.

In the near future, he believes, Norway may be supplying current to north Germany, north Germany to Switzerland, Switzerland to Italy. During the winter when the Swiss rivers carry ice Switzerland derives power from the Ruhr coal district of Germany and returns power from its water resources in summer.

The point was also stressed by one German engineer that, according to Dr. Oliven's plan, not two but a ring of nations would be connected. On this ring net they could exchange all surplus power.

Another expression for international coöperation was the resolution passed by one of the committees asking the main committee of the World Power Conference to collect and publish all legislation pertaining to electricity in all countries. Up to the present day this has been done by Mr. Siegel, a German engineer, who presented the delegates with copies of his book containing a compilation of international legislation. But this work needs to be continued in order to retain its value.

Tests for Turbines

Another step toward international coöperation to which engineers attach considerable importance is the international standardization of final tests for power plant turbines. In conference circles it is hoped this work of preparation, which has taken some years, may be concluded at the meeting of the International Electricity Commission in Stockholm, following the World Power Conference.

Prof. Ernst Kraft, one of the directors of the German General Electric Company, stated at the conference that these international standards should not wholly eliminate the standards set up by various nations, but that they should form a framework for the latter. All regulations should be worded as tersely as possible. Such a standardizing process concerns primarily the European nations who export turbines, it was declared.

In another committee meeting it was announced that the Federal Coal Council of Germany had organized an international competition for the best method of utilizing for technical purposes either purified smoke or the soot gained by the purification process. This would lower the cost of purification and thus enable its wider use. Fnally the women engineers met on the fourth day of the conference and decided to establish international coöperation. Outside of England, Germany was the only country which now possesses a society of women engineers. It was founded last February and the reception given June 19 was its first public function.

Frau Knott-Ter-Meer, chairman of the German Society of Women Engineers, welcomed Miss Kate Gleason, of Rochester, and Miss Caroline Haslett, of London, as guests from abroad.

School Authorities Fight Chicago Beer

Special from Monitor Bureau

CHICAGO — The Department of Compulsory Education here is conducting a drive to rid school neighborhoods of speakeasies, following complaints that several children had appeared in class showing signs of intoxication.

The entire force of 123 truant officers has been instructed by W. L. Bodine, supervisor of the department, to report any such incidents or the existence of near-by speakeasies to him, and he in turn reports them to the police department.

Following such a complaint, Mrs. Mary Karkoska, mother of five children, was fined $100 by Judge Samuel Heller for selling beer to a 10-year-old boy, who said he had come to purchase it for his father during school hours. Two other boys of the same school also admitted having bought beer from Mrs. Karkoska.

Wealth Said to Lie in Diverse Products

Special to The Christian Science Monitor

DULUTH, Minn.—The undeveloped natural resources of the United States are its industrial currency of the future, Dr. Henry Mace Payne, geologist for the Gulf, Mobile & Northern Railroad, told delegates to the twenty-second annual meeting of the American Railway Development Association here on June 19.

Prosperity, he said, depends upon the diversified production of mine, mill, farm and factory, stressing that no country or state ever became rich through the production of raw material alone. It is for the railroads, he said, to stimulate this diversification of production through an efficient program of railroad development.

The importance of railroads in the development of the nation was also stressed by Dean W. C. Coffey of the University of Minnesota, who addressed the delegates at their annual banquet.

BRITISH FARMERS TO TOUR CANADA

Special to The Christian Science Monitor

WINNIPEG, Man.—Under the auspices of the British National Union, a tour of British farmers is to be conducted through Canada toward the end of this summer. The tour will commence Aug. 23 at Liverpool, and will be the sixth that the union has organized.

The object of the visit is to encourage intercourse between the people of the mother country and their kinsfolk.

House Problem for Married Attache in London Perplexing

'Henry Adams,' Being a Bachelor, Finds Many Clubs In and Around London to Live In—Social Engagements Interesting and Many

This is the last of a series of five articles dealing with the work of the foreign officers of the United States Department of Commerce. The first article appeared June 16.

By HUGH BUTLER

When Henry Adams sailed from the shores of his own country for the first time he had that similar eerie feeling one has when getting the feet off the ground for the first time, as an airplane begins to rise. He felt as if he were on a trip to the moon, so vast did the ocean seem, in spite of his thorough acquaintance with the geography of the Atlantic Ocean and his certain knowledge that "over there, out in front," lay Europe, and London, his destination.

Of course, for Henry Adams the question of where to live in London was simple enough. A young bachelor can live anywhere. London is full of clubs and the environs replete with more clubs, country clubs and hotels everywhere. But the bachelor who so desires seldom lives in his club, for if he has engaging ways and social status he is in constant demand by hostesses when living among a people having 3,000,000 excess women, most of whom are not far from London.

When young Adams found the difficulties under which his married colleagues were living, he promptly came to the conclusion that all new appointees for his sort of work ought to be either bachelors or rich (or both). The average American official's family living abroad are nomads drifting from one country to the other, never living in their own houses and with no furniture of their own, although sometimes they are fortunate enough to find a furnished house for rent for the whole period of their stay in England.

Rental Conditions

Rents are not high, but the conditions of rental are difficult. Those who wish to let houses unfurnished usually ask for an agreement covering a period of years—say seven years, as is customary. Then, too, the renter is to leave the premises, and furniture, if included, in exactly the same condition in which he found it. It really is an amusing experience to watch a professional inventory taker. Every crack and scratch is noted down impartially at the beginning and again at the end of the period of tenancy.

Some unusual arrangements are made at times; a trade commissioner who owned his own home in London had to spend three months of a summer in Ireland. Rather than be separated from his family, he swapped houses for the summer. A demure little Irish widow who owned a charming cottage at the sea side 14 miles south of Dublin was very much astonished at this bold American's suggestion that she and her sister should go to London and take over his house there just as it was, cook and all, while he and his family moved into her cottage in Ireland just as it was when the little lady left it, cook and all. This was a scheme that worked without any inventory; and the parties separated as good friends.

When a man owns his own house (or at least has a title to it) he feels that he is a part of the community. It is possible for the American commercial attaché living abroad to buy his own house, although, of course, he takes a risk of being moved to some other post on short notice and again of being unable to sell promptly when leaving the country. If a trade official makes this plunge in order to assure his family of a permanent residence in London, and he is fortunate enough to sell at the price originally paid for the house, he can come out of the transaction at a relatively low rental for the period of three years. Building societies in London will advance him 80 per cent of the purchase price, giving him 20 years to pay on monthly payments no higher than ordinary rental.

When the commercial attaché has lived abroad for six months of a calendar year he does not have to pay any American income tax, he is automatically exempt from British income tax assessment and the larger part of all local taxes. Nevertheless so great are the costs of moving about and making frequent readjustments that but few of the men in the commercial attaché's office can save anything on their salaries. The improvement in the last five years in these conditions has been great. The scale of salaries has been advanced, funds have been supplied for the movement of family and household effects, etc.

Play in Britain

In previous articles in this series allusions have been made to various pleasant and educational phases of the work of a commercial attaché. When it comes to play, the British Isles offers him and his family every type of recreation and sport. The British are a sporting nation. That most favored of sporting pastimes, golf, is found under perfect conditions of play nearly 12 months of the year around London. Membership can be had in golf clubs for nominal fees.

It has ofen been said that Great Britain is a man's country and London a man's town. American women who are the wives of trade commissioners certainly are inclined to believe that this is the case after their first few months in an English home. There is the eternal question of heating or what is more accurate, lack of heat. The house is likely to have four, or more, different heating systems, probably a coal grate fire in the living room, an anthracite salamander in the dining room, gas fires in the bedrooms, an electric heater for general utility and a coke stove in the kitchen for hot water.

And with all this apparatus the gentleman of the house and his wife wear heavy underwear and Scottish tweeds comfortably in the house because the temperature in most months of the year averages between 55 and 60. True, the British nation has lived and thrived on it just as they have on their extraordinary and colorless diet. British individualism finds its way into this phase of life as well. The cook in the kitchen puts no seasoning to amount to anything in the food, the theory being that each person shall season it as he or she prefers.

There is the question of wearing apparel.

The British are an out-of-door nation, and the Englishwoman, in a tattered old raincoat, swings jauntily across the heath with her husband and their dog, quite ignoring the rain. And she enjoys it. Fortunately there is the American Woman's Club in London which means more to the American women than the American Men's Club means to the men. Doubtless it would be difficult for many officials of the American Government and other Americans in London to continue happily at their work if it were not for the satisfaction and relief that their wives obtain in the many and varied activities carried on in the beautiful clubhouse.

Children in London

Recently when a family of Americans returned home from London a little girl of six who had been born there told her mother that "she liked America because the skies were higher and because she liked the spinach better." Thus in a sentence this wee lassie gave the American child's point of view of England. The many sunless days from October to April and the perpetual dampness make out-of-door play a dull and soggy business for the children. In stiff regimental array the nurses with their prams (baby buggies) with children of all ages in and around them make their appearance regularly on the street or in the parks and march up and down "taking the air."

There are many phases of life in Europe which are interesting and enticing. The European, particularly the Englishman, enjoys life in a way that puzzles an American at first. It puzzled Henry Adams in his first two years in London. It usually takes years of residence among the English accurately to get their point of view. They place such a high value on privacy. This is the real explanation of their apparent aloofness and coldness.

Henry Adams was very much intrigued by the things he saw in the office of the commercial attaché, and outside of it, and he made up his mind to get all that was worth while out of this experience, to make life rich and interesting, as well as to become an efficient foreign trade specialist.

Beach Sports Day Is Held in Hawaii

Special to The Christian Science Monitor

HILO, T. H. — Hawaii observed Kamehameha Day June 11 with the first regatta ever held in the islands.

The day is destined to become one of the most novel in the history of Hawaiian sports since the old Hawaiian régime.

Regatta day was conceived for the express purpose of reviving and perpetuating old Hawaiian beach sports as they were staged years ago. Each entrant must wear a malo (loin cloth) in keeping with each entrant's club colors.

The day's program included an outrigger canoe sailing race, surfboard paddling races, canoe paddling races, a one-man canoe paddling race, and a canoe paddling race out to the surf and return by the waves.

This was one of the first races ever to be staged in modern times, using paddling and surfing combined, and is typical of the sport of old Hawaii, where skill in catching waves is just as important as being able to paddle fast.

Other features were a "po-o honu" (turtle catching contest) and "umu" (Hawaiian wrestling) contest.

Mississippi Paper Honored for Service

MILWAUKEE, Wis. (AP)—A Mississippi weekly newspaper, whose publisher entered journalism only six years ago, received on June 18 the trophy for greatest community service, the highest honor bestowed by the National Editorial Association.

The McComb Enterprise, edited by J. O. Emmerich, a former farm demonstrator, was credited with having "not only the outstanding record for the last year, but probably would stand first among all weekly newspapers which have competed for this honor in former years."

Other first awards, announced at the annual convention were: Best weekly newspaper—Greenwich (Conn.) Press; newspaper production contest—Brookings (S. D.) Register; best editorial page—Bloomfield (N. J.) Independent Press; best front page—Storm Lake (Iowa) Pilot-Tribune; advertising promotion—Cosmopolis (Pa.) Record.

Second place in the community service contest was awarded to the Chronicle Express, Penn Yan, N. Y.

The Traer (Iowa) Star Clipper won the highest rank in the contest for the best weekly, but having won the award three years ago, was ineligible, and the Greenwich Press, was given first.

Theaters

"The Song and Dance Man"

Special from Monitor Bureau

NEW YORK—For a limited engagement George M. Cohan is appearing at the Fulton Theater in his own comedy drama, "The Song and Dance Man." This play offers a field for Mr. Cohan's expert characterization of a vaudeville performer who is convinced he is a great artist that has never had his chance. It also exemplifies Mr. Cohan's playwriting methods. Probably no playwright since Boucicault practices so assiduously the old rule of the theater, "Make 'em laugh, give 'em a thrill, make 'em wait." Mr. Cohan makes the audience wait until the spectators are all but impatient, and then gracefully slips into the next sequence of built up suspense. Mary Phillips matches well Mr. Cohan's reticent, expressive mood in her portrait of an acidulous good-hearted boarding-house keeper. Others who help to entertain are Robert Middlemass, Edward F. Nannary, Isabel Baring and Joseph Allen.

PLUTO WAITED SINCE 1919 FOR WORLD DEBUT

Special to The Christian Science Monitor

EUGENE, Ore.—The celestial object, Pluto, which had a sensational début to this world at Lowell Observatory March 15, really has been shyly waiting to be discovered and publicized since as far back as 1919, it was disclosed here by F. L. Whipple, Lick fellow in astronomy of Berkeley, who addressed the Astronomical Society of the Pacific division at the fourteenth annual meeting of the American Association for the Advancement of Science June 19 on the University of Oregon campus.

The object was actually visible on photographs taken at Mount Wilson Observatory in 1919, but it lay hidden away, with a large number of brighter stars and objects dimming its light, in its vicinity, Mr. Whipple said. When the discovery was made that it actually existed, a clue to its whereabouts was furnished and four days ago Dr. D. B. Nicholson of Mount Wilson Observatory came across a tiny spot on the 1919 photograph. With this information Mr. Whipple and E. C. Bower, Lick fellow, and also Dr. Nicholson and N. U. Mayall of Mount Wilson computed the path of the new planet.

Finding of the transneptunian object on the 1919 plates is of utmost importance, since it enables astronomers to calculate with exactness the orbit of Pluto, and further, these orbit findings indicate that the object is a planet, although natural scientists still feel that the possibility of its being a comet is not entirely excluded.

Another step in definitely establishing Pluto to its place in the heavens was taken but a day or two ago, when telegraphic notices from Yerkes Observatory in Chicago stated that the object was located on plates taken in 1927. The object, according to calculations based on the photographs, has a cycle of 249 years and is approaching the sun now. According to the computations of Mr. Bower and Mr. Whipple, in 1989 it will be nearest the sun and will be slightly closer than Neptune, although the brightness will be about the same as it is now.

Beer Gang-Police Deals Alleged

Special from Monitor Bureau

CHICAGO — The Chicago police force is being reshaped to put more policemen in uniform on the streets, the acting commissioner, John H. Alcock, making this one of his first moves in preparing to check crime. The police department, according to civic leaders who have studied its problems, is under-manned.

Mr. Alcock told a city council investigating committee that the number of uniformed police now on the street, number 1100, would be tripled within 10 days. As a step in this process he odered 700 policemen assigned to the detective bureau back to duty as patrolmen.

During his examination before the City Council Committee, Mr. Alcock said he believed that beer-running on the streets here, the trade of gangsters, would be impossible without some understanding with the police. He said he had heard of instances where police had been punished because they interfered with gangsters. If the gangster element had no influence in police or other circles, that would be an important step in making an efficient police force, he agreed.

TABLET UNVEILED TO SIDNEY LANIER

Special to The Christian Science Monitor

TRYON, N. C.—The dedication of a bronze tablet, a memorial to Sidney Lanier, beloved poet of the Southland, took place recently in the presence of a large gathering of admirers of the poet-musician. Six relatives journeyed from various sections of the country to witness the honor paid to his memory.

The exercises took place under the beautiful mimosa tree on the John L. Jackson place, where Mr. Lanier spent the later years of his life. The Rev. Clarence Stuart McClellan Jr., of Fletcher, the shrine known as the Westminster Abbey of the South, had charge of the program. Mrs. H. L. Sheip (Roxanna Lanier Allison), a second cousin of Sidney Lanier, who lives in Philadelphia, donated the bronze tablet and made the presentation address.

BINLEY TO TAKE NEW POST

CLEVELAND (AP) — Dr. Robert C. Binley of Smith College has been named acting professor of history and head of that department at the College for Women, Western Reserve University, it was announced June 14.

ENGINEERS HEAR OUTLOOK NEVER WAS SO BRIGHT

Opportunities for Good Work Better Than Ever, Editor of Power Says

Special to The Christian Science Monitor

SALEM, Mass.—Outlining the industrial progress in the United States since the beginning of the century and the part that power has had in the country's development, Fred R. Low, past president of the American Society of Mechanical Engineers and editor of Power, told delegates to the eighteenth annual convention of the New England States Association of Power Engineers here June 20 that opportunities for engineers for advancement and bigger salaries were never better than now.

"In spite of the fact that central power plants are furnishing their product to many industries, there is more home-made industrial power being generated today than ever before," he said. "There are better chances for engineers of all classes, better opportunities for advancement and bigger salaries than ever have been."

Answering the criticism of the machine age and the charges made that it has produced captains of industry, but no great figures in the realms of literature, art and music, Mr. Low said:

"We may not have developed a Shakespeare, a Michelangelo or a Beethoven, but when you think it all over we are nearer today to the dream of universal well-being than we ever have been. The ordinary man of today enjoys more comforts than the kings of old. Power, its application, and the training of a personnel to man its machinery of production, have made these advantages available.

The convention which represents practically every power plant in New England opened with an exhibition of power plant machinery in State Armory June 19 when Mayor George J. Bates welcomed the delegates and Harry P. Gifford, president of the Salem Five Cents Savings Bank, talked to them of the economic progress of the past 75 years.

Palestine Museum Corner Stone Laid

By Radio to The Christian Science Monitor

JERUSALEM — Laying the corner stone of the Palestine Archæological Museum for which John D. Rockefeller Jr. donated $2,000,000, Sir John Chancellor, the High Commissioner, recalled that this was the third country he had governed in which the Rockefellers' beneficent activities had been extended, the others being Mauritius and Trinidad.

Sir John thanked Prof. James H. Breasted, who had thrice visited Palestine in connection with the museum plans, adding that the museum would house the antiquities of all the peoples who had inhabited Palestine from the earliest times, making it a veritable treasure house of a country whose history was the subject of passionate interest to all races in the world.

Mr. Richmond, director of antiquities, said that the building would provide headquarters for the Department of Antiquities, be a storehouse for archæological learning, and also be an educational center through the library, the exhibition galleries, and the lecture theater.

Battleship Program Before Committee

Special from Monitor Bureau

WASHINGTON—As the last phase of the Navy Department's program, laid down five years ago, to modernize in various respects American battleships, the House Naval Affairs Committee met on June 20 to consider a $29,793,000 project for the improvement of the U. S. S. New Mexico, Mississippi and Idaho.

Fred A. Britten (R.), Representative from Illinois, chairman of the committee, declared that the modernization of these ships is in accord with the provisions of the London Naval Treaty and that by extending their efficiency and utility by this means would save approximately $140,000,000 in replacement costs.

The Naval Affairs Committee will decide at its hearing whether it will attempt to get an appropriation through Congress at the present session or whether it will wait until next December.

The three battleships are to have their guns elevated and are to be fitted out with new turbines and boilers, new anti-aircraft guns and blisters for protection against submarines. The decks are also to be thickened for protection against bombing. The cost is to be around $10,000,000 per ship, which is approximately one-fourth of the cost of a complete new battleship.

4-H DELEGATES IN WASHINGTON FOR CONVENTION

Special from Monitor Bureau

WASHINGTON — Eager to learn about the Government and looking most cheerful in fresh uniforms, boys in white and girls in green, the 155 delegates to the annual 4-H Club encampment spent the first two days of their week here in organizing themselves and inspecting the Department of Agriculture experimental farm at Beltsville, Md.

The young farm boys and girls from 39 States were welcomed by Dr. C. B. Smith, chief of the office of co-operative extension work in the Department of Agriculture, who told them to learn to measure their success in terms of service.

"You are all dreaming dreams for the future," he said, "but if your dreams don't come true, that doesn't make you a failure. If you serve someone else besides yourself you are a success."

After describing some of the nation's historic shrines which they are to visit during the next few days he expressed the hope that from them they would derive a higher sense of service to the community. "You cannot visit here without becoming a better citizen," he said.

While the club members were thus being initiated into the beauties as well as services of the capital city, Dr. C. J. Galpin, authority on rural life in the bureau of agricultural economics, held a series of discussions with the club leaders centering around the way the 4-H Club work had dignified the agricultural profession.

"The perfections reached in the pure-bred cow, the pure-bred ear of corn, the high-producing acre of soil and the sanitary can of fruit are distinct applications of ethics, aesthetics and natural science," he said, "on a par with the laureate's poem, the exquisite statue, or the self-denying deed."

The voluntary feature of 4-H Club work and its contact with the child, "and admit to all concerned that the more eager for suggestions of improvement, were stated to explain the great success of the clubs in disseminating this higher conception of the dignity of the work of the farm. "We must recognize," Dr. Galpin told them, 4-H Club work is essentialy an education process affecting the habits of workmanship, habits of individual thought and behavior, habits of social thought and behavior of the boy and girl, and at the same time that the club work is building up an outside industry called agriculture."

A trend in the work of the clubs toward more organization was noted. At first the officering and management of club affairs "were apt to be regarded as only a mechanical necessity for the immediate purposes of the club," it was said. "Now, however, it is being discovered that organization is a piece of social activity and group behavior which has a positive bearing on the permanence of the agricultural industry." Dr. Galpin stressed the necessity therefore, of continuing the trend toward more effective and more careful organization of the individual clubs as one of the best means toward improving group behavior in the community.

MISS PECK FINISHES 12,000-MILE AIR TRIP

NEW YORK (AP)—Miss Anne Peck, explorer and lecturer, returned June 13 from a 12,000-mile airplane trip in South America. Miss Peck began the South American journey about Christmas time last year. She landed on the coast of Colombia, and, taking her first airplane ride, flew into the interior at Bogota. She continued the air journey down the west coast, over the Andes to Buenos Aires, up into Paraguay, and finally on to Pernambuco and Miami, Fla.

Miss Peck set a mountain-climbing record when she scaled Mt. Huasgaran, Peru, said to be the highest climb in the Western Hemisphere, in 1903.

HARVARD FUNDS GAIN $11,265,775 DURING YEAR

Donations Announced at Meeting of Alumni Association

Harvard University, said to be the richest college in the United States, had its funds augmented in the last year by gifts aggregating $11,265,775, President A. Lawrence Lowell announced at the meeting of the Alumni Association June 19. From the estate of Archibald Cary Coolidge $662,882 was received, $300,000 from Clarence Dillon, $300,000 from the estate of Augustus Coe Gurnee, $2,948,000 additional from Edward S. Harkness, $158,603 additional from the Harvard Fund, $100,000 from the estate of Ogden Mills, $100,000 from the estate of John Torrey Morse, $769,138 from the estate of Edgar Pierce, $350,000 from Harold S. Vanderbilt, $974,959 from the estate of Artemas Ward and sundry gifts of less than $25,000 each totaled $1,207,516.

Five members of the alumni were elected to the university's board of overseers for six-year terms. They included Charles Francis Adams, Secretary of the Navy. The other new members are Learned Hand '93 of New York, Samuel Smith Drury '01 of Concord, N. H., Walter Sherman Gifford '05 of New York and Elihu Root Jr. '06 of New York.

Charles MacVeigh '81 of New York will serve two years on the board, and Dr. Roger Irving Lee '02 of Brookline, one year, to fill two unexpired terms.

Directors of the Harvard Alumni Association to serve for three years are Franklin Spilman Newell '92 of Boston, Henry Parkman Jr. '15 of Boston and Francis Higginson Cabot Jr. '17 of New York.

Those selected to serve six-year terms on the Harvard Fund Council were Frederick Haines Curtiss '91 of Boston, Robert Eliot Goodwin '01 of Boston and Thomas Stilwell Lamont '21 of New York City.

SUMAS LAKE BOTTOM SOLD FOR FARM LANDS

Special to The Christian Science Monitor

CHILLIWACK, B. C.—Announcement is made that the Provincial Government has sold 5600 acres of the 8700 reclaimed from the bottom of Sumas Lake by draining and dyking, mostly to men who intend to farm the land. The balance of the land it is expected will be sold before autumn.

The Government cut the prices and is taking a heavy loss but believes it is good policy to get the area under cultivation as quickly as possible.

THE HOME FORUM

With "Benefit Of Title"

SELECTING a title for an essay, a book, a poem, is a joyous thing. It might even be a superb achievement when done with grace, thought, and artistry. Any one of these forms of literary effort, if untitled, is like a child without a name, a king without a crown, or a house without a door.

That skillful effort in the choice of a title is too rarely displayed, is evident when one scans the shelves of any large library, or the rows of books awaiting purchasers in a modern bookstore. I do not know which tendency is the more unfortunate, the old-fashioned "moral" title, "It Is Never Too Late to Mend," or the obscure and abstruse title such as "Thunder on the Left." The effort to discover—or would it be, manufacture? — such book titles, must have been severe, but so, too, would be the effort to depict a smile without a supporting foundation in the form of a face.

The purpose of a title, according to the dictionary, is to indicate in some measure at least, what is the subject of the book, essay, poem, or article. There are times when a title serves to show the purpose of the text. "Mrs. Tompkins' Cookery Book" may be unromantic, but it is splendidly practical. No one could buy that book thinking it to be a collection of poems instead of recipes for puddings.

A friend of mine who is a prolific writer almost invariably selects a title before he writes his articles; and sometimes it takes him as long to select the title as it does to write the text. But, having found it, it becomes a glittering point of concentrated thought into which is distilled the very essence of his subject.

Here, I think, is the nub of the whole question—Why the title? The mere process of evolving a title for one's literary work, is, in itself, of value; particularly if this is decided upon before beginning to write the text. To bring one's subject down to a needle point, and then to thread thoughts through the eye of the needle, is to achieve directness, incisiveness, point.

Consider for a moment a book title like "Grass." The story is one of absorbing interest developed with dramatic power. It deals with the semi-annual migrations of a primitive people somewhere east of Persia. This great trek carries men, women, little children, flocks of sheep, cattle, horses, through torrential rivers, across barren steppes, and up and over a great range of mountains. The journey takes weeks, and is crammed with adventure and hardship . . . and it is necessitated for one purpose only—Grass! Could any other title more dramatically picture this great human struggle that goes on every six months in a secluded and almost unknown part of the Old World where human life is the same as it was in the days of Abraham?

Then there is the interpretive title —that which more or less successfully sums up in a happy phrase or word, the meaning of the text within the covers of a book, or on the page of a periodical. Such titles may be provocative and disappointing in that they reveal too quickly the purpose of the author, when most of us would rather discover this for ourselves. "She Stoops to Conquer" tells the whole story before we have the opportunity of working it out and then epitomizing it as felicitously.

I have sometimes tried to imagine what would happen if some courageous individual published a book without any title at all. Suppose, for instance, the spring list of new publications contained the following, "A book, by Bertie Bates." Assuming that the name of Mr. Bates meant nothing to the great reading public, it would be safe to predict that such a book "without benefit of title" would stand very little chance of success, regardless of the excellence of the subject matter.

And yet very little thought is necessary to convince us that the practice of selecting books by titles only is altogether foolish, and often disappointing. Bread pudding may be called "souffle de Paradis" on the menu of an exclusive restaurant, but it does not change the fact that it is a frequent dessert with frugally conducted families. In the same way many book titles hold out a promise of something which turns out to be commonplace.

I am informed by those who serve in libraries and bookstores that a great many intelligent people do actually select books by titles. This is true of children also. "The Red Rover of Ratapan" sounds like a thrilling narrative to the imaginative boy, and so, for good or ill, he takes the book; and woe be to the author who disappoints him! When I was a child there was a book with the pathetic title of "Ministering Children." It was written from the standpoint that righteousness is always unpleasant, but pays in the long run. It was a saga of impossibly good children—who suffered and served. It was the type of book that ought to have been censored—by the friends of children, at least. But the title was a good one; it was so good that it served the true purpose of a title: it repelled many boys and girls and thus saved them from imbibing a conception of goodness which was unhealthy. When the author in his title gives the prospective reader a clear idea as to what he is going to attempt to do, we may, at least, congratulate him on his honesty.

Then there is the problem of titling poetry, and on this, much might be said. Here the tendency to obscurity is more marked, but with more excuse, for it may well be argued that poetry—especially much modern poetry—is not thought-photography; rather does it resemble impressionistic paintings: in other words, it demands interpretation. A poet-friend whose work finds acceptance in the magazines, often says that the more obscure his verse, the better the chance of acceptance. I think that the poet is well within his rights in selecting a title that is not too obvious at first sight, for he speaks in figures—figures which are to be interpreted only by the reader-poet.

But since there is a poetry that is little more than musical words and prescribed forms, the poet who titles his verse "A Sonnet," or "Triolet," or "A Quatrain," is, perhaps, nearer the truth than he who searches the language for some remote or strange word that yet fails to describe an equally remote and illusory concept.

After all is said—and there is much more to say—giving a title to a book, a poem, an essay, is like giving a title to a man; it may be a delicate and gracious courtesy, or it may be an opprobrium.

There are a few precious books that have outgrown all titles, for any title would still be inadequate. The greatest of these is simply known as "The Bible" or "The Book"; and it is always the "best-seller." A. J. P.

THE CHRISTIAN SCIENCE MONITOR

Woodpecker Tattoos

Be gay now, Spring!
Now is the time, now, now.
Now it is melting-time,
Little black-kettle-time, April-time.
Now it is time for rusted hinges to open,
For the sleeping eaves to yawn,
And for the swallows' wings to brush
Against the lavish rain-silver.

—GEORGE SCOTT GLEASON, in "This My New England."

Picture

Light, warmth, and sprouting greenness, and o'er all
Blue, stainless, steel-bright ether, raining down
Tranquillity upon the deep-hushed town,
The freshening meadows, and the hillsides brown;
Voice of the west-wind from the hills of pine,
And the brimmed river from its distant fall,
Low hum of bees, and joyous interlude
Of bird-songs in the streamlet-skirting wood,—
Heralds and prophecies of sound and sight,
Blessed forerunners of the warmth and light!

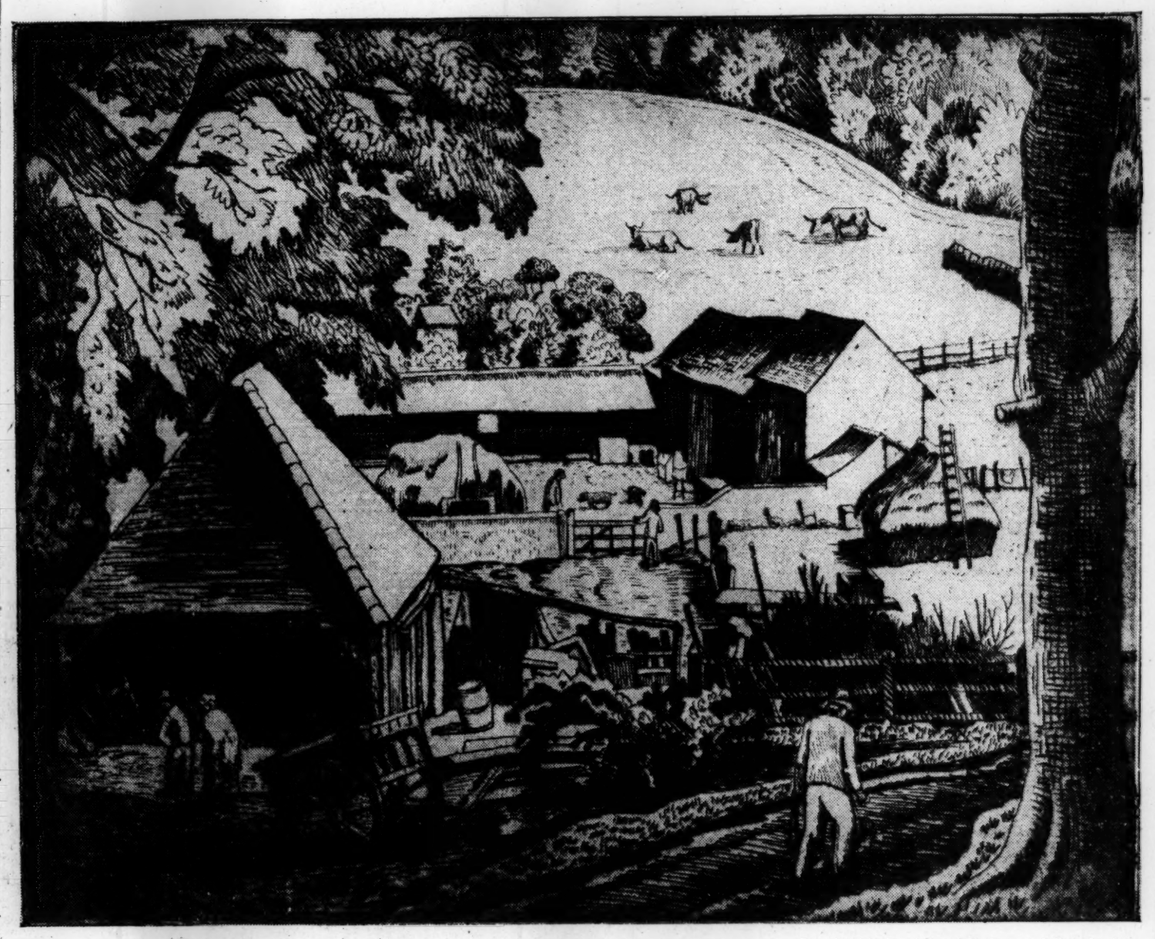

—WHITTIER. Poems.

Vesper

The Vesper star that quivers there,
A wonder in the darkening air,
Still holds me longing for the height
And splendor of the full of night.

Come, quiet night. The day's blue bars
Have dropped and let out all the stars
To flock through heaven till the light.
The day is done. Come, quiet night.

—EDITH WYATT, in "The Wind in the Corn."

The Farm in the Hollow. From an Etching by Ethelbert White

WORKS by the finest artists should be the easiest appreciated and understood by the general public, because their merit is found in clear statements and decisive handling. Art can only be the expression of selected things. When art falls to the level of representation of scenes and objects, there comes deception, because it is impossible to render all the facts of the subject. The leaves on a tree or the blades of grass are beyond accurate presentation. So long as the mood of the subject is faithfully expressed, this should be easily felt by the beholder, and there should be no difficulty in comprehending the accessories contributing thereto. The one who sets out to represent things is bound to produce dull and meaningless passages out of sheer lack of vision and all the limitations of human capacity.

Much of the finest in modern painting is art made easy, and all the possibilities of painting made simpler. After all, painting, like all mediums of artistic expression, is limited and its possibilities are practically all sounded. Sculpture, for instance, can only deal in material forms and their emotional content. The artist is compelled to invent symbols of expression, and unless they are unintelligently formed, they will be readily understood by almost everybody of similar experience.

We accept without hesitation Ethelbert White's formula for trees. The trees in all parts of this etching are unmistakable. He presents in simple and forcible style the forms of foliage and branches, light and shade, trunks and roots. He speaks with authority and brevity, while others ramble and mumble. Turf is definitely distinguished from earthen path; woodwork and brickwork differ from straw and foliage.

Ethelbert White seems to extract the essence of a landscape. We are content with all he gives us while there is never a tantalizing or chance passage in his work; at the same time, he never loses sight of the decorative value of all things pictorial. His work seems to be the result of a rare process of organization and refinement. Facts of a landscape are formed in his thought, then follows a shaping and annealing process, and finally emerges a well-designed and finished article of exclusive brand.

This artist's etching and engraving conveys the spirit of a scene in terms of organized forms and light and shade, but denuded of the frank and delightful color harmonies of his paintings. He discovers the loveliest vistas of rural England, and his work has a healthy appeal. He is in his element as a wandering caravan dweller in the woods and lanes of beautiful Surrey.

Pat

Whenever I returned to my apartment after what Pat appeared to deem a longer-than-necessary absence, I could both hear and see him as I turned the corner into the street in which I lived. Pat strenuously objected to being left behind to await my return, and, on such occasions, he had his own idea of the time at which I should return to make all well with the world. To Pat I was Pippa. On these belated homecomings, the terrier was observed by all passing who cared to see and, not caring, were compelled to notice, by his vociferous barking, punctuated by wails of seeming agony. . . . His voice, megaphonic, far through the quiet evening, was pitched in high key, and so must have been to the neighbors as disturbing as a perpetual fire-siren. The consoling (or advising) words of a passer-by served but to accentuate the blast and raise the note of agony. As I approached the house and waved my hand, he would promptly disappear from the window to dart to the door, thence to rush back, reappearing like a jack-in-the-box, until I reached the street door. Coming upstairs, I would hear excited barks and furious door-scratching—the hysteria reaching a climax when I opened and entered, laden with bundles always, one of them being, generally, the offering of a restaurateur who had "fallen" for Pat and bespoke his affection by votive offerings gratefully accepted by the object and his mistress. . . . Oh, Pat loved reunions as much as he detested partings! —From "Diana Thorne's Dog-Basket," by DIANA THORNE.

London

I had dreamed of dimness, and darkness everywhere;
For folk had said that London was anything but fair;
And yet upon her withered cheek I spied a rose's red,
And in her eyes a glory, and a crown upon her head!

With lovelight and firelight and candlelight, how fair
Was wonderful old London beyond Trafalgar Square!

—CHARLES HANSON TOWNE, in "Today and Tomorrow."

Seats in the Meeting

The only clue to a knowledge of the cause of the fierce and resentful objection of New England young men to permitting the young women of the various congregations to build and own a "maids pue" is contained in the record of the church of the town of Scotland, Connecticut. "An Hurlburt, Pashants and Mary Lazelle, Younes Bingham, prudenc Hurlburt and Jerusha meachem" were empowered to build a pew "provided they build within a year and raise ye pue no higher than the seat is on the Mens side." "Never ye Less," saith the chronicle, "ye above said have built said pue much higher than ye order, and if they do not lower the same within one month from this time the society comitte shall take said pue away." Do you wonder that the bachelors resented this towering "maids pue"? that they would not be scornfully looked down upon every Sabbath by women-folk, especially by a girl named "meachem"? Pashants and Younes and prudenc had to quickly come down from their unlawfully high church-perch and take a more humble seat, as befitted them; thus did their "vaulting ambition o'erleap itself and fall on the other."

Perhaps the Salem maids also built too high and imposing a pew. In Haverhill, in 1708, young women were permitted to build pews, provided they did not "damnify the Stairway." This somewhat profane-sounding restriction they heeded, and the Haverhill maids occupied their undamnifying "pue" unmolested. Medford young women, however, in 1701, when allowed only one side gallery for seats, while the young men were assigned one side and all the front gallery, made such an uproar that the town had to call a meeting, and restore to them their "women's right rights" in half of the front gallery.

Infants were brought to church in their mothers' arms, and on summer days the young mothers often sat at the meeting-house door or in the porch—if porch there were—where, listening to the word of God, they could attend also to the wants of their babes. I have heard, too, of a little cage, or frame, which was to be seen in the early meeting-houses, for the purpose of holding children who were too young to sit alone—poor Puritan babies! Little girls sat with their mothers or elder sisters on "crickets" within the pews; or if the family were over-numerous, the children and the crickets exundated into "the alley without the pues," Often a row of little daughters of Zion sat on three-legged stools and low seats the entire length of the aisle—weary, sleepy, young sentinels "without the gates."

The boys, the Puritan boys, those wild animals who were regarded with such suspicion, such intense disfavor, by all elderly Puritan eyes, and who were publicly stigmatized by the Duxbury elders as "ye wretched boys on ye Lords Day," were herded by themselves. They usually sat on the pulpit and gallery stairs, and constables or tithingmen were appointed to watch over them and control them. In Salem, in 1676, it was ordered that "all ye boys of ye towne are and shall be appointed to sitt upon ye three pair of stairs in ye meeting-house on ye Lords Day, and Wm. Lord is appointed to look after ye boyes yt sitte upon ye pulpit stairs. Reuben Guppy is to look and order soe many of ye boys as may be convenient." . . . I like to think of those rows of sober-faced Puritan boys seated on the narrow, steep pulpit stairs, clad in knee-breeches and homespun flapped coats, and with round, cropped heads, miniature likenesses in dress and countenance, if perhaps not in deportment, of their grave, stern, God-fearing fathers.—ALICE MORSE EARLE, in "The Sabbath in Puritan New England."

Earmarks

How do I know that June is here?
Oh, by this and that—
Susannah Morrow wore today
A flowered leghorn hat.

Frogs relayed the gossip,
Thrushes told the news—
Then, too, when Polly Porter passed
I noticed her red shoes.

How do I know that June is here?
Why, not a sign is missing—
Children's mouths strawberry-stained,
Two young lovers kissing.

And could I tell no other way
I would observe folk's noses—
Their tilt in June betrays the fact
That they are smelling roses.

ETHEL ROMIG FULLER.

My Brook in the Snow

There is a foot of snow on the ground, lying almost level, for it fell quietly, and during a warm day and night, so that it was lightly crusted before the wind came up. Only on the most exposed slopes has the northwest wind, which draws strongly down our valley beneath the shaggy mountain wall, been able to ruffle the surface into tiny drifts, like the waves of a choppy sea, or like the sand of the Sahara. Skeeing rapidly over such a surface is beset with much the same perils as sailing a canoe through a chop.

My brook is now a beautiful thing, not in the least resembling any of its spring or summer aspects. If you should load a flexible brush heavily with black oil-paint, and then draw it in a wavy line across a sheet of thick, soft, clear white paper, you might approximate the appearance of my brook from a slight distance, as it comes down through the pasture. But you could not quite capture, even with the utmost technical dexterity, the delicate undulations of its course. Ordinarily I am aware of it as a coolly gurgling little brown stream, splashing into white over rocks, lined with grasses, weeds and monkey-flowers, but in no sense an exponent of pure line. What line it has is half lost in the grasses. But now it is pure line, a ribbon of velvety black sunk in the deeper white velvet of the snow, a line that tells of every hidden contour of the ground, and, above all, has that sheer beauty of curve which only something that flows can ever completely attain. Coming nearer to it, I find its transformed banks no less strange and lovely. Every rock around which the dark water curves, every grass hassock, is capped with snow like a tiny dome, and all the banks are overhung with snow in a delicate yet abrupt down-sweeping curve, steeper than that of a thatched roof, and almost infinitely varied as the wind above or water below has molded them. It is not until I stand directly over the brook that I see through the black water, swaying gently in the current, the familiar green of living vegetation. My brook in the snow is . . . a single, fluid master-stroke by the Master Etcher.—From "In Berkshire Fields," by WALTER KING STONE.

A Day of Freedom

Or it might be that Ellery Channing came up the avenue to join me in a fishing excursion on the river. Strange and happy times were those when we cast aside all irksome forms and strait-laced habitudes and delivered ourselves up to the free air, to live like the Indians or any less conventional race during one bright semicircle of the sun. Rowing our boat against the current, between wide meadows, we turned aside into the Assabet. A more lovely stream than this, for a mile above its junction with the Concord, has never flowed on earth—nowhere, indeed, except to lave the interior regions of a poet's imagination. It is sheltered from the breeze by woods and a hillside; so that elsewhere there might be a hurricane, and here scarcely a ripple across the shaded water. The current lingers along so gently that the mere force of the boatman's will seems sufficient to propel his craft against it. It comes flowing softly through the midmost privacy and deepest heart of a wood which whispers it to be quiet; while the stream whispers back again from its sedgy borders, as if river and wood were hushing one another to sleep. Yes, the river sleeps along its course and dreams of the sky and of the clustering foliage amid which fall showers of broken sunlight.

So, amid sunshine and shadow, rustling leaves and sighing waters, up gushed our talk like the babble of a fountain. The evanescent spray was Ellery's; and his, too, the lumps of golden thought that lay glimmering in the fountain's bed and brightened both our faces by the reflection. Could he have drawn out that virgin gold and stamped it with the mint-mark that alone gives currency, the world might have had profit, and he the fame. . . . But the chief profit of those wild days, to him and me, lay not in any definite idea, not in any angular or rounded truth, which we dug out of the shapeless mass of problematical stuff, but in the freedom which we thereby won from all custom and conventionalism and fettering influences of men on men. We were so free today that it was impossible to be slaves again tomorrow. When we crossed the threshold of the house or trod the thronged pavements of a city, still the leaves of the trees that overhang the Assabet were whispering to us, "Be free! be free!" . . .

And yet how sweet, as we floated homeward adown the golden river at sunset—how sweet was it to return within the system of human society, not as to a dungeon and a chain, but as to a stately edifice, whence we could go forth at will into stateller simplicity! How gently, too, did the sight of the old Manse, best seen from the river, overshadowed with its willow and all environed about with the foliage of its orchard and avenue, how gently did its gray, homely aspect rebuke the speculative extravagances of the day! . . . It had been a home for many years, in spite of all; it was my home, too; and with these thoughts it seemed to me that all the artifice and conventionalism . . . was but an impalpable thinness upon its surface, and that the depth below was none the worse for it. Once, as we turned our boat to the bank, there was a cloud, in the shape of an immensely gigantic figure of a hound, couched above the house, as if keeping guard over it. Gazing at this symbol, I prayed that the upper influences might long protect the institutions that had grown out of the heart of mankind.—NATHANIEL HAWTHORNE, in "Mosses from an Old Manse."

Opening the Cupboard Door

It is not at all essential that it shall be a cupboard of dignified origin and beauty of design such as issued forth of yore through the doors of Chippendale and Sheraton. Some, of the simplest appearance, seen from without, have held the most entrancing secrets. And cupboards, like people, vary in character. There are some so all embracing that their complacence remains unchanged even if filled with the most miscellaneous collection of things from the shadowy recesses of their topmost shelf to the modest lowliness of their floor space; whilst others it would be impossible to imagine other than affronted unless each piece of clothing, or china, or silver, intrusted to their charge, were placed in orderly array.

Then, too, what diversity in their actual form! Who can compare the oak court cupboard of Jacobean days, carved and inlaid, with the lacquered cupboard of a later date, its Chinese garden scenes deftly painted upon a soft cream ground; or the German cupboard of golden cypress wood, richly carved, with one from the Tyrol, strongly hinged and locked with iron; or the tall Breton cupboard of chestnut, with the Spanish cabinet of walnut, each with its own beauty and the sense of something hidden within.

If the doors are opened of one of the powder closets of Queen Anne's day (built into the walls of those paneled and painted bedrooms, so that they formed a recess for the great four-poster bed, and were in themselves like tiny rooms, each with a window of many small panes looking down on the terraces of gay flowers and smooth green lawns), does there not seem to hang about its little space a faint elusive scent of evanescent perfume? It was left there long ago by those rustling ladies who sat in their brocaded and flowered negligees having their hair dressed with powder, finally to be adorned with garlands of flowers, or a coquettish beribboned hat! Can imagination not see them again with their white curls, rosy cheeks, bright eyes; and the polite barber telling the news of the day as he did his office.

But perhaps the charm of cupboards began in earliest days, when a child went with Mother Hubbard to her far-famed cupboard in search of a bone for her dog, and found, alas, the shelves empty! But what followed? Such laughable escapades on the part of the dog, and how the kind dame hurried to replenish her stores and feed him. Then as children grew a little older they were initiated into their more practical but no less pleasant attractions. What more delightful than to have a peep into Grandmamma's capacious store cupboard, her linen cupboard, her china closet. And who does not remember the joy and dignity of being permitted to visit with her, hand in hand, the shadowy recesses of the old wall cupboard, wherein, smelling rather pungently of camphor, were wonderful frocks, all frilled and flounced, and laid away in crisp paper. Here a creamily shining satin, once white, a myrtle wreath, a pair of tiny slippers. "Your great-grandmother's wedding gown," says Grandmamma, touching it very gently. "And here is the gown your great Aunt Lucy wore for the Court Ball," flounced pink taffeta, garlanded with roses.

And one more cupboard to which, it may be, a child would play truant, and slip away alone. It had glass doors, and they were closed, but the key was always in the lock, and if the child climbed upon the sofa she could turn it, open the door, and take out one of those books of adventure or history which wafted her away into another world, into strange undiscovered lands, introduced her to new friends, and led to such marvelous happenings, and exciting adventures. Yes, a wonder world of magic may be entered at the opening of a cupboard door!

The Law of Giving

WRITTEN FOR THE CHRISTIAN SCIENCE MONITOR

IT IS the general belief that prosperity is dependent upon active business conditions and that, to be active, business must consist in buying, selling, acquiring. Efforts are made to create a demand for what there is to supply and to keep money in circulation, the thought being that if the specie should be stored away, stagnation and depression would ensue in place of the activity which keeps in motion the so-called waves of prosperity. However, there are financiers who admit that the true ideal which underlies good business is the bestowing of something which supplies a need rather than the selling of any commodity for the sake of selling. It is not too transcendental to believe that the best business practice is based on the fundamental rule of rendering good to the recipient, who gladly gives an equivalent in return.

Christ Jesus said, "Give, and it shall be given unto you; good measure, pressed down, and shaken together, and running over, shall men give into your bosom." Out of his immeasurable love, Jesus gave much and well knew the joy of giving. Tenderly compassionate, he gave unstintedly everywhere, supplying every need which was presented to him; and he taught his disciples to do likewise. The pure desire to give to others, and the compassion which moves one to give wherever there seems to be need, are motives inseparable from the act of true giving. Jesus said, "Give, and it shall be given unto you." In other words, Give, and thus conform to the operation of the law which brings good back to you—brings back the bread cast upon the waters.

Money is not the only thing one may give, or share, thus preparing to receive reward in kind. This law holds good in giving forth human affection, mercy, tolerance, forbearance, forgiveness, compassion, kindness, tenderness, friendship. What wealth one may bestow when granting mercy, and be blessed in so doing, since the great Teacher said, "Blessed are the merciful: for they shall obtain mercy"! One may give forth joy, gladness, happiness; so similar blessings will flow into his own life. One may express gratitude, thereby opening unthought-of channels through which the riches of God's love may flow also to him. Gratitude constantly opens new channels through which the abundance of good may return to bless.

Giving is a general characteristic in nature. The trees give shade, shelter, food, and beauty; the flowers give loveliness and fragrance; the birds give melody and joy; and all receive the sustenance they require. If the birds and the grass of the field give so much, should not men, upon whom the Father of all has bestowed unnumbered blessings, give of their abundance, especially since, as Mary Baker Eddy has written in "Science and Health with Key to the Scriptures" (p. 79), "Giving does not impoverish us in the service of our Maker, neither does withholding enrich us"?

The teaching of Jesus concerning giving is accepted as law by Christian Scientists, and they understand that when, because of love for humanity and pure delight in giving, one shares with others the blessings he has received from divine Love, the inexhaustible source of good, he comes into conformity with the law which governs supply and demand, and accordingly receives in one form or another all needful supply. The amount or quantity received does not depend upon the gift, but upon the love which prompted the giving; and love renders thought receptive to good. When there seems to be dearth in receiving, the Christian Scientist finds it important to investigate his giving, its method, and the sincerity, selfless love, and wisdom of his motives.

It is also understood in Christian Science that the channel through which one gives is not necessarily the channel through which blessings return, since primarily every good gift is from God. When one unselfishly, wisely, and therefore rightly permits blessings to flow through his right thinking to others, he is to that extent reflecting God; and his reward will be liberal, since God, divine and all-loving Mind, gives all good. The more one gives in reflected wisdom and love, the more he receives. The manifold blessings God bestows, cannot decrease, be destroyed, or lost, since, as Mrs. Eddy writes (Science and Health, p. 519): "Imparting has not impoverished, can never impoverish, the divine Mind. No exhaustion follows the action of this Mind, according to the apprehension of divine Science." The law of giving is inseparable from the law of loving.

SCIENCE AND HEALTH
With Key to the Scriptures
By
MARY BAKER EDDY

PUBLISHED BY THE TRUSTEES UNDER THE WILL OF MARY BAKER EDDY

The original, standard and only Textbook on Christian Science Mind-healing, in one volume of 700 pages, may be read or purchased at Christian Science Reading Rooms throughout the world.

It is published in the following styles and bindings:

Cloth $2.00
Ooze sheep, vest pocket edition, India Bible paper. 3.00
Morocco, vest pocket edition, India Bible paper.... 3.50
Full leather, stiff cover, same paper and size as cloth edition 4.00

PROFIT-TAKING ENCOURAGED BY HIGHER PRICES

Considerable Selling Takes Place in Stock Market After Advance

NEW YORK (AP)—The early advance in prices proved too good to be true, and was largely wiped out in a new selling wave in the New York stock market.

The violence of the rebound Thursday only attracted renewed bear selling, and a more favorable opportunity for uneasy traders still anxious to lighten their holdings.

The reduction from 3 to 2½ per cent in the New York rediscount rate immediately enlivened the demand for gilt-edge bonds, but had only a passing influence on stocks.

The stock market opened with another abrupt upturn, perhaps more in response to the $211,000,000 drop in brokers' loans than to the lower rate, but early gains were soon canceled, and prices dropped swiftly under aggressive selling around midday. Soon after 10 o'clock, however, trading slackened, and support appeared.

There was a growing feeling in brokerage circles that prices would be unlikely to go much lower, at least would not, on the whole, break through the levels of Nov. 13, but commission house advices still remained cautious, and there was no inclination to predict a rising market.

Reassuring was the action of one large wire house in reducing its marginal requirements to approximately 25 per cent of market value. Furthermore, it was learned that some investment trusts were actively buying stocks.

Erratic Fluctuations

Wall Street did not see how the lower rediscount rate would have much immediate influence, as banks are largely out of debt and do not feel the need of borrowing at the Federal Reserve, but it was, on the whole, favorably regarded in its longer term implications.

Call money held officially at 2½ per cent. It was rumored that the Federal Reserve had reduced its buying rate for shorter term acceptances to 2 per cent. The Reichsbank cut its discount rate from 4½ to 4 per cent.

Some of the high-priced stocks fluctuated erratically. Case moved up 7 points in the early trading, dropped 20 from the top, then rallied. Important shares generally gained 1 to 4 points at the opening, lost their gains and sold off 1 to 7, then rallied a point or two from the bottom.

Such shares as Consolidated Gas, American Can, Westinghouse Electric, Eastman Kodak, Coca Cola, Byers, Western Union, Johns-Manville, Loew's, Standard Gas and Bethlehem Steel lost 3 to 7 points around midday.

U. S. Steel sold off more than 3, then rallied substantially.

The low prices of the day for many utilities and other popular shares were reached in the last houh when the bears started a decline that erased much of the midafternoon 1-to-4 point rallies.

Some of the reactions from the forenoon highs were pronounced. J. I. Case toppled from 192 to 171; Eastman Kodak from 208⅞ to 192; Westingtonhouse from 142½ to 133; Vanadium Steel from 84¼ to 73½; American Can from 124 to 155, and American Telephone from 211 to below 205. The closing was weak. Total sales approximated 3,800,000 shares.

Bond Trading Active

A wide list of railroad bonds advanced sharply as the market for fixed income-bearing securities responded to the low level of money rates.

The market presented a good tone, and trading was at a rate above the average for the last six weeks.

The reduction of the rediscount rate by the New York Federal Reserve to 2½ per cent was accepted in banking circles as an indication that the cheapest credit condition in many years is to continue.

Bond men hope that banks, faced with the necessity of finding profitable employment for their funds, will now turn to bonds. A strong market is regarded as a necessary first step toward recovery of business, and the current spread between money rates and bond yields, it is believed, will stimulate interest in these securities.

A better inquiry was shown for the best grade liens, and gains ranged from a small fraction to one point. In addition, the improved tone of stocks influenced convertible issues toward higher ground and the most spectacular gains were in this group.

Among the rails in demand were Canadian Pacific 4s, Chesapeake & Ohio 4½s, Erie 4s, St. Paul 5s, Southern Pacific 4s, Southern Railway 4s, Nickel Plate 5½s, New York Central 4s, Pennsylvania 4½s and New Haven 4½s.

The improvement among utility issues was less marked. American Telephone 5s and International Telephone 5s were steady. Utah Power & Light 5s were active and strong, gaining ¾ of a point in the early trading.

Convertibles turned heavy after the early upturn in stocks had been lost.

Foreign bonds were quiet and steady. Chile 5s sold off nearly a point. The principal western European governments were little in demand and ruled generally unchanged. Only a small block of German 5½s changed hands in the early dealings at the offering price of 90.

Liberty 3½s climbed to a new high for the year. Other U. S. Governments were steady.

Financial circles heard that the Pacific Gas & Electric Company contemplated a $50,000,000 4½ per cent bond issue.

AMERICAN LAUNDRY MACHINERY

NEW YORK—General Laundry Machinery Corporation announced negotiations have been completed for the sale of its laundry machinery division to the American Laundry Machinery Company. The acquisition is for an outright cash consideration, reported to be well in excess of $1,000,000. A special meeting of stockholders has been called for June 27 to approve the sale and to vote on changing the name to the Tollhurst Corporation.

BITUMINOUS COAL LOADINGS

Loading of bituminous coal at Lake Erie ports during the week ended June 16 totaled 1,357,522 tons, compared with 1,214,536 in the like week last year. For the season to June 16 total loadings were 10,922,966 tons, compared with 10,827,106 in the corresponding period last year and 7,957,169 in the like period in 1928.

CALUMET & ARIZONA MINING CO.

The Calumet & Arizona Mining Company is to suspend operations of its leaching and electrolytic plants at the New Cornelia mine division at Ajo, Ariz., in an effort to obtain more economical operation during depressed conditions in the copper metal market.

GERMAN DISCOUNT RATE CUT

BERLIN—The German Reichsbank reduced its discount rate from 4½ per cent to 4 per cent.

SOUTHERN COTTON CROP CONDITION BELOW AVERAGE

SPECIAL TO THE CHRISTIAN SCIENCE MONITOR

MEMPHIS, Tenn.—The 1930 cotton crop in the mid-South showed a condition as of June 15 somewhat below the preceding 10-year average, according to reports from practically every county in the territory embracing Tennessee, Mississippi, Arkansas, Louisiana, Missouri and north Alabama compiled here.

The Atlantic states, the southern third of the Gulf states and most of Texas and Oklahoma shows a relatively advanced condition.

Germination has been materially retarded in the mid-South by cool nights and a deficiency of rainfall. Floods in Louisiana have prevented an expected increase in acreage. Throughout the mid-South the Farm Board's pleas for reduction in acreage has received only a mild response.

LEHIGH VALLEY LOSS

NEW YORK—Lehigh Valley Railroad Company for the quarter ending March 31 reports net loss of $17,052 after taxes and charges, contrasting with net income in the first quarter of 1929 of $875,858, equal, after dividend requirements on the 10 per cent preferred stock, to 72 cents a share (par $50) on the 1,210,034 shares of common.

OMITS DIVIDEND

LONDON—Elder, Dempster & Co., one of the steamship companies of the Royal Mail group, is passing payment of preference dividends.

CITY OF BOSTON NOTES

NEW YORK—Salomon Brothers & Hutzler purchased the $3,000,000 Boston tax notes, due Oct. 6, 1930, on a 2.38 per cent basis, plus a premium of $37. The bonds were reoffered immediately to yield 2¼ per cent.

ARUNDEL CORPORATION GAIN

Arundel Corporation in the five months ended May 31, 1930, earned $1.73 a share on 492,500 no-par shares, compared with $1.25 a share in the like period of 1929.

MARKETS AT A GLANCE

BY THE ASSOCIATED PRESS

NEW YORK

Stocks: Weak; bear selling unsettles market.

Bonds: Strong; easy credit influences sharp rally.

Curb: Weak; leaders lose Thursday's gain.

Foreign Exchanges: Firm; sterling advances.

Cotton: Steady; improved trade demand.

Sugar: Steady; trade support.

CHICAGO

Wheat: Weak; good rains Canada and weakness Liverpool.

Corn: Easy; forecase beneficial rains and sympathy with wheat.

Cattle: Steady.

Hogs: Weak to lower.

AUTOMOBILE SALES

NEW YORK (AP)—May automobile registrations for 18 states indicate that retail automobile sales for the month were about 75 per cent of sales for the like month last year, a statement authorized by W. P. Chrysler, chairman of the board of the Chrysler Corporation, announced today. Chrysler Corporation increased its output in May 8½ per cent compared with April, without increasing the net number of cars on hand with dealers.

METROPOLITAN BUILDING

NEW YORK—Contracts let for new building in the metropolitan area of New York from June 7 through June 13 totaled $13,516,400, says F. W. Dodge Corp. This was at rate of $2,252,700 per business day. In June of last year the daily rate was $3,392,400. Since the beginning of the year awards are $468,489,900, compared with $547,582,900 a year before. Work reported during the week as in contemplated stage totaled $30,406,000.

PENNSYLVANIA POWER & LIGHT

Pennsylvania Power & Light Company reports for 12 months ended April 30 surplus after preferred dividends of $7,079,460, compared with $6,881,028 in the preceding 12 months. April net income after taxes and charges was $913,649, compared with $888,105 in April, 1929.

WESTERN AUTO SUPPLY

May and five months sales of Western Auto Supply Sales Company compare as follows:

	1930	1929	Dec.%
May sales	$1,361,750	$1,382,043	1.4
Five months	5,096,632	5,157,647	1.2

WORLD COPPER PRODUCTION

World copper production amounted to 147,352 short tons (2000 pounds) in May compared with 144,298 tons in April; 148,005 tons in March and 192,589 tons in May, 1929, according to the American Bureau of Metal Statistics.

PARK & TILFORD PROFIT OFF

NEW YORK—Park & Tilford, Inc., for the quarter ended March 31 reports profit of $107,510 after depreciation, but before federal taxes, compared with $264,835 in the first quarter of 1929.

CANADIAN AUTO EXPORTS OFF

WASHINGTON—Exports of Canadian automotive products in April were $1,349,325, compared with $2,549,971 in March and $2,823,712 in April, 1929, the Department of Commerce reports.

LEAD IN BATTERIES

Manufacturers of lead storage batteries consumed 210,000 tons of lead and antimony in 1929, compared with 220,000 tons in 1928, according to the American Bureau of Metal Statistics.

DOUBTFUL OUTLOOK FOR STEEL TRADE

NEW YORK (AP)—A sharp drop in steel specifications from automobile makers and an increasingly general tendency toward seasonal retrenchment in other steel consuming industries, are too sweeping in their effects to be offset by the large business in line pipe and the growing demand for structural steel, Iron Age says in its weekly review of the industry.

"Curtailment in automobile production in July will prove more drastic, it now appears, than was recently expected," the review states. "Indications are that several motorcar plants will shut down for two weeks or longer next month and that the general average of operations for that industry will fall to 50 per cent of capacity."

COMMONWEALTH & SOUTHERN CORP.

Gross earnings of Commonwealth & Southern Corporation and subsidiaries for the month of May, 1930, amounted to $12,007,867, as compared with $12,143,373 for May last year. Net for May was $6,032,968, as compared with $6,081,676 in May, 1929. For the 12 months ended May 31 gross earnings amounted to $147,247,919 and net to $75,295,319, compared with $142,224,837 and $72,300,310 for the previous 12 months. Earnings applicable to dividends after provision for retirement reserve are equivalent to slightly more than 70 cents a share on the common.

GERMAN INTERNATIONAL LOAN

LONDON—British applications up to £500 for the German international loan will be allotted in full and above that figure approximately 49 per cent. Total applications amounted to nearly twice the amount offered. Failure of the loan to maintain a premium is thought partly due to S. Parker Gilbert's report, in which he criticized German budgetary finance.

STOCK EXCHANGE FIRM SUSPENDS

NEW YORK (AP)—The New York Stock Exchange firm of Woody & Co. was suspended today for insolvency. It was the first failure since the crash of last fall.

BEET SUGAR PRICE ADVANCE

Great Western Sugar has advanced the price of refined beet sugar to a 4.50-cent basis in all territory west of Chicago.

BERLIN BANK RATE REDUCED

BERLIN (AP)—The Reichsbank discount rate was reduced to 4 per cent today and the Lombard rate to 5 per cent.

LIVE-STOCK PRICE TREND STILL DOWN

Dressed Meat Market Lower —Receipts Overabundant —Hogs Are Weak

SPECIAL FROM MONITOR BUREAU

CHICAGO—With the exception of lambs, which were in seasonably light supply and sold close to steady, all classes of live stock continued to go down during the week ended June 19, according to a report by the bureau of agricultural economics, United States Department of Agriculture.

This week's break in prices was the culmination of a number of bearish factors. All classes of dressed meat sold sharply lower, and, even at lower prices, supplies accumulated in packing house coolers. In addition, there was some increase in receipts, and the general decline that was widespread through the commodity markets of the country had its influence on the live-stock trade.

Cattle sold mostly 50 to 75 cents lower for the week, and current prices at $1.50 to $2.25 lower than three weeks ago. It was simply a case of too many cattle, and late in the week selling agencies were exerting their efforts toward slowing down the marketward movement for the coming week.

The extreme top was $12.75, but relatively few loads beat $12, and the cattle selling from $10 to $11, a spread that took a liberal percentage of the week's supply had seen a long turn in the feed lot.

Fed steers sold down to $9.25, and there was an increased percentage of grass cattle that were bought on down to $7 and below. Only a few fat cows sold above $8.25, and a spread of $6 to $7, was comprehensive of the bulk at the decline. Yearling heifers sold as high as $11, early but bulked from $9.25 to $10 on closing rounds.

Hog prices were dealt the most severe setback in weeks, and for the first time since January the top dropped below the $10 mark. On today's market good to choice 160 to 300 pound weights sold from $9.55 to $9.85, and nearly one-third of receipts were packing sows that brought from $8.25 to $8.85. Good to choice 110 to 150 pound weights sold from $9.25 to $9.75.

It was the light supply of lambs that held the market in the face of the limited demand. Native offerings sold mostly from $12 to $12.25 on the close, although choice loads sold up to $12.75 early.

Idaho lambs topped at $13, and the most of the yearlings brought from $9 to $10. Fat ewes were steady at the lowest prices of the season, a spread of $2.50 to $3.50 taking the bulk.

DIVIDENDS

Magma Copper Company declared a quarterly dividend of $1, placing the stock on a $4 annual basis, compared with $5 previously. The dividend is payable July 15 to stock of record June 30.

Selected American Shares Corporation declared the regular semiannual dividend of 25 cents a share, payable June 30. Coupons will be payable to Foreman State Trust & Savings Bank.

Pacific Gas & Electric Company declared the regular quarterly dividend of 50 cents on the common stock, payable July 15 to stock of record June 30.

McCord Manufacturing Company declared the regular quarterly dividends of 50 cents on the debenture stocks, $1.75 on the preferred A and $1.75 on the preferred, all payable July 1 to stock of record June 23.

Aero Supply Manufacturing Company declared the regular quarterly dividend of 37½ cents on the class A stock, payable July 1 to stock of record June 20.

Economy Grocery Stores Corporation declared the regular quarterly dividend of 25 cents, payable July 15 to stock of record July 1.

Link Belt Co. declared the regular quarterly dividend of 65 cents on the common, payable Sept. 1 to stock of record Aug. 15.

Aero Supply Manufacturing Co. declared the regular quarterly dividend of 37½ cents on the class A stock, payable July 1 to stock of record June 20.

Stahl-Meyer, Inc., declared the regular quarterly dividend of 30 cents on the common, payable July 2 to stock of record June 25.

City Machine & Tool Company declared the regular quarterly dividend of 40 cents on the common, payable July 1 to stock of record June 20.

Brompton Pulp & Paper Company declared the regular quarterly dividend of 50 cents, payable July 15 to stock of record June 30.

Otavia Copper Corporation, working in South Africa, but with headquarters in Berlin, continued to pay a 15 per cent dividend this year on 16,000,000 marks capital.

Philadelphia Insulated Wire Company declared the semiannual dividend of $2.50, payable Aug. 1 to stock of record July 15.

Filing Equipment Bureau, Inc., declared the regular quarterly preferred dividend of $1.75 a share, payable July 1 to stock of record June 20.

Nipissing Mines Company declared the regular quarterly dividend of 7½ cents, payable July 21 to stock of record June 30.

Irving Air Chute Company states the dates previously published for the payment of the quarterly dividend of 25 cents have been changed to be payable July 3 to stock of record June 27.

Arundel Corporation declared the regular quarterly dividend of 75 cents on the common, payable July 1 to stock or record June 23.

Associated Security Investors, Inc., declared the regular quarterly dividend of 40 cents on the common, payable July 1 to stock of record June 20.

National Shawmut Bank of Boston declared the regular quarterly dividened of 75 cents, payable July 1 to stock of record June 20.

Chemical National Bank of New York declared the regular quarterly dividend of 45 cents, payable July 1 to stock of record June 20.

Bank of Europe Trust Company declared the usual extra dividend of 25 cents and the regular quarterly of 75 cents, payable July 1 to stock of record June 20.

A dividend of $1.03 has been declared on the American shares of Rudolph Karstadt, Inc., payable July 1 to stock of record June 23.

United Porto Rican Sugar Company declared the regular quarterly dividend of 87½ cents on the preferred, payable July 1 to stock of record June 23.

Cleveland, Cincinnati, Chicago & St. Louis Railroad has declared a semiannual dividend of $5 on the common, placing the stock on a $10 annual basis, compared with $8 previously. The regular quarterly dividend of $1.25 on the preferred was also declared. Both dividends are payable July 31 to stock of record July 21.

Thatcher Manufacturing Company declared the regular quarterly dividends of 40 cents on the common, payable July 1 to stock of record June 20, and 90 cents on the convertible preference stock, payable Aug. 15 to stock of record Aug. 5.

Michigan Stel Corporation declared an extra dividend of 1 per cent in stock, payable Oct. 20 to stock of record Sept. 20, and the regular quarterly of 62½ cents, payable July 21 to stock of record June 30. The stock dividend is at the same rate as that declared some time ago, which is payable July 21 to stock of record June 30.

City Investing Company declared a dividend of $2.50 on the common, the same as a year ago, payable July 7 to stock of record June 30. The regular quarterly of $1.75 on the preferred was also declared, payable July 1 to stock of record June 26.

American Screw Company declared the regular quarterly dividend of $1.50 a share, payable July 1 to stock of record June 20.

Central Vermont Public Service Corporation declared the regular quarterly dividend on the common stock of $1.50 a share, payable June 30 to stock of record June 14.

Twin State Gas & Electric Company declared the regular quarterly dividends as follows: $1.75 a share on the priod lien stock, $1.25 on the 5 per cent preferred and $2 a share on the common stock, all payable June 30 to stock of record June 14.

Freeport Texas Company declared the regular quarterly dividend of $1, payable Aug. 1 to stock of record July 15.

Lead	.0540	.0550	.0700
Print cloth	.0425	.0437½	..

COTTON PRICES STEADIER

NEW YORK (AP)—A further advance on covering and trade buying in cotton here was checked by realizing or reselling by recent buyers who appeared to be influenced by reports of renewed weakness in grain and stocks and a favorable weather map. After selling up to 13.98 early, July reacted to 13.71, or 13 points net lower, while new crop positions sold about 3 to 6 points below Thursday's closing quotations. Offerings were not as aggressive as recently, however, and prices stiffened up again during the afternoon on a steadier turn in stocks and renewed covering.

MANHATTAN SHIRT EARNINGS

Manhattan Shirt Company, including Solway Dyeing & Textile Company, for the six months ended May 31, 1930, reports net of $201,720 after taxes and all reserves, equivalent after dividend requirements on the 7 per cent preferred to 67 cents a share (par $25) on 283,577 shares of common, compared with $507,842, or $1.71 a share on the common, in the corresponding six months of the previous fiscal year.

BROKERS' LOANS OFF

WASHINGTON—Loans on stocks and bonds to brokers and dealers by reporting Federal Reserve member banks in New York City during the week ended June 18 decreased $211,000,000 to $3,787,000,000. This compares with $3,998,000,000 on June 11 and $5,420,000,000 on June 19, 1929.

GAMEWELL CO. INCOME

Gamewell Co. and its subsidiaries report for the fiscal year ended May 31, 1930, net income of $1,017,812, equivalent to $8.56 a share on the 118,928 shares of common stock outstanding.

LONDON QUOTATIONS

LONDON (AP)—Consols for money today were 54⅝. De Beers was 7¾, Rand Mines 3. Bar silver was 15 13-16d. an ounce, money was 1⅝ per cent. Discount rates on short bills were 2¾ to 3 per cent; three months 2½ per cent.

U. S. REALTY CONTRACTS

Directors of George A. Fuller & Co., a United States Realty subsidiary, have approved contracts aggregating $4,600,000.

FEDERAL LIGHT & TRACTION

Federal Light & Traction Co. (excluding New Brunswick Power Co.), for the 12 months ended March 31, reports net of $1,676,733 after federal taxes, interest, depreciation, preferred dividends of subsidiaries, etc., equivalent, after dividend requirements on the $6 no-par preferred, to $3.64 a share (par $15) on the average common shares during the period, and $3.06 a share on 470,524 common shares outstanding March 31.

SUPERHEATER CO. NET

NEW YORK—Superheater Co. for the year ended Dec. 31, 1929, shows net of $3,989,764 after depreciation, federal taxes and minority interests, equal to $4.11 a share on 970,705 no-par shares. For the year ended Dec. 31, 1928, net was $2,942,419 after depreciation, federal taxes, minority interest and after deducting $200,000 appropriation to special reserves, equal to $3.03 a share.

HORSCH PASSES DIVIDEND

BERLIN—Horsch A. G., leading manufacturers of high-grade cars, passed the dividend this year after paying 8 per cent last. Sales increased to 36,000,000 marks from 28,000,000 and profits remained on as high a level as before, but were employed to write off debts. In addition to 5,000,000 marks in common shares, the company has 17,000,000 of short-term debts.

STRENGTH IN WHEAT FOLLOWED BY SLUMP

CHICAGO (AP)—Wheat prices tumbled downward here today after a brief show of strength at the start had resulted from higher quotations at Liverpool. Prospects of increasing pressure of newly harvested domestic winter wheat in the Southwest had a bearish influence, together with favorable spring crop conditions in states northwest.

Opening unchanged to ¾ cent higher, Chicago wheat afterward reacted to well below yesterday's finish. Corn and oats developed weakness also, with corn starting at ⅛ cent off to ½ cent up, and subsequently declining all around. Provisions advanced.

Opening prices were: Wheat, July, 96⅝@¾c; September, 99¾c@1.00; December, 1.04½@¾. Corn, July, 76¾c; September, 75⅝@¾c; December, 70¼c. Oats, July, 36⅝c; September, 37½c; December, 40¾@⅞c.

AMERICAN ROLLING MILL

NEW YORK—American Rolling Mill Company reports for the quarter ended March 31 net of $730,404 after interest, depreciation and federal taxes, equivalent after 6 per cent preferred dividend requirements to 51 cents a share (par $25) on 1,428,698 shares of common. Net sales were $13,902,055; net $1,939,972; interest, $410,329; depreciation, $724,400; federal taxes, $74,839; net profit, $730,404; preferred dividends, $330; common dividends, $715,381; surplus, $14,693.

AMERICAN WATER WORKS

The American Water Works & Electric Company reports that power output of its electric subsidiaries for May totaled 159,795,728 kilowatt hours, a decrease of 2 per cent from the output of 163,044,729 kilowatt hours for the like month last year. Output for the five months ended May 31 totaled 810,569,712 kilowatt hours, 3 per cent greater than the output of 790,757,226 kilowatt hours for the corresponding period last year.

BROOKLYN & QUEENS TRANSIT

Brooklyn & Queens Transit Corporation reports for 11 months ended May 31 net of $2,306,064 after charges, equal after allowing for dividend requirements at rate of $4 per annum on 283,250 no-par shares of preferred to $1.58 a share on 800,000 shares of no-par common, compared with $1,542,559 or 62 cents a share on common based on above shares. May net was $310,385, compared with $282,503 in May, 1929.

Shrewd Investors Buy ... when the Mass Sells

The stock market is dominated by mass psychology. Bull markets and bear markets are both developed to extremes by this force. Success lies in not blindly following the crowd.

History proves that the investor who over a period has countered speculative opinion at critical points invariably has profited. He has bought when others were willing to sell at his price — not against the competition of a multitude of other buyers after a prolonged bull market. Large financial interests acquire stocks when uninformed speculators desire or are forced to sell.

The present offers unusual buying opportunities for those who believe in the industrial future of the United States and its major corporations — who are shrewd enough to buy outstanding common stocks at deflated levels. While it is humanly impossible to determine precisely the lows of any market movement the best financial and investment minds agree to the attractiveness of many high grade equities at current levels.

***North American Trust Shares**

provide an undivided interest in a list of 28 New York Stock Exchange aristocrats deposited with the Guaranty Trust Company of New York, Trustee. The law of averages works to the benefit of the purchaser of this trust, the largest of the fixed type in America. It represents an intelligently diversified interest in basic American industry.

THINKS END OF BEAR MOVEMENT DENOTED

"The current opinion that the bear movement must last until trade improves, unemployment diminishes and prices recover has very little evidence to stand upon," says Howard-Erickson Company, Boston.

"In the past, the stock market has habitually begun to improve in advance of these other factors. For instance, in 1924, 1914, 1908, 1904, 1906 and 1893, commodities continued declining past the bottom of the stock market fall. In every instance in American history, radical unemployment and bad slump in commodity prices has denoted the end of the bear movement and the bargain day in securities.

"Thus the current pessimism is a lame sentiment, rather than a prophetic vision. We believe this to be the proper time to buy good stocks."

REDISCOUNT RATE REDUCED

NEW YORK (AP)—The New York Federal Reserve Bank has reduced its rediscount rate to 2½ per cent from 3 per cent. The latter rate had been in effect since May 2. This is the first time that a 2½ per cent rate ever has been in effect at the New York Federal Reserve Bank. The previous rate of 3 per cent had prevailed between Aug. 8, 1924, and Feb. 27, 1925.

FOOD BUSINESS SATISFACTORY

NEW YORK—A current survey by Standard Statistics Company says that, viewed in relation to current depressed conditions, leading manufacturers, preservers and distributors of food products continue, on the whole, to enjoy a moderately satisfactory volume of business, although selling prices are below 1929 levels.

BORDEN ACQUISITIONS

The Borden Company has acquired the Jessup & Antrim Ice Cream Company of Indianapolis for 6000 shares of Borden capital stock, and the Cairns Creameries, Ltd., of Niagara Falls, Ont., for 3481 shares of stock. The listing of these 9381 shares of additional stock will bring Borden's total outstanding capital up to 4,065,972 shares of $25 par value capital stock.

PREFERRED DIVIDEND 79

The regular quarterly dividend of one and three-quarters per cent has been declared by the Directors of this Corporation, payable June 30, 1930, to preferred stockholders of record June 28. Checks will be mailed.

M. B. PERRY, Treasurer.

AMERICAN TRUST SHARES

A record total distribution of about $11,000,000 will be made to holders of North American Trust Shares on June 30, constituting a new high semiannual disbursement for this fixed trust. This distribution, which will aggregate about $1.30 a share, will compare with 51.4 cents a share made on Dec. 31, 1929, or $2,000,000. On June 30, 1929, the trust disbursed $938,490 in dividends. There are now outstanding 8,300,000 shares.

LIBRARY GROUP BEGINS MOVE TO LINK ACTIVITIES

Special Libraries Society Holds Convention in San Francisco

SPECIAL FROM MONITOR BUREAU

SAN FRANCISCO—A movement to coördinate business and public libraries throughout the United States was begun by delegates to the twenty-seventh national convention of the Special Libraries Association, in session here June 19. A committee will be appointed to determine the best methods of achieving this result, it declared by William Alcott of Boston president of the association.

Following a suggestion by Robert Rea, librarian of the San Francisco Public Library, it was voted to start a nation-wide survey to ascertain the opinions of prominent librarians on this subject.

Purd Wright of the Kansas City Public Library, declared that every special library should be a branch of a public library and that the two should coöperate. The time has come when the public library should be able to furnish technical and business information as well as meet the demands of the ordinary reader, he stated.

The part that the newspaper librarian plays in publishing a newspaper by furnishing information to the city editor and editorial writers was described by members of the newspaper group. Systems of filing clippings and photographs, for future use, were discussed.

Miss Helen Peffer, who started the first class for newspaper librarians in this country at the University of Illinois in 1927, declared that a standard method of filing should be adopted so that students could be trained to fill positions on any newspaper. The lack of uniformity in methods, she stated, made it difficult to prepare for the position of newspaper librarian.

The Dialer's Guide

Features followed by sponsor and network in parentheses. "CBS," "CBS Chicago" and "CBS Pacific" are general networks of Columbia Broadcasting System. "WEAF Chain," "WJZ Chain," "NBC Chicago" and "NBC Pacific" are networks of National Broadcasting Company. These are followed by "—T" when coast-to-coast hookup is employed. When only single station is used its call letters will be given. All time is eastern daylight except "Chicago" and "Pacific," which are given in respective times. All time p. m. unless otherwise stated.

FOR SATURDAY, JUNE 21

Address by Dr. Julius Curtius, German Minister of Foreign Affairs (WEAF—T). From Berlin studios of the Reichs Rundfunk Gesellschaft. Frederic M. Sackett Jr., American Ambassador to Germany, will speak and introduce Dr. Curtius. Music by male chorus. 7:30.

Vocal and Instrumental

Earle Spicer, baritone; male quartet; orchestra (Fuller—WJZ—T). "Volga Boatmen Song" and "The Floral Dance" are Mr. Spicer's solos. In medley from "The Vagabond King," there will be soprano and quartet choruses. Medley of three popular songs of several years ago, by quartet. 7:30.

Slumber Music Ensemble (WJZ Chain). "When Day Is Done," "Moonlight on the Ganges," "In the Good Old Summertime," "Londonderry Air," "All Alone" and "Romona" are of more popular appeal. Male quartet and orchestra. 11.

Orchestral

Black and Gold Room Orchestra (WEAF—T). Serious classics. Most humorous bits, Wheeler's "The Little Clock on the Mantel" and selections from "The Mikado." 6.

"Strings and Bows" (WJZ Chain). "Souvenir" and "Chanson Louis XIII and Pavine," solos by Godfrey Ludlow, violinist. Most foreboding piece, "Dance of the Camorrists," from "Jewels of the Madonna," by the orchestra. Other ballads of Haydn-Wood, Moszkowski, Jacchia, Lohr and Savino, by orchestra. 10.

Band Music

Goldman Band Concert (WJZ—T). Excerpts from grand opera on the first outdoor concert of the season at New York University Campus. Bellstedt's "Prince's Alice" (Fantasie), by Del Staigers, cornet soloist. 8:30.

Arthur Pryor's Band (General Electric—WEAF—T). Most familiar are "Second Connecticut" and "Polonaise-Mignon." Characteristic bits reminiscent of Norway, the Soudan, the South Seas and Scotland, in turn. 9:30.

Rhythmic Music

Paul Ash and Paramount Orchestra; vocal soloists; Jesse Crawford, organist; male quartet; Giersdorf Sisters, vocal trio (Paramount Publix—CBS—T). Talking picture tunes. 10.

Characteristic Music

Crockett Mountaineers (CBS—T). Hill Billy music. 7.

"Dixie Echoes" (CBS—T). Negro spirituals. 8:30.

Vocal Ensembles

"Dandies of Yesterday" (WJZ Chain). Old-time ballads by male quartet. 6:15.

"Del Monte" Program (California Packing—WEAF Chain). Radio versions of current talking pictures, direct from Hollywood, featuring original stars. 8:30. NBC Pacific program. 9.

Recitals

Caroline Andrews, soprano (WJZ Chain). "Moment Musicale." 8:15.

"In the Spotlight" (WEAF—T). Mixed quartet of well-known NBC soloists and orchestra. 9.

Dramatic Sketches and Music

"Amos 'n' Andy" (Pepsodent—WJZ Chain). 7. NBC Chicago and Pacific. 10:30.

"The Jameses" (WEAF Chain). Fourth of July pageant rehearsal. 7:15.

"The Fairies' Well" (CBS—T). Irish comedy drama in Hank Simmons's Show Boat period. 9.

Talks

"Ted Husing's Sportslants" (CBS—T). The sport column of the air. 6:30.

"Topics in Brief" (Funk & Wagnalls—WJZ Chain). Interpretations of the news by Floyd Gibbons. 6:45. NBC Chicago and Pacific. 10:45.

"Exploring the Jungle for Science" (CBS—T). Dr. Arthur Torrance. 8.

"The Romance of the Shoe" (CBS—T). Harold C. Keith, of Brockton, Mass., president of the National Boot and Shoe Manufacturers' Association, in Columbia's "Romance of American Industry" period. 8:15.

FOR SUNDAY, JUNE 22

Vocal and Instrumental

Major Bowes Capitol Theater Family (WEAF Chain). Little comment needed on this program. If you follow it at all, you know all about it. 5.

Emmerich Kalman, Viennese composer (Atwater Kent—WEAF—T). Operettas by this interesting person are now being revived for the talking pictures. This program will be devoted to his works Elliot Shaw will sing where that is essential. 9:15.

"The Philosopher and the Lady" (WJZ Chain). This song cycle for four voices by Easthope Martin will be featured in the Tone Pictures program. Lew White is at the organ. 8.

"In the Time of Roses" (WEAF Chain). Mrs. H. H. A. Beach's "Dusk in June" will be the fitting opening number of this program. 9:45.

Band Music

Franko Goldman and His Band (WJZ Chain). You know summer has come when this program is announced if by no other sign. What can equal the Goldman concerts from the Mall in Central Park, New York? They are just different, that's all. This is the first Sunday concert of the season. It lasts 45 minutes. 8:30.

Vocal Ensembles

Mixed Quartet (Enna Jettick—WJZ—T). "School Days," "Love's Old Sweet Song" and many others which will carry listeners back to the days before radio, automobiles and airplanes. 8.

"Gather Ye Rosebuds" (Canadian Pacific—WJZ Chain). Don't confuse this title with the mere name of a song. It is a whole opera of the ballad type, with air composed over three centuries ago. The program originates in the studio of CKGW at Toronto. 9:15.

Characteristic Music

"Neapolitan Nights" (WJZ Chain). Soloists mandolin quartet and orchestra. 1:30.

"Spanish Dreams" (WEAF Chain). Julian Oliver, Spanish tenor, and typical orchestra. 1:30.

"El Tango Romantico" (WJZ Chain). Rhythmic Latin dances. 7.

South Sea Islanders (WJZ Chain). Hawaiian group. 10:45.

Russian Cathedral Choir (WEAF Chain). Folk songs, religious and master composer works. 11:15.

Rhythmic Music

Don Carlos' Marimba Band (WJZ Chain). Tangos and a medley of sound picture and show tunes. 4:30.

Fred Waldner, tenor; Oilomatics Orchestra (Williams—WJZ Chain). 7:30.

Vocal soloists; male quartet; piano duo; Choral Orchestra (Standard Brands—WEAF Chain). Arrangements of popular ballads. 8:30.

Paul Specht and his Band (Majestic—CBS—T). Noted leader takes over musical end of this hour. It is a welcome change. The last band was pretty ragged. Paul is an artist. 9.

Jean Goldkette's Champions (Studebaker—WEAF—T). 10:15.

Orchestral

Roxy Symphony Concert (WJZ Chain). One hour. 2.

Recitals

Joe White, "Silver Masked Tenor" (WJZ Chain). Familiar ballads. 6:15.

Lew White, organist; Genia Fonariova, soprano (WJZ Chain). Standard classics.

"Nocturne" (WJZ Chain). Devora Nadworney, contralto; string trio. 11:15.

Sam Herman, xylophonist (WEAF Chain). 11:45.

Dramatic Sketches and Music

"Battle of Lake Erie" (Iodent—WEAF Chain). "Bob" Emery in Big Brother Club period. 7.

"Sunday at Seth Parker's" (WEAF—T). 10:45.

Talks

Sir Thomas Lipton (CBS—T). Noted yachtsman speaks directly from London via short waves, telling of his new challenger, Shamrock V. 12:30.

"Our Government" (WEAF Chain). David Lawrence, Washington editor. 9.

Removal of Police Chief Advocated

HARTFORD, Conn. (AP)—Removal of Garrett J. Farrell, head of the Hartford police department, was recommended June 19 in a report submitted to the Superior Court by the special grand jury which since January has been investigating liquor traffic and alleged police corruption in Hartford County.

The report, which contained a severe denunciation of the Hartford police department, specifically charged Chief Farrell with being "unsympathetic" toward the enforcement of the prohibition laws and withholding from the police commission information concerning an alleged liquor law violation.

Detective Sergeant Nicholas H. Gallicchio was also singled out for criticism. He was charged in the report with failing in his duty and described as "an outstanding and conspicuous example" of police laxity.

HENRY R. MURPHY APPOINTED

HARTFORD, Conn. (AP)—The appointment of Henry R. Murphy of Boston, assistant to the commissioner of the Massachusetts State Department of Public Welfare, as secretary of the Connecticut Children's Aid Society was announced June 19. He will succeed Ralph Barrow, resigned.

MORE THRIFT NEEDED IN U. S., SAY BANKERS

American Institute Would Make Nation 'Less Stock Market Minded'

SPECIAL TO THE CHRISTIAN SCIENCE MONITOR

DENVER, Colo.—Members of the committee of public education of the American Institute of Banking, in their report presented at the institute's annual convention here on June 19, state that what the United States needs is less speculation and more thrift, rededicating themselves in the task of making the American people "less stock market minded."

As to future plans, the public education committee stated that it intends to continue its widespread program to teach the public the essentials of thrift, through radio speeches and published articles.

Ralph G. Holste, credit manager of the Central Trust Company of Detroit, denounced the steady encroachment by savings and loan associations on the realm of the savings bank. Either this encroachment must be stopped, he said, or savings and loan associations must be subjected to the same legal restrictions as govern savings banks.

The purpose of savings and loan associations originally was to promote home ownership, Mr. Holste said, and as long as they held to that objective they fulfilled a definite mission. The present tendency of such associations, however, is to compete with savings banks while still operating under the freedom of savings and loan associations, he declared.

Troubles in the real estate bond field might have been largely avoided by more careful underwriting methods, Ivan D. Carson, assistant sales manager, Greenebaum Sons Investment Company, Chicago, told the investment banking conference. He recommended a larger application of the methods employed in general corporate security underwriting to the issuance of real estate bonds.

"It is treu in the real estate field as in any other that the only safe thing to rely on to meet interest and principal payments is earnings," he said. "Percentage of valuation is important but in the final analysis it is income that counts. Also experience indicates that a wider use should be made of the sinking fund principle. Capable management of a business is one of the factors essential to satisfactory experience with the company's securities."

The responsibility of directors was discussed by William H. Lindsay, auditor Provident Trust Company, Philadelphia, who said in part:

"The greatest responsibility of directors is to see that their institution is kept in such condition that the depositors, trust clients and other customers suffer no loss and that the services rendered are the best possible commensurate with the compensation received. Their moral is as real as their legal duty. Courts have held that directors stand in a fiduciary capacity to the corporation and the stockholders and the powers incident thereto have more latitude than those of the trustees appointed by deed, will or decree of court. This wider freedom imposes stricter responsibility to perform every duty with the utmost care.

"The directors should elect the president rather than have the president elect the directors which so often happens. It is easy for some men to become dominating, instead of directing, directors. Others are mere rubber stamps dominated by the operating head of the institution. A happy mean should be the aim. The board room should be the place where policies are formulated rather than details acted on."

DENVER, Colo. (AP)—Limitation by banks of so-called convenient services was discussed before the convention of the American Institute of Banking by R. E. Chambers, vice-president of the National Shawmut Bank, Boston.

A survey has revealed, Mr. Chambers said, 105 types of service rendered by banks, ranging from helping a store owner to keep his windows clean to free use of a bank's airplane. General abuses, the speaker said, and creation of good will accounted for most of the service.

"We should not condemn all services that do not show profit. It is in keeping with recognized methods of good business for a bank to determine whether a service extended to its customers is profitable. On the other hand, an undue amount of free service, like misdirected charity has an undesirable effect on the customer as well as losing money for the bank."

Frank Fuchs, advertising manager of the First National Bank of St. Louis, speaking at another conference, said the bank has become a department store of finance and lives by the sale of service and credit.

400,000 WHITE PINES PLANTED BY CHILDREN

SPECIAL TO THE CHRISTIAN SCIENCE MONITOR

DURHAM, N. H.—One thousand New Hampshire boys and girls planted 400,000 white pine seedlings on 400 acres of nonproductive land this season, according to a check-up just made by K. E. Barraclough, extension forester, University of New Hampshire.

The grand total for the State is 836,785 new trees. Of the 400,000 placed by boys and girls, 361,500 were planted by 821 4-H club members; 36,750 by 13 Smith-Hughes vocational agricultural schools; and 1750 by juvenile granges.

FISHING OPERATIONS TO BE CONTROLLED

PROVIDENCE, R. I. (AP)—Declaring that there has been serious depletion of the numbers of migratory coastwise fishes and that individual states are powerless to coöperate with seining and other fishing practices which make great inroads upon sea fish, the Rhode Island Commission on inland fisheries June 19 adopted a resolution urging the Federal Government to take steps to control coastwise fishing operations.

The resolution urges Rhode Island members of Congress and the director of the bureau of fisheries, United States Department of Commerce, to seek the necessary federal legislation.

LINDBERGHS LAND ON HARTFORD FIELD

HARTFORD, Conn. (AP)—Col and Mrs. Charles A. Lindbergh made a surprise visit to Hartford June 19, landing at Brainard Field.

About a week ago it was announced that Mrs. E. K. Dillingham of Texas, a cousin of Mrs. Dwight Morrow, mother of Mrs. Lindbergh, had leased a 25-room house in Old Lyme. It was then assumed that the Lindberghs might be summer guests at Old Lyme.

Among the Railroads

Reduced rates from all midwestern cities served by the New York Central Lines to New York and Boston have just been announced, the latitude allowed travelers by the rates and routes being particularly interesting at a time when various railroads are experimenting with "bargain rates" to create new business.

From the various points both on the New York Central and west of its territory, including such diverse points as St. Paul, Denver, Oklahoma City, Galveston and other cities, the rates apply on two bases: the first, a 30-day-limit ticket to New York, with stop-overs at Niagara Falls, a boat trip on Lake Erie between Detroit and Cleveland or Buffalo, and the boat line up or down the Hudson River between New York and Albany.

The other type of ticket is a 60-day limit, offering a diverse route for various destinations in the East. Under these tickets one may visit Niagara Falls, Boston, New York, Philadelphia, Atlantic City, Washington and Pittsburgh in one trip.

The first-mentioned round trip—30-day-limit plan to New York—is sold from Chicago, for example, at a rate approximately 50 per cent above the one-way ticket. The other—60-day limit with diverse route going and returning—is approximately 80 per cent over the one-way fare, but the diverse routings allowed permits more actual mileage than would be possible in straight tickets east or west bound.

To Boston, the 60-day plan applies from all points in the Midwest and Southwest, with optional routes both ways. Any train may be used (upon payment of extra fare) excepting the 20-hour trains between Chicago and New York.

Newspapers on Air Line

Copies of The Christian Science Monitor are to be carried in planes of the Stout Air Lines in the Chicago-Detroit-Cleveland route of that company's services as a result of negotiations with Glenn G. Jury, general traffic manager. The Stout Lines, termed the "oldest passenger air line in the United States," maintains the following departures daily, except Sundays:

From Cleveland at 10:30 a. m. and 4 p. m. for Detroit, and Chicago, the flight to Cleveland taking approximately 1½ hours and the through journey to Chicago 4½ to 5 hours, the morning planes stopping at several Michigan points en route. Local Cleveland-Detroit planes depart at 1:30 and 6 p. m. From Detroit an early morning plane at 9:05 a. m. makes a three-hour flight to Chicago. Four Detroit-Cleveland planes depart daily, and from Chicago the three eastbound planes depart at 1:30, 3 and 4:30 p. m. The first-mentioned goes through to Cleveland via Detroit and the latter two to Detroit only.

Copies of this newspaper will be placed in these various ships as rapidly as arrangements can be completed.

Observation Platforms

During recent months four complete new trains have been placed in service. Of these the Chief of the Sante Fe (Chicago-Los Angeles), the North Coast Limited of the Northern Pacific (Chicago-Seattle) and the La Salle of the Chicago & Eastern Illinois (Chicago-St. Louis) have open observation platforms, indicative of the belief of the respective managements that passengers prefer the open rear ends as a respite from the remainder of the trains, which, especially in cooler weather, are without any open portions. Since the new equipment was established, the North Coast has been handling extra sleepers daily to carry the business presenting.

The only rear observation platform of the inclosed type on the four trains in question is that on the Yankee Clipper of the New Haven Railroad, between Boston and New York.

Sale of Sections

The Pullman Company, in conjunction with railroads, is endeavoring to increase the sale of entire sections to individuals, a reduction of 22 per cent being offered under the total of a lower and upper berth. Exclusive occupancy not only insures the use of the section alone during the daytime, but means that at night the upper berth will not be pulled down, thus making easier the process of retiring and arising in the morning and permitting freer circulation of air.

A competitive campaign between Pullman conductors to sell sections to passengers was instituted. In the first three weeks of May, 1600 whole sections were sold in this manner. One conductor, J. L. Clements, operating in various runs east of Chicago, sold 137 sections in the month of May, up to the Decoration Day week-end. On the Dixie Flyer, to Jacksonville, he sold 10 sections on one trip and on station duty at Chicago one night sold 23 sections in the Motor City Special to Detroit and two to other points.

Rail-Motor Tours

The Southern Railway is offering combined rail-motor tours through the mountain sections of Virginia, North Carolina, Georgia and Tennessee, 25 different possible routes being available. Round-trip tickets with 15-day limits are available, baggage being checked on the rail portions of the tickets, and either cross-country jaunts by motor between rail points, or extensions to the rail journey may be made by bus in this manner.

Boat Trains

Regular "boat trains" will hereafter be operated by the Pennsylvania Railroad, to meet outgoing ships of the North German Lloyd Line, including the steamships Bremen, Europa and Columbus. These trains will run directly to the pier in Brooklyn, using the Long Island tubes from Pennsylvania Terminal, New York, and thence swinging around Brooklyn on a freight track. Through sleepers from various midwestern points will be assembled in the train at Pittsburgh for movement to the pier.

Of Interest to Travelers

Through sleepers between New York and Old Point Comfort are now being operated by the Pennsylvania and the Chesapeake & Ohio Railroads. The journey is approximately 13 hours.

A through sleeper from New Orleans to Denver will be operated by the Illinois Central, Frisco Lines and the Union Pacific, leaving New Orleans at 8:40 p. m. and arriving at destination at 1 p. m. second day, via Memphis and Kansas City. Eastward, cars leave Denver at 3 p. m. arriving New Orleans the second morning.

Cape to Cairo

The Travel Trip Supreme

Through the heart of Africa from South to North—rich with marvels, mystery, romance.

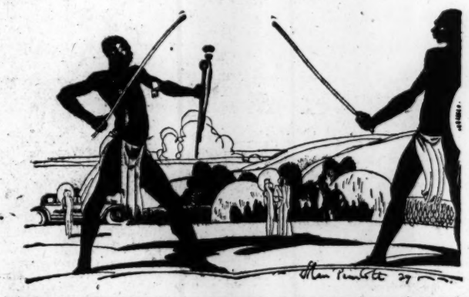

First the wonders of Southern Africa—Capetown and its glorious surroundings—Cango Caves—world's greatest diamond and gold mines at Kimberley and Johannesburg—5,000,000-acre wild game preserve—Zimbabwe ruins—Victoria Falls.

Then equatorial forests—glamourous rivers—mighty inland lakes—vast mountain chains, intriguing deserts and lands of ancient mysteries. Side trips to bizarre East African ports via the trails of Livingstone and Stanley and the paths of old slavers and ivory hunters.

Meet Zulus, Matabele, Swahilis, Fuzzy-Wuzzys and Arabs en route, and see Africa's extraordinarily varied game—lions, elephants, hippos, rhinos, crocodiles, in their habitat.

Here is an amazing trip to stimulate the imagination and provide a store of unforgettable travel memories. Modern railroads, steamers, motors and hotels.

Tours from Capetown to Cairo arranged for individuals and parties. Write for booklet RE 2, Director, South Africa Tourist Bureau, Room 657, 11 Broadway, New York.

Household Arts and Crafts

Aids That Make Cleaning Easy

V—A Sparkle in the Window Panes

By BERTHA STREETER

THE home maker puts so much time on so many things that show so little that it is a source of satisfaction to accomplish something that does justice to the labor expended upon it. Perhaps that is one reason why housewives for generations have taken such pride in clear, sparkling windows, for everybody knew that they could be the result only of painstaking effort. Effort worthy of an acrobat to preserve one's balance on a stepladder, or on chairs or boxes piled one on top of another; effort to prevent water from slopping; effort to scrub until the grime was off, then to rub until the shine was on!

Indeed, this phase of housework has so long been associated with these disadvantages that even today there are home makers who are convinced that unless washing windows takes considerable time, the panes cannot be clean. But when one compares the old method with the new, it is quite remarkable to what extent time and labor may now be saved through inexpensive window-washing devices.

Among the new commercial appliances there seem to be one or more to suit every woman. For the home maker who prefers to wash windows with a cloth, but would like an easier way to dry them, there is the squeegee with its rubber edge and convenient handle. The pane is dried from top to bottom with this device, the lower portion last, by drawing the drier crosswise. After each stroke the rubber edge should be wiped off with a cloth or chamois to prevent streaking.

Sets for Washing and Drying

A squeegee and a strong horsehair brush make a set appreciated by other women, for with the brush it is much easier to get into cracks along the edge of the glass than it is with a cloth. Both these methods require the presence of the worker close to the windowpane.

To eliminate the climbing and reaching that most women find objectionable in window washing, some manufacturers put out a brush specially designed to do this work, and a squeegee window drier. Both have handles almost five feet long. In addition, one can buy extension handles of the same length, each complete with a clamp for attaching it to the handle of the window washer or the drier, so when the extension is made one can easily reach to the top of windows 12 feet or more from the ground. In one such combination window set the drier fits securely on the handle of the window brush and so follows the brush down, thus drying the pane as fast as it is washed. In another combination, the washer is a sponge and one turns the handle over as needed to use the drier.

Still another type of window washer is of commercial size and has a water tank that holds enough to wash 15 large windows, with a long squeegee wiper directly above it. Another similar washer has an enameled rust-proof water tank from which the water is self-feeding through a pad. In another type, the water is contained in a steel handle and the tank is sealed by a cover into which the handle of a broom or mop may be inserted to reach high windows. All these appeal to a great many home makers because they are inexpensive and practical and they eliminate entirely the carrying of water.

Such devices are of great assistance in washing the outside of windows on the first floor, but for the second story, unless a device described on this page on May 16 be installed to permit swinging the outside of the pane around into the room, one will need to do the work by reaching from the inside. Here the long-handled bath-tub brush may be used to advantage in the washing of the windows, and the squeegee for drying them.

Materials

For washing windows, usually nothing more than clear warm water is necessary. If the windows are particularly grimy, as in the kitchen where there is apt to be a film of grease on the panes, a few drops of ammonia will facilitate the cleaning. some experts use a small amount of kerosene instead, because besides cutting the grease it leaves a brilliant luster. Others prefer the fine friction cleansers or pastes, or whiting moistened with a little water if the glass is especially soiled; the chief objection to the latter being that it often leaves a white dust hard to get rid of.

Denatured alcohol is also good for cleaning glass. It evaporates rapidly and leaves a brilliant sheen. Although it is most effective when used concentrated, it need not always be used that way, for a small amount may be added to the wash water just as one would use kerosene or ammonia.

When cloths or chamois are to be used in cleaning windows, it is an excellent plan to wipe the panes first with a wad of dampened paper, that of the tissue toweling type being especially good for the purpose. This removes most of the grime so that the other cleaning agents do not get soiled so quickly. Some women follow this plan by merely rubbing with a dry piece of old taffeta silk, which leaves the windows bright and clear. Many home makers who use chamois for this purpose do their window washing between times of loading the washing machine on wash day. Instead of taking the time to wash out the chamois, this arrangement does that work for them by merely dropping the skin into the machine, whence it emerges ready for the rest of the windows or for drying.

In winter, windowpanes may well be wiped with a handful of tissue paper dipped in ammonia or alcohol, then polished with dry paper. Alcohol not only leaves a sparkling glass, but it also prevents its gathering frost as fast as it does otherwise, so the idea is especially applicable to the washing of the windows and the windshield of the car during very cold weather.

Lengthening Sheets

IN MANY homes there are sheets stored away and seldom used because they are not quite long enough to tuck under well as lower sheets, or to be turned back over the upper blankets, as upper sheets. A little study on the part of one housewife who possessed a drawer full of such linen resulted in a very satisfactory solution of how to make it available for use.

Since solid color, she thought, or just a hem in color, is attractive and in good style, why not sew a pastel-tinted strip at the top end of each sheet, thus providing the desired length and at the same time introducing a new gayety.

Each wide top hem was opened and a new wide hem in color added. In the case of some very short sheets, it was necessary to add a band 15 inches wide, that is, 15 inches after the hem had been turned over and sewed.

Colors were chosen with due regard to the fact that some of the fashionable shades for sheets are peach, light green, orchid, orange, maize, and of course pink and blue, although the latter two are mostly for children's rooms.

Colored hems were added also to some pillow cases so that they might match the sheets.

Some of these sheets and pillow cases had their colored hems or wide bands set off with hemstitching, but others, intended for everyday use, had the new material put on plain, the lovely colors themselves being sufficiently decorative.

Rubber Spatulas

Rubber spatulas, used by many housewives for scraping dinner dishes before washing, are also good for other purposes. One woman keeps a clean one especially for the use of scraping mixing bowls. It is surprising how much cake batter can be coaxed out of a mixing bowl by means of a rubber spatula after the big spoon has done its best.

A Waterfall Curtain With Widely Scalloped Edge.

Designs for Summer Curtains

SPECIAL FROM MONITOR BUREAU
London

FROM the feminine point of view, some of the most enjoyable hours in the garden are those when it is warm enough to sew under the trees. But the right type of work is important; it must be something not too bulky and heavy, nor requiring too close attention.

What better than some summer curtains, than which few labors repay more generously the time bestowed on them. The fashion for voile, etamine, muslin and net have revived interest in stitchery that is quickly accomplished and looks equally attractive on both sides of the work. Draw about three threads every two inches across a fine ivory voile curtain, but instead of hemstitching the spaces fill them in by a darning stitch in colored embroidery cotton. The darning must be quite even, passing under and over the same number of threads.

A plain net may be made beautiful by a darning stitch also. Iron a simple transfer onto a piece of stiff white paper, which acts rather as an embroidery frame, and then darn the design on the net, in a self-colored embroidery cotton. The idea is appropriate not only for curtains but for table mats or dressing-table runners.

Madras muslin, on the other hand, lends itself better to a bright-colored embroidery, or appliqué work, and a gay border of balloons for nursery curtains may well be made from scraps left over from little summer frocks.

In the popularity of what are known as "store" curtains—the full-length plainly hanging fabric, one Old World curtain of peculiar charm is sometimes forgotten. The waterfall curtain, beloved of our grandmothers, is well suited to the window that is slightly overlooked from a higher level, or by contrast has a not very inspiring outlook.

It is easily made. A square of material is cut diagonally, and the two curtains when hung by their straight edges should meet at the center of the rod, and fall away in flutes at the sides, leaving a triangular vista through the glass. The curtains can be scalloped and bound with a contrasting shade, or are perhaps more picturesquely completed with a frill of their own muslin or voile. Our grandmothers would have considered an essential accompaniment to such a scheme a "posy" of flowers, bound rather closely and placed in a big bowl. It would be a charming and summery surprise to come upon a landing window with curtains in daffodil voile and against them a bowl of cowslips in green pottery; or as an alternative, a sprigged muslin waterfall curtain framing a generously filled bowl of old-fashioned cabbage roses against a latticed pane.

Home Making

By MRS. HARRY A. BURNHAM

SOMEONE has said that every big job is a bundle of little jobs. This applies with peculiar aptness to the job of home making. People who enjoy analyzing and deducting have at different times listed the many and varied matters on which home makers are called to exercise specialized and expert knowledge. These lists include more than "57 varieties."

Wrapped up in every one of these bundles are sure to be some jobs the performance of which one person will enjoy more than she will most of the others, and these personal likes and dislikes will vary with every bundle and every person. Herein lies a wide field for mutual helpfulness.

On an attractive street just at the outskirts of a large city is a little single house where lives a woman who has in former days been very active. Her children and their friends have been her chief interest and responsibility, and then, suddenly it seemed to her, she found herself alone in the old home. She became appalled by the realization that she was no longer necessary to the comfort of her family; they were in homes of their own living the self-reliant lives for which she had trained them.

* * *

After some time of making futile attempts to enjoy unlimited leisure to which she had looked forward she found that too much leisure was not conducive to happiness. One day while talking with a neighbor she remarked casually that she had always enjoyed darning socks and wished that she had more of it to do. The neighbor had several children and eagerly said that it would be a great relief to her if the weekly care of the family socks could be attended to. This was arranged. The news spread throughout the neighborhood until the once lonely woman has built up a lucrative business and is again happy and useful. She has lifted from the bundle one of the little jobs which she enjoys and at the same time has eased the burden of overflowing bundles in other homes.

It is a delightful experience to pass her little vine-covered porch and see her sitting in her ladder-back chair slowly rocking back and forth as she plies her needle to the accompaniment of the gently hummed strains of an old familiar tune.

* * *

This woman's experience is not confined to those who feel the urge for more activity. Often a short time given to analyzing one's preferences will change one's entire outlook on life.

Some years ago a young man consulted me as to what he should do about his education. His parents had insisted on a classical course in high school. He was not interested and was not doing well, consequently he was becoming discouraged. I asked him this question: "Entirely disregarding everything that has been said to you, if you had your own choice, what would you do?" Without a moment's hesitation he said, "I would make a garden."

This led to his taking a course at a state agricultural college and later owning a delightful and successful small fruit and poultry business. His family are happy at his success; he is respected and admired by everyone, and all because he picked out of the bundle before him the job which he enjoyed and then worked to make it a real achievement.

Steps Made Visible

When back stairways are dark or the cellar steps difficult to see, a border of white paint along the edge of the steps is very useful in helping one to find one's way up and down. The steps are generally painted all over so as to harmonize with the walls or floors. After this is dry, the white paint is applied in a strip about two inches wide, or a little less, along the outer edge of the tread of each step. A strip of the same width is also painted at the top of the perpendicular side or riser of each step, so that there is a guide in going either up or down.

Using Garlic Well

IN THE best French cookery where garlic is used, the resultant flavor is so elusive that its presence in many a delicately seasoned dish is hardly suspected. This is the mere soupçon (suggestion) so often mentioned in French recipes and which is entirely apart from a clearly defined item of flavoring. It is this mere hint of garlic that often causes the housewife interested in cookery to wonder at the flavor of a restaurant entré or salad, not realizing that the unfamiliar and agreeable taste is due to the cautious use of a pungent little bulb possibly ostracized from her own kitchen because of her prejudice against garlic.

The French housewife, as well as the chef, not only uses garlic sparingly but "avec discretion." This word of warning is worth remembering as it is "discretion" that is necessary if the addition of this particular seasoning is to be sufficiently delicate to be enjoyed. The use of garlic in a mixed vegetable salad is perhaps its best known form in the average home. This is the French "chapon" or garlic-flavored cube of bread into which are pressed bits of the innermost parts of a single cut clove of garlic. When the crumb is well impregnated with the garlic flavor it is put in the salad bowl and tossed with the salad ingredients. It is removed just before the salad is served. Another method of imparting this elusive flavor is by rubbing the salad bowl with a cut clove of garlic held on the tines of a fork. If preferred, merely the bowl of the salad spoon, in which the dressing is mixed, may be rubbed with a bit of this aromatic bulb. After being cut, the clove of garlic should not be touched with the fingers as the peculiar odor has an unusual lingering quality. Garlic-flavored oil and vinegar are also much used by expert salad makers, and a small piece of this seasoning is sometimes put in the dressing just before it is to be used, beaten for a minute or two and then removed.

In all such uses of garlic, Sydney Smith's familiar recipe for potato salad should be borne in mind and paraphrased to read:

"Let garlic's flavor lurk within the bowl
And, scarce suspected, animate the whole."

Another method of using garlic so that it may be "scarce suspected" is especially adapted to baked entrées, such as escalloped preparations of vegetables, meat, fish or fowl. If the baking dish is rubbed with a cut clove of garlic before being buttered, the garlic flavor will be so evenly distributed as to be hardly distinguishable and still add an agreeable pungency to the contents of the dish. In preparing a cooked sauce, a cut clove of garlic added for three or four minutes and then removed will impart sufficient flavor to suit most tastes.

Like the onion and the leek, garlic belongs to the lily family, though its bulb has an entirely different formation. Each bulb is composed of a number of "cloves" or "kernels" quite distinct from one another and encased in a smooth, strong skin. Each clove must be peeled and cut into halves or quarters in order to release the flavor, one of these subdivisions often being sufficient for seasoning a good-sized dish. The remainder of the bulb can be left intact and another "clove" removed when needed. There is no odor from garlic until peeled and cut, so that its presence with other vegetables on hand, even in a small space, is not objectionable. A single bulb can be bought at a time and costs but a few cents.

Pink Grapefruit

PINK-FLESHED grapefruit is a novelty that the modern hostess should welcome to her table. In flavor this rose-tinted pulp is in no way superior to the grapefruit to which one is accustomed, but because of its novelty "pink grapefruit" is being extensively featured at smart hotels and restaurants, and when purchased at a fancy fruiterers commands a higher price than the ordinary grapefruit.

So many hostesses favor pink as a table decoration that this novel grapefruit is likely to be included, in one form or another, on many a luncheon or dinner menu. It is particularly lovely to look at when set on opalescent or frosted glass, the tablecloth being of ivory tone and the decorations pale rose. A pastel-pink cloth would also make a beautiful picture, the rose-tinted grapefruit for the first course being on the table when the guests enter the room. When used as a fruit cup, the rosy segments are often combined with half the quantity of ordinary grapefruit, the unusual coloring being more noticeable when so served. When used as a fruit salad or in a fruit cup, shredded pineapple, either fresh or canned, is an excellent combination, both of flavor and color.

The majority of the pink grapefruit now in the market is said to be shipped from Texas, where it is being extensively cultivated because of the higher price to be obtained for such a novelty. It is also cultivated in Florida.

Cooling Summer Beverages

SUMMER days are play days in most families, whether the vacation is spent at home or in the country. Jane and Junior ply their particular hobbies undisturbed by school régime. Their mother simplifies her housework and enjoys the leisurely calm of the warm hours in reading, sewing, or indulging in other pleasurable occupations crowded out by the winter's activities.

But summer also makes many extra demands on the home maker. One of the most imperative of these is that she must be prepared to serve light refreshments at all hours. A woman's ingenuity is called into activity to serve the family and friends with delightful salads, sandwiches, and especially with cool drinks having an unusual tang.

Some of the ones listed below may be presented to guests more daintily by freezing tiny flowers such as violets, either natural or candied ones, in the ice cubes, which should be added to the beverage just before serving. Another idea is to float a tiny pansy or nasturtium in each tall glass of refreshment or to drop several of them in a pitcher of the beverage. Still another way, is to place the blossom on the side of the plate which contains the sandwich.

Holiday Fruitade

For each person, fill a tall glass one-half full of cracked ice and add 1 tablespoonful of lime juice, 1 tablespoonful of lemon juice, 1 tablespoonful of orange juice, 2 tablespoonfuls of grape juice or two-thirds of a cupful of ginger ale. Add 1 tablespoonful of powdered sugar and fill the glass with water.

Lemonade or Orangeade, Individual Portions

For each person, fill a tall glass one-half full of cracked ice and one-half of a cupful of cold water. Add 1 to 2 tablespoonfuls of lemon or orange juice, 1 to 2 tablespoonfuls of powdered sugar. Add either thin slices of the rind of the lemon or orange or sliced pieces of the whole fruit.

Egg Lemonade Fruited

This recipe makes enough for two people. Fill two glasses half full of cracked ice. Add 1 tablespoonful of chopped fruit, peaches, crushed berries, bananas, or pineapple. Now beat in the slightly beaten egg and add the juice from 1 lemon and 3 tablespoonfuls of sugar. Fill the glass with either plain or charged water. Shake well, and chill thoroughly before serving.

Ginger Ale and Grape Juice

Add equal portions of grape juice and ginger ale to a tall glass half-filled with cracked ice.

Ginger Ale Surprise

Ice cream may give variety to ginger ale. Add a scoop to the ginger ale, and serve immediately, or whip it into the ginger ale.

Iced Chocolate

For each person fill a tall glass two-thirds full of cracked ice. Pour in freshly made chocolate or cocoa. Add 1 tablespoonful of whipped cream, either beaten into the cocoa or left on top for garnishing.

Chocolate Milk Shake

Make a rich chocolate sirup by cooking one-third of an ounce of grated chocolate and 2 tablespoonfuls of hot water, per person. Cook the mixture for 2 minutes and stir it constantly so it forms a smooth paste. Now combine two-thirds of a cupful of milk, 1 tablespoonful of whipped cream, and 1 tablespoonful of the chocolate sirup. Shake and stir these ingredients thoroughly and then pour them into a glass which contains a little cracked ice.

Pineapple Punch

Boil together for seven minutes 2 cupfuls of sugar and 1 quart of water. Cool it and then add 3 cupfuls of grated pineapple and the juice from 6 lemons. Chill, and before serving the beverage add 3 pints of ginger ale or charged water. Garnish with cherries and mint leaves.

Snappy Grape Juice

Fill a tall glass one-third full of crushed ice. Add the juice of one-half of a lemon, one-half of a glass of grape juice, 2 tablespoonfuls of powdered sugar and either plain or charged water. Chill before serving.

Caramel Milk Shake

Make the caramel sirup by melting in a heavy pan one-half of a cupful of sugar until it is delicately brown. Then gradually add one-half of a cupful of boiling water, and stir the sugar until the water is dissolved. Continue to cook until it becomes thick. This usually takes 7 minutes. The sirup is now ready to be put away in jars for further use. For the caramel milk shake, combine 2 or 3 tablespoonfuls of caramel sirup, three-quarters of a cupful of milk, 2 tablespoonfuls of whipped cream, and one-quarter of a cupful of cracked ice. Shake all the ingredients well except the ice and then serve, pouring the milk shake into the glass which contains the cracked ice. This recipe serves one person.

Fruit Eggnog

Beat separately the yoke and white of 1 egg. Add to the yolk three-quarters to 2 tablespoonfuls of sugar, then add the white of the egg. Now pour in three-eighths of a cupful of fruit juice and three-eighths of a cupful of cream. Beat the mixture until it is well mixed. Then add just enough lemon to bring out the taste of tartness in the fruit.

Rhubarb Special

Cook 1½ pounds of rhubarb in 1 pint of water until the small pieces are tender, and strain it. Now add 1¼ cupfuls of sugar to the hot rhubarb juice. Allow it to cool and then add three-fourths of a cupful of orange juice, one-half of a cupful of lemon juice and three-eighths of a cupful of shredded pineapple. This recipe serves 12 people and should be diluted with from 1 to 2 quarts of iced water. Garnish with mint leaves.

Fruit Juice

Many refreshing drinks can be made with fruit juice, either plain or combined with several flavors. The home maker may prefer to purchase her juice already made or she may make a supply by following this recipe:

Make a sirup by boiling equal measures of sugar and water until it forms a thin sirup. Allow it to cool and when it is to be served, dilute it with 3 to 5 times its volume of water and add fresh fruit juice to taste.

Easy TO MAKE TO LOOK AT TO EAT
How easy it is to prepare a cool, summer meal with Knox Sparkling Gelatine! Knox, being the *real*, pure, unflavored, unsweetened gelatine combines with almost any other real food such as fruits, vegetables and meats in a hundred different dishes—each a temptation to the eye and a delight to the palate. And remember this: there's enough gelatine in every Knox package to make four different desserts or salads—six helpings to each. You can make this summer favorite and still have enough gelatine left in the package for three other desserts or salads. Order a package from your grocer today and just try this recipe tomorrow.
Nut Souffle
(6 Servings)
1 level tablespoonful Knox Sparkling Gelatine; ¼ cup cold water; ½ cup sugar; ¾ cup milk or fruit juice; 1 cup cooked pineapple and strawberries; 1 cup chopped nuts; 1 cup cream or evaporated milk, whipped; white of one egg; salt.
Soak gelatine in the cold water about five minutes and dissolve over hot water. Add dissolved gelatine to cream, milk and sugar and fold in beaten white of egg. When cold, add the pineapple and strawberries which have been chopped in small pieces. Serve ice cold in sherbet glasses and sprinkle with chopped nuts. Cherries may be used instead of strawberries. Turn into mold lined with lady fingers and serve garnished with whipped cream and cherries.

BILL TO CONTROL CHAIN STORES IS WIDELY DEBATED

Giving Manufacturer Power of Retail Price Dangerous, Say Opponents

SPECIAL FROM MONITOR BUREAU

WASHINGTON—Should the Government assume control over the great chain stores which have sprung up since the World War or should confidence be placed in the pressure of competition to adjust the menace to the retail market which many profess to see in the new order?

The question is becoming more vital to the economic life of the nation daily as the chain stores spread farther and farther and absorb an ever increasing share of the distributing facilities. The issues have been expressed and conflicting interests have joined in combat in many of the states. It is being made the central issue in Wisconsin elections. But until recently the problem has not seemed to come within the sphere of interest of the Federal Congress.

That the chain stores will continue appears to be inevitable. The question arises as to whether under present conditions they constitute unfair competition as regards the small retail unit, and whether they are injurious to free and legitimate manufacturing. In either case a loss to the consumer is assumed as being the fundamental evil if the affirmative proposition is substantiated.

A bill based on just such assumptions is now before Congress. Known as the Capper-Kelly price fixing bill it is aimed at various chain and department store practices which its proponents believe primarily detrimental to manufacturers, and finally to the consumer.

Manufacturer Sets Selling Price

The bill makes it legal for a manufacturer or producer of trade-marked or standardized goods to sell them to retailers under a contract definitely fixing the final price to the consumer. There are other clauses stipulating that contracts to competitors in the same district should contain the same provisions, and others releasing the retailer from the contract under such contingencies as closing out sales or end of the season sales. But the point of the bill is that it seeks to provide protection for the manufacturer or producer from price slashing by the chain or department store.

M. Clyde Kelly (R.), Representative from Pennsylvania, in sponsoring the bill before the Committee on Rules of the House, charged that, "50 per cent of the present chain store growth is due to this practice of using as bargain bait standard merchandise which is well known nationally at a certain price."

He charged that trade was attracted by such exploitation of standardized articles and that profit was then made on unstandardized, bulk and other types of articles, or produce. "All over the country men have gone into drug stores and called for unnamed goods, or unstandardized goods," he said, "and they have bought at a bargain some of the branded goods. They have found that the total cost of goods of all kinds is in favor of the independent dealer."

Similar practices were charged against big department stores. Schuyler Merritt (R.), Representative from Connecticut, also speaking at the House committee hearing, referred to the practice of a New York department store of advertising books at less than the price advertised by the publisher.

Opponents of the bill think that its effect will be far otherwise than intended. Charles H. Adams, former chairman of the Massachusetts Commission on the Necessaries of Life, has called upon the congressional delegation from his State to defeat this bill in which he sees nothing but higher prices to the ultimate consumer.

Says Consumer Would Pay

"In 10 years' experience on the Commission on the Necessaries of Life," he says, "I have seen many schemes designed to increase the cost of goods to the consumer, but none so far reaching and monopolistic as this bill, which will permit the producer to fix the price at which goods shall be sold at retail, thus eliminating all price competition."

In fact, Mr. Adams professes to see in the bill great potential profit to those very chain stores whose activity the bill in intended to control. "It will indeed," he says "add millions upon millions in profits to the great chain stores and organizations controlling trade-marked goods. More and more the common necessaries of life are being sold under a trade-mark and label. The trade-mark will be extended to everything worth while, and by this bill the cost of living will be increased in every home."

Others profess to see in the bill a tendency destructive to the meaning of the Sherman Anti-Trust Act. Its sponser, Mr. Kelly, replies that on the contrary it has been made necessary by court rulings inimical to the Sherman Act. From the passage of that act in 1890 until 1911, he said in his testimony at the House hearing, there were many court decisions, "all of them upholding the right of contract to maintain a resale price as a necessary part of business."

In 1911, he explained, the Supreme Court of the United States, in the Doctor Miles case, involving this type of contract, reversed all of those previous decisions. It was this change, Mr. Kelly maintains, which made possible the abuses against which his bill is aimed.

CHICAGO RESCUES ITS SUPERLATIVE RECORD

SPECIAL FROM MONITOR BUREAU

CHICAGO—The new Board of Trade Building needed to have some sort of superlative to describe it, but what could it be? Not the world's tallest skyscraper, nor yet the largest in floor space is this handsome new structure.

It began to look as if it would have to be dedicated without a single "biggest" in the description until a statistician came to the rescue. The electric light fixture in the center of the stately trading hall, a splendid wheel of illumination, was found to have 62,500 watts of light. So it has been announced as "the world's most powerful main chandelier."

A Quotation for Today

IF THOU wouldst make anything a habit, do it; if thou wouldst not make it a habit, do not do it.
—EPICTETUS.

In Lighter Vein

The Ex-Servant

Prospective Bride (to visitor come to view wedding presents): "No, dear—all those alarm clocks aren't wedding presents. They are what I had given me by various mistresses when I was in service, to get me up in the morning!"—*London Opinion.*

Or Maybe Florida

"She was a maiden of twenty summers—and how many winters?"

"None! She lived in California."—*University of Southern California Wampus.*

The Apt Reply

Nathaniel Parker Willis (1806-1867), American poet and journalist, was the life of every party he attended. At a dinner given by Mrs. Gale in Washington, Mr. Willis sat next to Mrs. Gale's niece, and engaged in a tête-á-tête with her. Mrs. Gale penned her niece a note, and had the butler hand it to her. The girl read, "Don't flirt so with Nat Willis."

Mrs. Gale, meanwhile, was having a lively chat with Mr. Campbell, on her left. So Mr. Willis, noticing the message, penned this smart reply: "Dear aunt, don't attempt my young feelings to trammel, nor strain at a Nat while you swallow a Campbell."

Cheaper

"That house I have taken from you," said the dissatisfied tenant, "is horribly draughty. When I am sitting in the middle of the room my hair blows all over my head. Can't you do something for the windows?"

"Don't you think, sir," replied the agent, suavely, "it would be easier and cheaper for you to get your hair cut?"—*Sunderland Echo.*

Well Worn

Teacher: "What is meant by 'shining raiment'?"

Willie: "A blue serge suit."—*Judge.*

Passing Show

The Professor: "Is this a free translation, do you know?"

Assistant: "No, sir, it costs eight and sixpence."

The Modern Smithy

Under the spreading petrol pump
The village blacksmith stands,
And passes out hot dogs and pop
With both his brawny hands.
And the big fat roll he takes in change
Bursts all his rubber bands.
—*Chicago Daily News.*

Speaking of Divots

"Show me a golfer," says one of their number, "and I'll show you a hustling man."

Well, a lot of them, apparently, don't believe in letting any grass grow under their feet.

Ashes, shove, honey, treat, Moses, Latin.

A Word a Day

Clique

A "clique" is a smug, small circle of persons associated together by some common interest. "Coterie" and "clique" agree in the sense of being a more or less exclusive group, but the former stresses the idea of selectness and congeniality within the small circle, while the latter hints of an arrogant, gossipy, selfish exclusiveness—and is regarded in an unfavorable light.

"Clique" is derived from the Dutch *klikken*, an imitative word expressing a slight sound, "click," also used in the sense of "to inform, tell"—whence *klikker*, "a telltale." Our word originally designated "a set of talkers," and it is perhaps no exaggeration to state that the implication still holds.

The pronunciation of clique should be observed carefully. It is one syllable and is pronounced as though spelled kleek.

"The members of the organization were warned against forming into cliques."

Note: Webster's first choice is accepted as authority for pronunciation.—Ed

Odds and Ends

Farm Economy

Since the introduction of wheat harvesting machines, 50,000 of these farm implements have taken the place of more than 100,000 farm laborers.

CARPET BEATING IN PARIS

A proposal to make the beating of carpets within the city limits a punishable offense is being considered in Paris.

Finding Through Giving

Pasadena, Calif.

A WORKING woman, employed in a humble calling, found herself alone on a holiday and quite at a loss to plan a program for the day. After some thought she decided to invite a woman who was almost a shut-in to her home and devote the entire day to her entertainment. So, taking her old car, she called for the prospective guest, took her for a short drive and brought her to her own home where a cozy lunch, a restful chat and a longer drive, followed by refreshments at a pleasant highway inn, completed a memorable day.

The guest, who had not been out of her home neighborhood for several years, was amazed at the beauty and growth of the community and, seeing it through her eyes, the hostess found what at first promised to be a prosaic, if not lonely day, transformed into a genuine joy, immeasurably enhanced by the enthusiastic appreciation of her grateful guest.

Brevities

Detroit News: June is the delightful month when the amateur gardener learns whether the radishes he planted were rhubarb or nasturtiums.

Los Angeles Times: There were four detours on the road, not counting the times we went around passenger buses.

The Children's Corner

What the Rain Does

"OH, DEAR! Oh, dear! Oh, dear!" sighed Meg. And "Oh, dear! Oh, dear! Oh, dear!" said Billy. "Why did it have to rain on the day we wanted our picnic in the woods! I don't like the rain."

"Neither do I!" agreed Meg.

"Hey! Hey! What's this I hear? Somebody doesn't like the rain!"

Meg and Billy turned to find Mr. Nubbins, the scissors-grinder, peeping in the kitchen door at them.

"It spoiled our picnic!" said Billy

"And we had everything packed ready!" added Meg.

"Why, now, Farmer Jones was very pleased about the rain. He said it came just in time to save his crops, and Dan the Miller was singing away because it was bringing water to turn his mill-wheel so that he could grind more flour for people. I think the rain is very useful!"

"Well, maybe it is useful," agreed Billy, "but—"

"Ah! I don't like that word 'but.' It always seems a selfish word to me when people use it that way. Just think of all the wonderful things the rain does!"

"It spoils picnics!" said Billy, and then he laughed, and said: "But I suppose it is useful!"

"That's better!" said Mr. Nubbins. "It is useful. Do you ever take a bath?

"Why, of course!" said Meg and Billy both together.

"You'd miss it very much if there was no water to help us keep clean, wouldn't you!"

"We certainly would!" said Meg.

"And so would the trees, and the hedges, and the roads, and the fences, and the buildings, and—"

"And the ducks!" said Billy, pointing out of the window at the flock in the yard.

"And the birds!" said Meg. "Oh, look at those sparows taking their baths in the pool of water over there!"

"Yes! And a lot of other things!" said Mr. Nubbins. "The air, for instance!"

"The air?" Billy repeated.

"Yes! The rain washes the air and gets all the soot and smoke and dust out of it. Haven't you noticed how sweet and fresh the air is after a shower, and how much better you can see things. I'm certainly glad it rains.

"And it will make the flower seeds in our garden grow!" said Meg.

"And bring water for us to drink and cook with and wash in!" said Billy.

"Yes! If it didn't rain sometimes, we would use up all the water, and then there wouldn't be any way to get more. Why, I couldn't even grind scissors without some water to drip on my grindstone!"

"Do You Know What I Would Do If the Rain Spoiled My Picnic" Asked Mr. Nubbins.

"That's right!" agreed Meg.

"Do you know what I would do, if the rain spoiled my picnic when I had everything ready?" asked Mr. Nubbins.

"What would you do?" asked Billy.

"I'd ask Mother if I could light a camp-fire in the fireplace in the den, and take up the little rug in front of the fireplace, and put newspapers down, and cushions, and set the potted fern and the geraniums all around, and have an indoors picnic!"

"That would be wonderful!" said a voice, and they all turned.

"Oh, Mother!" cried Meg. "You've been listening!"

"May we, Mother?" cried Billy.

"I think we can manage!" said Mother.

"And can Mr. Nubbins come too?" asked Meg.

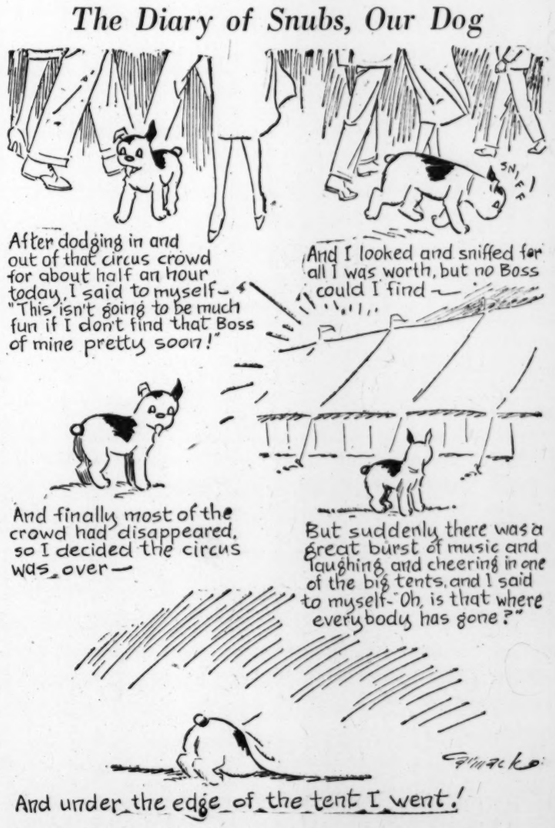

"You must ask Mr. Nubbins that! If he's not too busy—"

"Well, now," said Mr. Nubbins with a happy little chuckle. "I think I could stay for a little while! It's a long time since I was invited to a picnic—especially such a special picnic as this!"

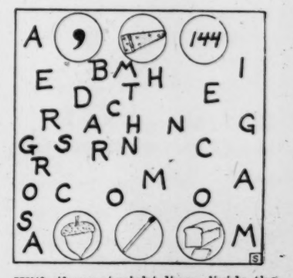

"Oh, how jolly!" laughed Meg. "I'm glad is rained!"

"So am I!" said Billy. "I'm very glad!"

Separated Names Puzzle

With three straight lines divide the picture into six groups of letters, which, when properly arranged, will spell the names of the objects illustrated. Each word contains five letters.

THE CHRISTIAN SCIENCE MONITOR

BOSTON, FRIDAY, JUNE 20, 1930

"First the blade, then the ear, then the full grain in the ear"

PUBLISHED BY THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

The Christian Science Monitor Editorial Board

The Editorial Board as constituted by The Christian Science Board of Directors for The Christian Science Monitor is composed of Mr. Willis J. Abbot, Contributing Editor; Mr. Roland R. Harrison, Manager of The Christian Science Publishing Society; Mr. James E. Patton, member of the Board of Trustees of The Christian Science Publishing Society, and Mr. Frank L. Perrin, Executive Editor. It is the duty of the Monitor Editorial Board to consider and determine all questions within the Editorial Department of The Christian Science Monitor, and also to carry out the stated policy of The Christian Science Board of Directors relative to the entire newspaper. Each member of said Editorial Board shall have equal responsibility and duty.

All communications regarding the conduct of this newspaper, articles and illustrations for publication should be addressed to The Christian Science Monitor Editorial Board.

EDITORIALS

Assaying New Jersey's Vote

FRIENDS of prohibition will be ill-advised if they fail to give due weight to Dwight W. Morrow's sweeping victory in the New Jersey primary. His defeat of Franklin W. Fort, the dry candidate, by 300,000 votes, is an impressive fact. There should be no attempt to ignore or deny it. The cause of prohibition will be better served by frank recognition of the result as a fresh indication of the strength of wet sentiment in New Jersey.

By this vote it becomes, we believe, the first state in which both parties have abandoned prohibition. Undaunted facing of that fact and courageous preparation to change it is the wise course for the drys. Nor need they read Mr. Morrow's victory as wholly a wet triumph. The nominee's first speech seemed to make prohibition the chief issue. His principal opponent hinged his entire campaign on that question. And many citizens, believing that a national threat to the dry law was involved, felt that the issue was greater than the man.

Apparently large blocks of New Jersey voters refused to accept that estimate of the situation. They made the man greater than the issue. Some of them undoubtedly voted for him because he is wet, but certainly many more because he is Dwight Morrow. Such recognition of outstanding qualifications by voters should give encouragement to all friends of democratic government.

That a large number of the 415,000 who supported him were drys—unwilling to pass up the opportunity to choose a senator of the Morrow caliber and unable to see that national prohibition was endangered—is evident from the returns. Not only did districts known to be dry vote for Mr. Morrow, but one of the two New Jersey congressional races where prohibition was an issue was won by a dry. That scarcely makes the primary appear as a clear-cut repudiation of prohibition.

In a word, too much should not be made of the fact that a wet state has chosen a wet candidate—even by an unusually large margin. But enough will be made of it by the wets to give them much encouragement. And enough should be made of it by the drys to arouse them to the necessity of overcoming not only the wet vote but the wet sentiment which has been developing on the Atlantic seaboard. This raid on the New Jersey sector should be a call to arms for a counter-attack all along the eastern prohibition front.

The Fruits of Mechanization

THE orthodox economic justification for supplanting men with machines has always been that in the long run two workers will be hired for every one discharged. An important qualification has just been added to this theory by William Green, president of the American Federation of Labor, in a statement to a congressional committee. More workers will not be hired, Mr. Green says in effect, unless the benefits of the accelerated output are scattered through society at large, rather than monopolized by a few, or within a class.

His statement was made in connection with a reasonable demand for a better social distribution of the undoubted general benefits of that mechanization which, willy-nilly, is now taking place everywhere in industry. He backed up his contention with certain interesting facts.

New machines, he said, have for a long time made it possible to accelerate the production of goods, and in America until recently there has gone with this development a corresponding increase in the number of workers. But in the last decade there has been a profound change. Between 1919 and 1929 output did, as had been the case in the decades preceding, increase vastly; it jumped up by two-fifths. But this increased output was achieved by fewer workers!

Instead of multiplying, the number of factory employees actually declined in the ten-year period by a total of 7 per cent. As a consequence there were fewer factory jobs in the nation in 1929 to be divided among a larger population.

No one will draw from these facts the inference that mechanization has gone too far. If a machine can make better iron rails, or mazda lamps, or motorcars than a man, it is inevitable that the man will be displaced. But industry and society must give that displaced man some compensation for the sacrifice demanded from him. It must do this not only on humane grounds, but in sheer self-defense.

A more forcible presentation of the case could scarcely be made than Mr. Green's. If the accelerated output of goods is not accompanied by an increased consumption, he said, then it is rudimentary economics to foresee a glut of goods, overproduction, industrial stagnation and hard times. To achieve an increased consumption the workers must get more pay, that they may buy more goods.

That is one way of balancing the accelerated production. Another way is to give workers shorter hours, which will halt the creation of the surplus at the source. This is only another method of saying that, unless the workers have their fair share of the benefits of mechanization, the whole process becomes a bane rather than a benefit. The great machine which produces 1000 articles in the time it formerly took many men to produce one, does society as a whole little good if the surplus workers are ruthlessly scrapped and the owner of the machine monopolizes the profits.

Politics and Economics in Egypt

THE statistics of the latest Egyptian cotton crop would make it appear that there is nothing wrong with the state of Egypt. Politically, perhaps, this is true. Certainly the Egyptian delegates, who have been negotiating in London, despite their failure to achieve an Anglo-Egyptian treaty, express themselves as completely satisfied with the course of events. The door, as Arthur Henderson told them, is always open for further negotiations, and they consider that Egypt has only to maintain its present position to secure eventually all she wants.

But politics is not attracting much attention in Egypt: for, at the moment, Egyptians are far more concerned with other and more pressing matters. The economic state of the country, despite the record crop, is in a far from satisfactory condition. A precedent, as economically unsound as it is disastrous, which was created for political reasons shortly after the war, has involved successive Egyptian governments as buyers at a fixed price on a falling cotton market.

The low prices of cotton which have ruled throughout the world for the last year naturally affected the Egyptian commodity, and some six months ago government intervention—as a popular movement—was ordered. The market has not improved, and the Government has used £10,000,000 to buy cotton—a huge figure in a country whose annual budget is under £40,000,000.

The Egyptian Government is in a quandary—afraid to buy more owing to the extent of its existing commitments, and equally afraid to stop buying or to unload what it has already bought, lest the bottom should fall out of the market.

Simultaneously, the Egyptian Treasury has been buying all available stock of the Egyptian loans. To finance these two operations, deep inroads have inevitably been made into the national reserves, and there is in Egypt today an embarrassing lack of liquid cash and readily realizable assets.

Moreover, the protectionist tariff inaugurated last March has already considerably increased the cost of living at a moment when money is perilously tight and business alarmingly slack. Altogether the Egyptian Government is likely to have its hands full at home for the time being, and it will need both ability and courage if it is to tackle the situation successfully.

Films and Education

THAT the admission of educational films free of customs duties would serve the highest interests of international education is the chief contention advanced by the International Educational Cinematograph Institute in Rome in its recently published draft convention, which is at present being considered in official circles both in Europe and America. But before the question of the abolition of customs duties on educational films becomes an issue of real importance, the much more important question of the place of the cinema in education will have to be finally resolved.

According to latest reports the National Commission on Educational and Cultural Films in England has already done an astonishing amount of work in elucidating the problems that will have to be solved before the maximum benefit can be secured from educational films. There is, above all, it appears, the need of a thorough scrutiny of the large number of already existing educational films, not all of which would pass muster as educational material of the right sort. Again, the suitability of silent and talking films in the classroom is another question that requires a definite answer. Nor is the purely financial aspect entailed in the cost of the installation of apparatus in schools to be disregarded. And, finally, there is the no less important task of coördinating the educational activities of the cinema, the wireless and the phonograph so as to avoid any unnecessary overlapping.

All these problems, it is gratifying to observe, the English commission is eager to solve, and for that purpose it has enlisted the aid of the best educational and scientific advice in the country. The fact that educationalists have hitherto been unable to make the fullest use of the cinema is undoubtedly to be explained by the lack of preparatory work. As a result of the present inquiry in England, together with the information already gathered on the same and cognate problems elsewhere, the problem of evolving in the near future a scheme for making the cinema a direct, instead of as today an indirect, factor in education, should find itself well on the way to solution.

A Fair Deal for All Immigrants

THE House of Representatives is considering the Senate bill which would put immigrants from Mexico under the operations of the quota provisions of the present immigration act. At the same time, the House has before it the proposal of Albert Johnson, author of the present immigration law, to admit Japanese to the privileges of the quota system. Neither of these proposals is likely to reach a final vote at this session of Congress. Their presence on the docket, however, gives a good opportunity for national study of the whole immigration question.

In any consideration of this issue, two principal facts must be taken into account. The first of these is the general agreement of the country on a policy of drastic restriction of immigration. The second is that the haphazard methods by which the law has reached its present form have worked undoubted evils. The law, as it stands, is not equitable as between other nations, and even continents. The methods by which discriminations have been written into it have played directly into the hands of demagogic politicians, eager to win local advantages. And these same discriminations have needlessly exacerbated the relations of the United States with other states.

Proceeding on the basis of these two principal facts, the question arises: Is this not a good time to prepare an immigration bill that will apply drastic restrictions, under the quota system, equitably to the citizens of all foreign states? This is no matter for headlong action on the part of Congress. Headlong action has produced the present unsatisfactory state of affairs. But it is easily possible, in the months before the new Congress assembles, for an immigration bill to be framed that will treat all the rest of the states of the world on a basis of equality, and will at the same time accomplish the purpose of restriction which the citizens of the United States demand. It can be done. Should it not be done?

Behold, the Solo Double Bass

OF ALL the members of an orchestra, the double bass is perhaps the least called upon to play a solo. This is no reflection upon the double bass. Composers seem to find inspiration in the lighter things of the orchestra, and relegate the heavy strings to the section devoted to the percussion instruments. Yet the double bass has range and quality, as has been demonstrated on more than one occasion, and it is pleasant to record that a Glasgow theater recently recognized this fact by featuring a duet for double basses. It matters not how low the duet was pitched, whether it brought out the beauty of "Asleep in the Deep" or some other song lamenting the tragedies of the ocean bed, but it is significant that the double basses were permitted to shine and capture, if only for a moment, the brilliance generally surrounding the light strings or wind.

The player of the double bass starts life under a handicap. He cannot with comfort travel on a street car. The conductor might hint facetiously at the need for freight rates. Nor can he serenade the maiden of his choice, if there be dogs in the neighborhood. But he loves his instrument, and has been known, in amorous moments, to join with Chirgwin, the once famous vaudeville comedian, in the song:

> My fiddle is my sweetheart
> And I'm her beau.

His is not all a world of clouds. It has its lights and shades. And while he is generally regarded as a dull fellow, he can be humorous and gay as well as sad and weary. Once he masters his instrument, he can do with the double bass what the late August Van Biene did with the cello and a talent for acting: transport an audience to the lonely bush of Australia, where the settler finds the haunting tones of strings a constant companion and a never-ceasing joy. Lacking the grace of a violin when entering a symphony stage, the double bass nevertheless makes an imposing array as he files in back of the stage with his big artillery ready to supply the roar of thunder or the rumble of war, or the ominous clouds of a leaden sky when a descriptive piece is on the program. And while he is seldom found without his companions of the orchestra by his side, it is a delight to see him once in a while rise triumphant above circumstance and be a show in himself.

Forced Landing Safety

IN THE comparatively brief period during which airplanes have given transportation a third dimension, much progress has been made in the all-important problem of safety. The public has seen its growing confidence justified in operations of established transport lines, high standards of personnel, excellence of fundamental technical design and the effort to develop devices to eliminate the last hazards of flight.

But it is strange that an elementary and extremely important point has been overlooked in the development of large cabin planes. Apartments are required to have more than one stairway. Hotels must have fire escapes. Theaters are equipped with doors that burst open at the application of inside pressure. Yet airplanes, with their tiny windows, have no emergency exits. Most cabin planes have only a single, small door. If it is twisted or jammed by a forced landing, the only regular means of escape is closed.

It seems such a simple thing, yet its importance is not being overdrawn. There is the case of a transport plane carrying thirteen passengers which "pancaked" into the water recently. By happy circumstance, the force of the impact tore open the sides of the metal cabin, enabling the passengers to escape. This danger in forced water landings is especially apparent with the "high-wing" plane where the cabin is below the wings, thus becoming submerged before the buoyant effect of the wings themselves can be exerted. There are other instances on the record in which fire has followed unexpected landings. Additional means of egress from the cabin are, in such cases, equally important.

The answer is a simple one. It is quite feasible to redesign the bracing of cabin structure, or even a portion of the upper wing structure, to provide a series of ports large enough to permit passengers and crew to climb up and out. The ports normally would remain closed and fastened with a catch operated from the inside. But a forced landing, jamming the door and even some of the ports, would still leave a way out. The best plan, of course, is to prevent forced landings. But as long as they are a possibility, account must be taken of them with adequate emergency equipment.

Editorial Notes

A recent important change in grocery store chain operations is the steady shift from a service basis to a "cash-and-carry," because it is said to please the customer who likes to examine shelves and select goods personally, and because it is more profitable. These stores which are going on a self-service basis at the rate of 100 a week seem to put a new meaning into the adage, "They serve best who serve most," by reducing service to a minimum and cutting prices to the bone.

What is apter proof of the speed a new industry has made than that it has outstripped even the word to which it gave origin? Airplane has now grown cumbersome along with automobile and cinematograph; plane, car and movie come more easily to the tongue.

Now comes the news that petrol can be made from grass. Does this presage an added inducement to mow the lawn before starting on a long motor trip?

Veterans of the China Seas

OFF THE CHINA COAST

PERCHED upon a ricksha amid my impedimenta, consisting solely of hand bag, portable typewriter and raincoat, I made a slow way down the bund. It was very dusty and even more than very hot, being two o'clock in the afternoon at Saigon. A long line of Annamite women were loading coal in baskets into the bunkers of a small Japanese steamer, and clouds of penetrating soot hung motionless in the moist air.

The sun blazed white hot on the river, which reflected it as from molten metal. Wherever there was a bit of shade Chinese coolies lay huddled in their midday naps. No white man was in sight anywhere, for all Saigon takes refuge from sun and heat in darkened rooms between the hours of noon and four o'clock, for Saigon every day in the year is one of the hottest places in the world.

But I had other business in hand. I was bound for the Telemachus, and sure enough, there she lay far down the dusty bund. "She's no world-cruise-de-luxer," the agent had told me when, on two hours' notice, I had booked that morning. "She's a veteran of the China seas, is the Telemachus, one of the early ones, launched in the Clyde just forty-seven years ago!"

* * *

Well, she looked the part, and so deep in the water she sat as to remind me, and not without a twinge of nostalgia, of the South Seas trading schooner with her few inches of freeboard on which I embarked one memorable afternoon in Papeete for a long tour of the fairy isles down there. She was deep laden with rice for Hong Kong, was the old Telemachus, and she definitely represented the other extreme of sea travel from that with which I had lately been familiar.

For that very reason I regarded her with satisfaction. A "hard-run tramp from anywhere," veteran of the long sea trails, at her stern the dingy red flag that means security and good cheer from one end of the world to the other, the long, narrow, unhandsome Telemachus, with her wood-incased cylinders and half her machinery outside, seemed to me like an old acquaintance. In any case, she and I would soon be the best of friends.

The captain, grizzled traveler of the China Seas, stood with legs apart and hands in pockets and regarded me wonderingly. Near by the chief engineer, "forty years fra Glasgie an' never once been home, mon," wiped his streaming face as he watched me disentangle myself from the ricksha. I stepped over the rail, which was level with the wharf, and upon the rusty deck, handed my things to a scantily clad "boy," and tendered the captain the agent's card. He glanced at it, and then at me, long and searchingly, with the calm assurance of the practical seaman.

* * *

"You don't look like a tourist," he observed at last. "Got the complexion of an outdoor man, too. Say, mister, you c'n tell me it's none o' my business, if you want to, but—how'd you come to embark on this packet?" I told him my reasons were partly economic and partly preference. I had decided this morning that I had had enough of Saigon and felt the inclination to proceed to Hong Kong. Searching through the steamship offices—rather than the tourist agencies—had uncovered this excellent opportunity.

"Excellent, eh?" he glanced quizzically at the chief. "If the northeast monsoon happens to come down strong, maybe you won't think so, mister. This old wagon's pretty deep, and she'll take a lot of water in a head sea. Three years ago this time, how long d'ye think we took from here to Hong Kong, less than 1000 miles? Just sixteen days! Had to run in under the land and anchor half a dozen times, and finally go to Tourane, in Annam, for coal."

"That's right," chimed in the "Chief." "Recollect that time, too, the typhoon caught us just before we got into Hong Kong? Came down without a bit of warning, it did, an' drove us right onto the beach. Picked up one of the Kowloon ferries and carried it a mile inland. Took a British India packet an'—"

No guide on a Wyoming "dude ranch" takes more delight in bestirring the imagination of the eastern "tenderfoot" than does a seaman of the China coast in unfolding tales of typhoons and pirates to the newcomer from Europe. But I was a long way from being a stranger to the Orient, or to the sea, for that matter, and I reciprocated with an incident or two connected with destroyers off the Irish coast in 1918 and trading schooners in the South Seas some time later.

* * *

"I was in East Africa in '18," said the captain, now beginning to accept me into the fraternity of the sea. "Master of a transport from home to Dar es Salaam. And if you think Saigon is hot—how about it, Mister?" He turned to the Chief, who was eagerly awaiting the opportunity to add a reminiscence.

"Saigon hot!" he began testily. "Why, in Dakar, in Senegal, in 1907, I saw—" But at that moment the pilot arrived, and activity immediately commenced. Presently the old Telemachus moved out into the stream and then proceeded leisurely down the river. It was the sort of casual departure that I like. No handkerchiefs were waved from the wharf, no parting bits of advice flung across the ever-widening stretch of water. No "jazz" bands blared, no tugboats hooted, no sirens screeched deafeningly.

That an old traveler of the China seas, bearing other travelers of many seas, was setting forth, concerned no one. "Only another old tramp going to sea" would be the comment of such persons as might note our unacclaimed departure, and they would glance along the bund until their eyes rested upon the huge bulk of a French liner, elaborate, pretentious and expensive.

* * *

Yet the Telemachus, and such as she, bring one into that real intimacy with the sea that every man who loves the sea craves. "We're all veterans here," the Captain observed again, as we sat down by and by to a very satisfactory dinner served by courteous Swatow "boys" in the cozy little cabin. "All veterans, the Telemachus, the Chief here, the First Officer. Thirty years or more on the China coast, all of us. More than one typhoon, more than one narrow escape from pirates. In 1908 I was captain of a West River steamer. We were tied up to our wharf in Hong Kong when a typhoon came down on us without warning. Our stern was lifted right up onto the wharf and the propeller shafts snapped off like pipestems. Some of us out here could write a book, eh, Chief?"

"'Tis a fey trade, that!" sniffed the Chief, cheerfully indifferent to my presence. "But if some o' us on the China coast was to go into it—" he arose and stalked significantly forth, as who should say, "We veterans of the China Seas could give you some points!"

No need for the veterans of the old Telemachus to be other than themselves for the benefit of finicky tourists. They rarely greet a passenger and when one chances along they speak to him quite as they would any casual acquaintance anywhere. Like their ship they are without veneer, and for that very reason I prefer their company at sea. And today, as we move leisurely along, at "almost nine knots," as the Captain has just told me, over smooth, sunlit tropical seas, I sit and write contentedly in the soft breeze under a dingy old awning on the little poop deck. And for the companionship of these veterans of the China seas and their ancient ship, I would cheerfully give over the best "cabin de luxe" on the largest liner that sails the China coast.

Letters to The Christian Science Monitor

Brief communications are welcomed, but The Christian Science Monitor Editorial Board must remain sole judge of their suitability, and this Board does not hold itself or this newspaper responsible for the facts or opinions presented. Anonymous letters are destroyed unread

"The Boom in International Studies"

TO THE CHRISTIAN SCIENCE MONITOR:

No doubt the editorial in the Monitor of May 19, headed "The Boom in International Studies," answers in part the letter from Haven M. Powers to the Monitor, under title of "Training Leaders in World Peace," published May 15.

In regard to the editorial, may I call to your attention that the George Washington University has a school of government, founded in 1928 by the Masons. This school has two departments, one in government and one in foreign service.

Again, in regard to Mr. Powers' letter, may I suggest the point at which to begin this work of peace-trained statesmen? It is with a few scholarships, peace scholarships, in the universities which have these schools or courses in foreign service or international relations.

The navy, the army, the marines, the R. O. T. C., the C. M. T. C.—all have scholarships open to and in these schools.

As a student here at the school of government in the foreign service, I may say that I have looked for two years for a peace scholarship from some quarter.

From the National Council for Prevention of War, from the International Institute of Scholarships, and from others I have had encouraging response, but as yet there is no definite plan for the establishment of a peace scholarship.

It is the fact that certain persons here and there are indelibly stamped with and represent that idea of enlightened understanding, world peace, which will be the beginning of great and lasting achievements. JAMES A. LUMSDEN.

Washington, D. C.

"The Way of Transgressors Is Hard"

TO THE CHRISTIAN SCIENCE MONITOR:

A recent article in the Monitor endeavored to point out that bootlegging was not as profitable as common gossip would have the public believe, and that—aside from the ethics of the matter—it was impossible to amass fortunes in the illegal traffic in alcohol. Your correspondent was absolutely right, but did not show a deep knowledge of the subject, since he sought to draw his conclusions from fines collected, attorney fees paid, and time lost while in prison.

The truth of the matter is that bootlegging, like all other evils, possesses within itself the very forces for its own destruction.

The situation is burning itself out. The writer knows personally of many who, having entered the traffic for profit, have abandoned it simply because it is too costly to do business. Much has been said and written about "the rackets," but lawlessness has its worst enemy in the lawless. No man can make money in bootlegging, not directly because of the law, but indirectly because the very fact that he is breaking the law opens him up as fair game to a class more vicious than himself; and when he gets through paying he realizes that he has taken great risks, endured a great amount of worry—and—has no money for it all.

Philadelphia, Pa. GEORGE H. ECKHARDT.

Age and Usefulness

TO THE CHRISTIAN SCIENCE MONITOR:

Some time ago I applied to a large chain-store organization for a position, and was told by the district superintendent, who happened to notice some gray hair on my head, that his concern did not employ old men, the age limit being thirty-five years.

In reply I said: "You call me an old man? I am just starting out in life. I haven't seen anything yet. You may say you have no work for me, but don't tell me I am an old man."

From there I went to another large concern, where I obtained a position with better salary than any chain store could pay and much more satisfactory working conditions. I feel that it is a crime against humanity for any business house to try to limit the age and usefulness of those who apply to it for work.

I wrote a letter to the superintendent of the above-named organization, telling him of my experience, and received a most courteous reply, thanking me for calling his attention to this serious mistake and saying that he would take immediate steps to call a halt to such statements by his men. I hope my experience will be encouraging to many readers of the Monitor who are facing similar problems.

Cincinnati, O. ALBERT JACOBSON.

What Makes an Artist?

TO THE CHRISTIAN SCIENCE MONITOR:

The Monitor never grows too old to give a message of helpfulness and beauty to someone.

During the house-cleaning period the writer unearthed a Monitor with its wrapper still on. It proved to be nearly a year old. From a quick turning of the pages, however, an article captioned "What Is an Artist?" caught her eye. The writer of the article said that "anyone that can do any task, no matter how humble, in a superlatively fine manner, is an artist."

This brought to memory an instance that happened several years ago when the task of cleaning house was both prosaic and arduous. Minnie May, a strong, happy-faced colored woman, was employed to help, but it was soon discovered that she was more capable of taking the lead than the novice. The writer marveled aloud at her ease of accomplishment, adding, "You are a real artist, Minnie May." Minnie May turned her gentle eyes and smiled. "I ought to know how to clean a house, I been at it since I was a little chile," and, turning with pardonable pride to the shining windows and spotless floors, added, "I reckon I like to do it."

Minnie May always had the vision of her work perfectly accomplished before her. No task is too humble to be done artistically. Thus because an old Monitor came to light with its message, the writer will renew her appreciation of work.

Wheaton, Ill. (MRS.) FLORA C. RUE.

Recalling the Days of "Treat, Treat, Treat"

TO THE CHRISTIAN SCIENCE MONITOR:

There are still thousands of men in the United States today who remember only too well the days of the saloon, and most of them have not touched a drop of liquor since they were legislated out of existence. I am one of these. I am sorry that the wets will not allow us to forget those dark days, the days of treat, treat, treat, constantly someone asking one to have something to drink and, of course, being treated in return.

I wish also to call attention to the propaganda that the liquor interests circulated from coast to coast when the states were going dry one at a time. They said it was unfair to have one state wet and one dry. Give us nation-wide prohibition, they said, and we will be satisfied and quit for ever. They thought at that time that nation-wide prohibition was impossible, but now it has come, they are crying for each state to have its own liquor laws. It was well known then as now that honor and liquor could not travel together. ALEX TAYLOR.

Montrose, Calif.
